Understanding Consumers of Food Products Lynn Frewer, Hans Van Trijp, 2006-12-22 In order for food businesses scientists and policy makers to develop successful products services and policies it is essential that they understand food consumers and how they decide which products to buy Food consumer behaviour is the result of various factors including the motivations of different consumers the attributes of specific foods and the environment in which food choices occur Recognising diversity between individual consumers different stages of life and different cultural contexts is increasingly important as markets become increasingly diverse and international The book begins with a comprehensive introduction and analysis of the key drivers of consumer food choices such as the environment and sensory product features Part two examines the role of consumers attitudes towards quality and marketing and their views on food preparation and technology Part three covers cultural and individual differences in food choice as well as addressing potentially influential factors such as age and gender Important topics such as public health and methods to change consumers preferences for unhealthy foods are discussed in part four The final section concludes with advice on developing coherent safety policies and the consumers responsibility for food production and consumption Understanding consumers of food products is a standard reference for all those in the food industry concerned with product development and regulation Develop an understanding of buyer behaviour to assist developing successful products Recognise the diversity between consumers and learn how to cater for their needs Covers cultural and individual differences in food choice

Food, the Body and the Self Deborah Lupton, 1996-03-11 In this wide ranging and thought provoking analysis of the sociocultural and personal meanings of food and eating Deborah Lupton explores the relationship between food and embodiment the emotions and subjectivity She includes discussion of the intertwining of food meaning and culture in the context of childhood and the family as well as the gendered social construction of foodstuffs food tastes dislikes and preferences the dining out experience spirituality and the civilized body She draws on diverse sources including representations of food and eating in film literature advertising gourmet magazines news reports and public health literature and her own empirical research into people s preferences memories experiences and emotional responses to food Food the Body and the Self s strong interdisciplinary approach incorporates discussion of the work of a number of major contemporary social and cultural theorists including Bourdieu Elias Kristeva Grosz Falk and Foucault

Everyday Eating in Denmark, Finland, Norway and Sweden Jukka Gronow, Lotte Holm, 2019-04-18 The chapters in this volume concentrate on the mundane and ordinary eating practices of the everyday showing how these are linked to change in modern society The contributors present a collection of systematic empirical results from a unique study based on representative samples of four Nordic populations Denmark Finland Norway and Sweden conducted at two time points 15 years apart The results of this unprecedented longitudinal survey leads the contributors to question many commonly held beliefs about the presumed and feared collapse of the traditional eating habits family meals and regular meal patterns As the social organization of eating is in many ways related to developments in other social institutions such as family education and

work chapters provide interesting insights into contemporary society with key topics selected for scrutiny including gender food types diet and health and cooking practices Additionally the chapters highlight changes in the gendering of food practices and signs of increasing informality around meals

The Body in Culture, Technology and Society Chris Shilling, 2005

Once in a while a manuscript stops you in your tracks What we are offered here is no recovering of old ground but a step change in perspectives on body matters that is both innovative and of fundamental importance to anyone working on this sociological terrain This text is groundbreaking and simply has to be read *Acta Sociologica* This is Shilling at his creative best these are seminal observations of the classical theories drawn together as never before Moreover as a framework this monograph provides a genuinely new and fertile way of reconsidering not just classical sociology but contemporary forms as well Sport Education Society This is a comprehensive theoretically sophisticated and ambitious treatise on the body that draws from and applies both classical and contemporary sociological theory in a manner that is innovative and thought provoking This book is engaging and thought provoking but Shilling's greatest achievement is his ability to illustrate the importance and continued relevance of classical and contemporary sociological theory to real world concerns It is a book worthy of widespread attention It reinvigorated my interest in the sociological classics and contained countless nuggets of interesting information that led me to conclude that it would be a worthy book to recommend to a broad sociological audience

Teaching Sociology Shilling's book like his earlier *The Body and Social Theory* is crucial reading a further valuable contribution in a field where he has provided so much Theory Psychology This is an impressive book by one of the leading social theorists working in the field of body studies It provides a critical summation of theoretical and substantive work in the field to date while also presenting a powerful argument for a corporeal realism in which the body is both generative of the emergent properties of social structure and a location of their effects Its scope and originality make it a key point of reference for students and academics in body studies and in the social and cultural sciences more generally

Ian Burkitt Reader in Social Science University of Bradford Chris Shilling is as always a lucid guide through the dense thickets of the sociology of the body and his chapters on the fields of work sport eating music and technology brilliantly show how abstract theoretical debates relate to the real world of people's lives

Professor Stephen Mennell University College Dublin

What I find very useful and without any doubt valuable not only in Shilling's *The Body in Culture Technology and Society* but in his work in general is the breadth and profoundness of his discussion about the body the style Shilling maintains is crucial for further development of the sociology of the body as a discipline for it provides us with a rich intellectual environment about the body Sociology For any colleague wanting to have a clear idea of how studies of the body can be empirically grounded as well as theoretically rich Chris Shilling's *The Body in Culture Technology and Society* is the book to read To my mind it offers the best account thus far of not only how social action is embodied and must be recognised as such but also of how social structures condition and shape embodied subjects in a variety of social arenas This is wonderful insightful stuff

the ideas and intricate thoughts of a scholar such as Shilling who has been immersed in thinking about the complexities of the body in society as well as sociology for a number of years Sociology of Health and Illness This is a milestone in the sociology of the body The book offers the most comprehensive overview of the field to date and an innovative framework for the analysis of embodiment It is founded on a revised view of the relation of classical works to the body It argues that the body should be read as a multi dimensional medium for the constitution of society Upon this foundation the author constructs a series of analyses of the body and the economy culture sociality work sport music food and technology

Meals in Science and Practice H L Meiselman, 2009-03-26 The meal is the key eating occasion yet professionals and researchers frequently focus on single food products rather than the combinations of foods and the context in which they are consumed Research on meals is also carried out in a wide range of fields and the different disciplines do not always benefit from each others expertise This important collection presents contributions on meals from many perspectives using different methods and focusing on the different elements involved Two introductory chapters in part one summarise the key findings in Dimensions of the Meal the first book to bring an interdisciplinary perspective to meals and introduce the current publication by reviewing the key topics discussed in the following chapters Parts two to four then consider how meals are defined studied and taught Major considerations include eating socially and eating alone the influence of gender and the different situations of home restaurant and institutional settings Part five reviews meals worldwide with chapters on Brazilian Indian Chinese and Thai meals among others The final parts discuss meals from further perspectives including those of the chef product developer and meal setting designer With its distinguished editor and international team of contributors Meals in science and practice is an informative and diverse reference for both professionals and academic researchers interested in food from disciplines such as food product development food service nutrition dietetics sociology anthropology psychology public health medicine and marketing Summarises key findings in dimensions of the meal Considers how meals are defined studied and taught including eating alone and socially and the influence of gender Reviews the meaning of meals in different cultures

Marine Foods J. C. Somogyi, D. Hötzel, 1990-10-17 **The Sociology Of Taste** Jukka Gronow, 2002-01-04 The modern society of consumption is a society of fashion Fashion has extended its influence over various fields of social life and together with taste become central to our understanding of the inner dynamics of any modern society The Sociology of Taste looks at the role of taste or the aesthetic reflection in society at large and in modern society in particular Taking case studies from social life for example eating and food culture it illustrates the role of fashion in the formation of collective taste

The Political Economy of Diet, Health and Food Policy Ben Fine, 1998-10-01 The Political Economy of Diet and Health continues the exploration of food systems theory begun in the author s previous publications It presents a critical exposition of food systems theory and analyses the existing approaches to food consumption Subjects include resolving the diet paradox the impact of the EU the lack of policy in the UK

More on Mediterranean Diets Artemis P.

Simopoulos, Francesco Visioli, 2007 This book is an update of the previous volume on Mediterranean diets published in 2000 which provided extensive reviews of the various diets existing in the Mediterranean region Since then a number of studies have been published on the relationship between a Mediterranean type diet and chronic diseases However because the diet score used in those studies does not provide any information on the nutritional composition or quality of the diet this publication takes an entirely different approach Particular attention is given to the nutritional factors and their mechanisms in cardiovascular disease cancer metabolic syndrome and obesity and the results of decreasing the omega 6 omega 3 ratio and its anti inflammatory effects on several biomarkers are evaluated Moreover the effects of olive oil relative to its antioxidant properties and the anti inflammatory and anticarcinogenic aspects of melatonin from plants and fruits common in the Mediterranean region are discussed

BOOK JACKET **Food Allergy and Food Intolerance** J. C. Somogyi, H. R. Müller, T. Ockhuizen, 1991-07-08 Food Technology in the Year 2000 S. Lindroth, I. S. I. Rynänen, 1990-11-14 **Flavor**

Patrick Etiévant, Elisabeth Guichard, Christian Salles, Andree Voilley, 2016-05-27 Flavor From Food to Behaviors Wellbeing and Health is the first single volume resource focused on the different mechanisms of flavor perception from food ingestion to sensory image integration and the physiological effects that may explain food behaviors The information contained is highly multidisciplinary starting with chemistry and biochemistry and then continuing with psychology neurobiology and sociology The book gives coherence between results obtained in these fields to better explain how flavor compounds may modulate food intake and behavior When available physiological mechanisms and mathematical models are explained Since almost half a billion people suffer from obesity and food related chronic diseases in the world and since recent research has investigated the possible roles of pleasure linked to the palatability of food and eating pleasure on food intake food habits and energy regulation this book is a timely resource on the topic This book links these results in a logical story starting in the food and the food bolus and explaining how flavor compounds can reach different receptors contribute to the emergence of a sensory image and modulate other systems recognized as controlling food intake and food behavior The influence of age physiological disorders or social environments are included in this approach since these parameters are known to influence the impact of food flavor on human behavior Uniquely brings together multidisciplinary fields to explain in a narrative structure how flavor compounds may modulate food intake and behavior Includes discussions of chemistry and biochemistry psychology neurobiology and sociology Presents an extremely current view that offers a wide perspective on flavor an area of rapidly expanding knowledge Edited by renowned experts in the field of flavor perception
