Leading Mind Peter Hey, 2019-02-14 With his blend of engineering and the fields of personal transformation Peter Hey takes us on a deep yet accessible journey into the inner recesses of our minds He presents a unique model of the mind and the mechanisms that define our behavior Based on his own personal experiences as the son of a Holocaust survivor his sessions with his own clients and his background in computer design he brings the concept of programs in our unconscious as the basic mechanism that determines our actions Millions of programs operating below our everyday awareness each of them associated with emotions that in fact are the actual power behind our decisions in daily life Leading Mind explains how these programs are created from all our experiences starting already at conception through our time in the mother s womb all the way to full adulthood It also shows how when accessing our deep unconscious we discover aspects in us that transcend our current physical life Based on thousands and thousands of sessions done by practitioners around the world with remarkably consistent results across cultures education social status and personal beliefs Leading Mind shows how the current events that are impacting our civilization nowadays are the result of our emotional ignorance It brings to light an urgent call to reform our educational curriculum to teach how our mind works and tools for personal transformation and conflict resolution Understanding our minds brings tolerance and compassion for all It gives us the knowledge to change our limiting behaviors The start of real personal power to direct our lives in the direction that is our

authentic individual expression Steeped in Blood Frances J. Latchford, 2019-08-15 What personal truths reside in biological ties that are absent in adoptive ties And why do we think adoptive and biological ties are essentially different when it comes to understanding who we are At a time when interest in DNA and ancestry is exploding Frances Latchford questions the idea that knowing one's bio genealogy is integral to personal identity or a sense of family and belonging Upending our established values and beliefs about what makes a family Steeped in Blood examines the social and political devaluation of adoptive ties It takes readers on an intellectual journey through accepted wisdom about adoption twins kinship and incest and challenges our naturalistic and individualistic assumptions about identity and the biological ties that bind us sometimes violently to our families Latchford exposes how our desire for bio genealogical knowledge understood as it is by family and adoption experts pathologizes adoptees by posing the biological tie as a necessary condition for normal identity formation Rejecting the idea that a love of the self same is fundamental to family bonds her book is a reaction to the wounds families suffer whenever they dare to revel in their difference A rejoinder to rhetoric that defines adoptees adoptive kin and their family intimacies as inferior and inauthentic Steeped in Blood's view through the lens of critical adoption studies decentres our cultural obsession with the biological family imaginary and makes real the possibility of being family in the absence of blood Evolution of Morals Carlos Stegmann, 2021-06-02 Carlos Stegmann is a civil engineer whose disposition always led

The Public Family David Herring, 2010-11-23 Those concerned with investigating the political functions of the family far too often identify only one the production of good democratic citizens As a result public discussion of family law and policy has been confined to a narrow continuum that ignores the family's other often subversive political functions In *The Public Family* David Herring's goal is to create a new rhetoric that moves beyond the stalemate that often results from the war between advocates of parental rights and those of children's rights This rhetoric of associational respect allows him to constructively address the role of rights and the limits of individualism in political and legal theory While acknowledging the family's importance in facilitating state functioning and power in a large pluralistic democracy the aforementioned production of good citizens Herring fully explores the ways in which the family produces diversity and promotes tolerance Unlike other works on the subject which view the differences between individuals as constituting the central challenge for American society Herring focuses on the importance of such differences In doing so he enriches and enlivens the often divisive public discussion of family law and policy

Lieberman, 2016-01-26 Do judges decisions depend on how long it is since they ate their lunch Is the best place for a woman to seduce a man on a rickety bridge Does free will really exist This book explores how our genes and experiences determine our behaviour as well as discussing the implications determinism may have on personal responsibility and morality **Teen Spirit** Paul Howe, 2020-11-15 Teen Spirit offers a novel and provocative perspective on how we came to be living in an age of political immaturity and social turmoil Award winning author Paul Howe argues it s because a teenage mentality has slowly gripped the adult world Howe contends that many features of how we live today some regrettable others beneficial can be traced to the emergence of a more defined adolescent stage of life in the early twentieth century when young people started spending their formative developmental years with peers particularly in formal school settings He shows how adolescent qualities have slowly seeped upward where they have gradually reshaped the norms and habits of adulthood The effects over the long haul Howe contends have been profound in both the private realm and in the public arena of political economic and social interaction Our teenage traits remain part of us as we move into adulthood so much so that some now need instruction manuals for adulting Teen Spirit challenges our assumptions about the boundaries between adolescence and adulthood Yet despite a cultural system that seems to be built on the ethos of Generation Me it s not all bad In fact there has been an equally impressive rise in creativity diversity and tolerance within society all traits stemming from core components of the adolescent character Howe s bold and suggestive approach to analyzing the teen in all of us helps make sense of the impulsivity driving society and encourages us to think anew about civic reengagement *Delinquency in Society* Regoli, John

D. Hewitt, Matt DeLisi, 2016-08-15 Delinquency in Society Tenth Edition provides a comprehensive and systematic overview of juvenile delinquency criminal behavior and status offending youths *The Genius in All of Us* David Shenk, 2011-03-08

Fresh insights into the nature of exceptional performance A deeply interesting and important book New York Times Book Review that offers a revolutionary and life changing message on the new science of human potential Is true greatness obtainable from everyday means and everyday genes Conventional wisdom says no that a lucky few are simply born with certain gifts Now you can forget everything you think you know about genes talent and intelligence and take a look at the amazing new evidence Here interweaving cutting edge research from numerous scientific fields David Shenk offers a new view of human potential giving readers more of a sense of ownership over their accomplishments and freeing parents from the bonds of genetic determinism As Shenk points out our genes are not a blueprint that dictate individual destinies Rather we are all the product of interplay between genes and outside stimuli a dynamic that we can influence It is a revolutionary and life changing message **Why Are You Still Sending Your Kids to School?** Blake Boles, 2020-05-19 For some kids school offers a positive and engaging experience For others it is a boring stressful and frustrating waste of time If your child is in the second category why keep tormenting them Instead why not help them find an educational environment where they feel genuinely motivated excited and empowered In this eye opening book Blake Boles makes the case for leaving conventional school and taking one of the many alternative paths through K 12 that exist today He addresses parents major concerns about unconventional education Can my kids still go to college Will they still be employable How will they learn to work hard while highlighting the hidden benefits of self directed learning such as improved parent child relationships a more balanced decision making process regarding college and a heightened sense of autonomy and connection Drawing upon 15 years of work as a mentor and guide for adolescents in alternative and experiential learning environments as well as his own unconventional life path Boles weaves together narrative theory and research to build a powerful argument for granting children unusual levels of freedom and responsibility **Toward a Humanist Justice** Debra Satz, Rob Reich, 2009-06-15

The late Susan Moller Okin was a leading political theorist whose scholarship integrated political philosophy and issues of gender the family and culture Okin argued that liberalism properly understood as a theory opposed to social hierarchies and supportive of individual freedom and equality provided the tools for criticizing the substantial and systematic inequalities between men and women Her thought was deeply informed by a feminist view that theories of justice must apply equally to women as men and she was deeply engaged in showing how many past and present political theories failed to do this She sought to rehabilitate political theories particularly that of liberal egalitarianism in such a way as to accommodate the equality of the sexes and with an eye toward improving the condition of women and families in a world of massive gender inequalities In her lifetime Okin was widely respected as a scholar whose engagement went well beyond the world of theory and her premature death in 2004 was considered by many a major blow to progressive political thought and women s

interests around the world This volume stems from a conference on Okin and contains articles by some of the top feminist and political philosophers working today They are organized around a set of themes central to Okin s work namely liberal theory gender and the family feminist and cultural differences and global justice Included are major figures such as Joshua Cohen David Miller Cass Sunstein Alison Jaggar and Iris Marion Young among others Their aim is not to celebrate Okin s work but to constructively engage with it and further its goals
