International Partnerships for Strengthening Health Care Workforce Capacity: Models of Collaborative Education Jeanne Mahoney Leffers, Jennifer Gail Audette, Kevin S. Hardwick, William Van Cleve, 2018-07-31 A critical problem in resource scarce countries across the globe is the shortage of appropriately trained health care providers According to the World Health Organization the current global health workforce shortage of 7.2 million providers is estimated to increase to 12.9 million by 2035 This disproportionately affects resource scarce countries denying basic health care to millions and limiting access to life saving treatments Due to limited resources in these countries not enough health professionals receive training

few have the opportunity for continuing education and the ability to develop or implement educational programs and curricula is constrained. Additionally, many existing providers choose to emigrate in pursuit of professional advancement opportunities contributing to the overall shortage of qualified health care providers in these environments. Efforts to strengthen health workforce capacity not only increase access, safety, and availability of care but are critical to building resilient health systems capable of caring for the world's neediest populations. This requires not only cultivating new health care providers but also providing ongoing professional development to retain and support current providers, advancing the level of practice in accordance with current clinical science, cultivating educators, and enhancing training curricula. It is critical also to contribute to the limited body of research documenting the effectiveness and impact of various models of collaborative education and partnership to improve health worker training and retention. This Research Topic examines strategies for building health workforce capacity through the prism of educational partnerships, offering significant examples of effective models of international collaborative education as well as insight and guidance on the structure and operation of successful global partnerships. Collectively, the 31 articles accepted and included in this eBook represent a diversity of health professions and geographies across academic, non-governmental organizations, and other global partnership forms. The published manuscripts highlight various elements of partnerships with several consistent themes emerging: capacity building, local empowerment, mutual trust, and respect, long-term commitment, equity, collaboration, and the importance of integrating theory and practice for a balance of academic and clinical development. The manuscripts provide examples of partnership and educational programs that are in the formative early stages of implementation and others which have been sustained long-term, some for decades. The following eBook is divided into two parts, with each part broken down into sections. Part I of the eBook includes 18 manuscripts that showcase long-term educational programs that strongly exemplify multiple foundational aspects of international partnerships in education, including mutual collaboration and project management, empowerment of host partners to lead and sustain programs, and capacity building. While individual manuscripts included in Part I look broadly at multiple aspects of successful international partnerships in education, Part II manuscripts focus intently on one or two elements. Part II includes 13 articles that highlight partnership through short rather than long-term educational initiatives as well as program development and broad academic partnerships. This Research Topic was sponsored by Health Volunteers Overseas, a United States-based non-profit that collaborates with over eighty international universities and health institutions to send volunteer health professionals to low resource countries to provide continuing education, train-the-trainer courses, professional support, and consultation on academic program and curricula development.

Professional Practice and Learning Nick Hopwood, 2016-01-22 This book explores important questions about the relationship between professional practice and learning and implications of this for how we understand professional expertise Focusing on work

accomplished through partnerships between practitioners and parents with young children the book explores how connectedness in action is a fluid evolving accomplishment with four essential dimensions times spaces bodies and things Within a broader sociomaterial perspective the analysis draws on practice theory and philosophy bringing different schools of thought into productive contact including the work of Schatzki Gherardi and recent developments in cultural historical activity theory The book takes a bold view suggesting practices and learning are entwined but distinctive phenomena A clear and novel framework is developed based on this idea The argument goes further by demonstrating how new coproductive relationships between professionals and clients can intensify the pedagogic nature of professional work and showing how professionals can support others learning when the knowledge they are working with and sense of what is to be learned are uncertain incomplete and fragile

Interpretive Phenomenology Patricia Benner, 1994-05-17 Patricia Benner's philosophical introduction to phenomenology develops the reader's understanding of the strategies and processes involved in this approach to human science Contributors to the volume discuss the constitutive relationships between theory and practice consider the possibility of a science of caring from a feminist perspective introduce interpretive phenomenology for studying natural groups such as families and suggest a ground for developing nursing ethics that is true to the caring and healing practices of nurses Following a thorough and engaging exposition of the field's theoretical and philosophical foundations the work shifts focus to interpretive studies currently being undertaken within the scholarly community the research tradition is then applied and reexamined as it relates to specific lines of inquiry *Interpretive Phenomenology* presents an inclusive and well integrated discussion of the many correlative topics within this subject area Its relevance and accessibility will make this book an invaluable resource for advanced undergraduate and graduate students as well as professional researchers in nursing and other health sciences The authors share a deep regard for the primacy of practice and caring This is not the ethereal caring of many current theorists *Interpretive Phenomenology* presents an inclusive and well integrated discussion of the author's philosophical and practical approach looking especially at the relationship between theory and practice *Journal of Christian Nursing*
