Patchwork Nation James G. Gimpel,Jason E. Schuknecht,2009-10-27 Though local and regional politics are often ignored in political behavior literature analyses of these areas are fundamental to understanding the scope of political change in the regimes experiencing realignment and for which there are no survey data With the unprecedented population movement and socioeconomic mobility of the twentieth century political support has been reshuffled in many parts of the country Yet at the dawn of the new century these local and regional movements are rather poorly understood Patchwork Nation examines the forces that account for pervasive political regionalism and the geographic shifts that continue to alter the nation s political landscape The authors focus on twelve states in particular identifying regional differences in support for

candidates or political parties and find that the electoral foundations for political regionalism differ from state to state. Thus regionalism within states is not easily reducible to one or two population characteristics that are common to all states. The authors demonstrate the importance of a political geographic approach to American political behavior and challenge the tendency in the scholarly literature to ignore the impact and significance of local contexts. James G Gimpel is Professor of Government and Politics, University of Maryland, College Park. Jason E Schuknecht is a Research Analyst at Westat Inc in Rockville, Maryland.

The Patchwork City Marco Z. Garrido, 2019-08-05

In contemporary Manila, slums and squatter settlements are peppered throughout the city, often pushing right up against the walled enclaves of the privileged, creating the complex geopolitical pattern of Manila. Marco Z. Garrido's *Patchwork City* documents the fragmentation of Manila into a range of spaces defined by class, particularly slums and upper and middle class enclaves. He then looks beyond urban fragmentation to delineate its effects on class relations and politics, arguing that the proliferation of these slums and enclaves and their subsequent proximity have intensified class relations. For enclave residents, the proximity of slums is a source of insecurity, compelling them to impose spatial boundaries on slum residents. For slum residents, the regular imposition of these boundaries creates a pervasive sense of discrimination. Class boundaries then sharpen along the housing divide, and the urban poor and middle class emerge not as labor and capital but as squatters and villagers. Manila's name for subdivision residents, Garrido further examines the politicization of this divide with the case of the populist

president Joseph Estrada finding the two sides drawn into contention over not just the right to the city but the nature of democracy itself The Patchwork City illuminates how segregation class relations and democracy are all intensely connected It makes clear ultimately that class as a social structure is as indispensable to the study of Manila and of many other cities of the Global South as race is to the study of American cities
