Palace Architecture:

The Architecture of Late Assyrian Royal Palaces David Kertai, 2015 The Late Assyrian Empire c 900 612 BCE was the first state to rule over the major centres of the Middle East and the Late Assyrian court inhabited some of the most monumental palaces of its time The Architecture of Late Assyrian Royal Palaces is the first volume to provide an in depth analysis of Late Assyrian palatial architecture offering a general introduction to all key royal palaces in the major centres of the empire Assur Kaluhu Dur Sharruken and Nineveh Where previous research has often focused on the duality between public and private realms this volume redefines the cultural principles governing these palaces and proposes a new historical framework analysing the spatial organization of the palace community which placed the king front and centre It brings together the architecture of such palaces as currently understood within the broader framework of textual and art historical sources and argues that architectural changes were guided by a need to accommodate ever larger groups as the empire grew in size

The Architecture of the Italian Renaissance Jacob Burckhardt, 1987-07-15 There may not be any book on architecture so delightful to dip into one wishes there were a pocket edition to take on an Italian vacation not only for its information and vision but for such pleasant reminders as that the citizens of Treviso carried Tullio Lombardo's friezes through the town in triumph before they were attached to a building D J R Bruckner New York Times Book Review

Dahomey's Royal Architecture Lynne Ellsworth Larsen, 2023-06-23 Dahomey's Royal Architecture examines the West African kingdom of Dahomey located in present day Republic of Benin The book explores the Royal Palace of Dahomey's relationship to the religious cultural and national identity

of the pre colonial Kingdom of Dahomey c 1625 1892 colonial Dahomey 1892 1960 and post colonial Benin 1960 present The Royal Palace of Dahomey covers more than 108 acres and was surrounded by a wall over two miles long When the French colonial army arrived in Abomey in 1892 the ruling king set fire to the palace to keep it from falling into enemy hands Though much of the palace structure was subsequently left to ruin a portion of it was restored from which the French ruled for a short period In 1945 the colonial administration transformed part of the palace into a museum and in 1985 the entire palace was added to UNESCO s World Heritage list This book documents the palace s physical transformations in relation to its changing purposes and explores how the space maintained religious significance despite change The palace s construction destruction and restorations demonstrate how architecture can be manipulated and transformed according to the agendas of governments or according to the religious and cultural needs of a populace The palace functions as a historic record by discussing aspects of documentation revision language and interpretation Covering almost four centuries of Dahomey s history this book will be of interest to researchers and students of African art and architecture religious studies west African history and post colonial studies *The Bishop's Palace* Maureen C. Miller, 2018-09-05 This lavishly illustrated book looks at the art and architecture of episcopal palaces as expressions of power and ideology Tracing the history of the bishop s residence in the urban centers of northern Italy over the Middle Ages Maureen C Miller asks why this once rudimentary and highly fortified structure called a domus became a complex and elegant palace palatium by the late twelfth century Miller argues that the change reflects both the emergence of a distinct clerical culture and the attempts of bishops to maintain authority in public life She relates both to the Gregorian reform movement which set new standards for clerical deportment and at the same time undercut episcopal claims to secular power As bishops lost temporal authority in their cities to emerging communal governments they compensated architecturally and competed with the communes for visual and spatial dominance in the urban center This rivalry left indelible marks on the layout and character of Italian cities Moreover Miller contends this struggle for power had highly significant but mixed results for western Christianity On the one hand as bishops lost direct governing authority in their cities they devised ways to retain status influence and power through cultural practices This response to loss was highly creative On the other hand their loss of secular control led bishops to emphasize their spiritual powers and to use them to obtain temporal ends The coercive use of spiritual authority contributed to the emergence of a persecuting society in the central Middle Ages **New Glass Architecture** Brent Richards, Gilbert Dennis, 2006-01-01 A timely look at the ways in which glass is utilized in some of today s most beautiful and experimental building designs For centuries glass has provoked fascination with its properties as a versatile material that permits light to enter buildings in spectacular ways Much of modern architecture has been conceived by using glass to create increasingly minimal structures to promote the notion of lightweight construction solutions and to allow maximum daylight into buildings New Glass Architecture showcases the changing ways that aesthetics and methods for using glass have been developing

since the 1990s The book begins with an introduction that traces the history of key moments in glass architecture from the stained glass windows of Chartres Cathedral to the Crystal Palace of 1851 and early constructions by John Soane Bruno Taut Le Corbusier and Mies van der Rohe Author Brent Richards explains the importance of glass artists in the second half of the 20th century and describes developments in glass technology over the last twenty years Beautifully illustrated with newly commissioned photographs by Dennis Gilbert the book features twenty five case studies of recent glass constructions from around the world by such leading architects as Foster and Partners Frank Gehry Herzog de Meuron Steven Holl Toyo Ito Associates Jean Nouvel Raphael Violy and Peter Zumthor Each building is illustrated in full color and accompanied by detailed drawings New Glass Architecture features these buildings and more Chapel of Ignatius Seattle Cond Nast Caf New York DZ Bank Berlin Kimmel Center for the Performing Arts Philadelphia Kunsthau Graz Austria Laban Dance Centre London Torre Agbar Barcelona

Architecture and Authority in Japan William H. Coaldrake, 2002-03-11 First published in 1996 Architecture is one of the most inspired manifestations of Japanese civilization a pillar of both traditional society and the modern state The rugged walls of Himeji Castle the pristine perfection of the Ise Shrine and the soaring skyscrapers of modern Tokyo are all examples of consummate artistic inspiration harnessed to building technology in the service of religion or the state These buildings offer a unique opportunity to identify the ideas and institutions of authority both religious and secular embodied in built form William Coaldrake argues that there is a symbiotic relationship between architecture and authority throughout Japanese history Examination of Nara and Heian palaces Kamakura temples and Momoyama castles reveals the changing countenance of aristocratic and warrior power The study also shows how some buildings helped to mould power relations by creating a physical presence to intimidate and subordinate those under imperial and shogunal rule such as the Palace of Nijo Castle More recently Western architectural styles have been used to restructure the way Japan presents itself to the outside world Relating buildings to the political ambitions and religious beliefs of the age this book makes a significant contribution to Japanese studies By examining architecture as an expression of authority William Coaldrake highlights many defining moments in Japanese history opening up new avenues for study on both traditional and contemporary Japan

The Architecture of Rome Ulrich Fürst, 1998 Architects and artists have always acknowledged over the centuries that Rome is rightly called the eternal city Rome is eternal above all because it was always young always

in its prime Here the buildings that defined the West appeared over more than 2000 years here the history of European architecture was written The foundations were laid even in ancient Roman times when the first attempts were made to design interiors and thus make space open to experience as something physical And at that time the Roman architects also started to develop building types that are still valid today thus creating the cornerstone of later Western architecture In it Rome's primacy remained unbroken whether it was with old St Peter's as the first medieval basilica or new St Peter's as the building in which Bramante and Michelangelo developed the High Renaissance or with works by Bernini and Borromini whose rich and lucid spatial forms were to shape Baroque as far as Vienna Bohemia and Lower Franconia and also with Modern buildings of which there are many unexpected pearls to be found in Rome All this is comprehensible only if it is presented historically i.e. in chronological sequence and so the guide has not been arranged topographically as usual but chronologically This means that one is not led in random sequence from a Baroque building to an ancient or a modern one but the historical development is followed successively Every epoch is preceded by an introduction that identifies its key features This produces a continuous lavishly illustrated history of the architecture of Rome and thus at the same time of the whole of the West Practical handling is guaranteed by an alphabetical index and detailed maps whose information does not just immediately illustrate the historical picture but also makes it possible to choose a personal route through history
