Palaeolithic Quarrying Sites In Upper Middle Egypt Egyptian Prehistory Monographs 4:

Palaeolithic Quarrying Sites in Upper and Middle Egypt P. M. Vermeersch, 2002 This book is an edited publication of several excavation campaigns in Egypt oriented towards the understanding of the chert extraction techniques employed by Middle and early Upper Palaeolithic humans in the lower desert of the Egyptian Nile Valley between Tahta and Qena

Chert Quarrying, Lithic Technology and a Modern Human Burial at the Palaeolithic Site of Taramsa 1, Upper Egypt Philip van Peer, P. M. Vermeersch, Etienne Paulissen, 2010 Egyptian Prehistory Monographs 5 This book presents the comprehensive report of the excavations of the Belgian Middle Egypt Prehistoric Project at the site of Taramsa 1 near Qena in Upper Egypt Human groups exploited chert cobbles at this locale throughout the entire Middle Stone Age *Integrating Paleoclimate, Stratigraphy, Sedimentology & Paleontology in Human Evolution and Dispersal Studies - from Early Hominins to the Holocene* Verena E. Foerster, Christian Zeeden, Annett Junginger, 2022-05-25 *The History of the Peoples of the Eastern Desert* Hans Barnard, Kim Duistermaat, 2012-12-31

The last quarter century has seen extensive research on the ports of the Red Sea coast of Egypt the road systems connecting them to the Nile and the mines and quarries in the region Missing has been a systematic study of the peoples of the Eastern Desert the area between the Red Sea and the Nile Valley in whose territories these ports roads mines and quarries were located The historical overview of the Eastern Desert in the shape of a roughly chronological narrative presented in this book fills that gap The multidisciplinary perspective focuses on the long term history of the region The extensive range of topics addressed includes specific historical periods natural resources nomadic survival strategies ancient textual data and the interaction between Christian hermits and their neighbors The breadth of perspective does not sacrifice depth for all authors deal in some detail with the specifics of their subject matter As a whole this collection provides an outline of the history and sociology of the Eastern Desert unparalleled in any language for its comprehensiveness As such it will be the essential starting point for future research on the Eastern Desert Includes a CD of eleven audio files with music of the Ababda Nomads and six short videos of Ababda culture The Evolution of Paleolithic Technologies Steven L. Kuhn, 2020-09-14 The Evolution of Paleolithic Technologies provides a novel perspective on long term trajectories of evolutionary change in Paleolithic tools and tool makers Members of the human lineage have been producing stone tools for more than 3 million years These artefacts provide key evidence for important evolutionary developments in hominin behaviour and cognition Avoiding conventional approaches based on progressive stages of development this book instead examines global trends in six separate dimensions of technological behaviour between 2.6 million and 10 000 years ago Combining these independent trends results in both a broader and a more finely punctuated perspective on key intervals of change in hominin behaviour To draw this picture together the concluding section explores behavioural cognitive and demographic implications of developments in material culture and technological procedures at seven key intervals during the Pleistocene Researchers interested in Paleolithic archaeology will find this book invaluable It will also be of interest to

archaeologists researching stone tool technology and to students of human evolution and behavioural change in prehistory

Egyptian Archaeology Willeke Wendrich, 2011-09-26 Egyptian Archaeology explores ancient Egypt using a uniquely archaeological approach drawing on original research to both synthesize and challenge existing scholarship Written by leading Egyptologists based on original research and fieldwork Illustrates how practical research is a vital component of any theory based discussion about the ancient world Examines the cultural and historical processes of ancient Egypt from a global perspective Visually engaging with over 80 illustrations Chapters explore fundamental issues and themes but focus on specific periods and key archaeological sites

From Lake to Sand. The Archaeology of Farafrā Oasis Western desert, Egypt Barbara E. Barich, Giulio Lucarini, Mohamed A. Hamdan, Fekri A. Hassan, 2014-12-11 The volume presents all the data collected during the cycle of research conducted by the Italian Archaeological Mission in the Farafrā Oasis between 1990 and 2005 The 29 multidisciplinary essays contained in this book provide a detailed picture of the population of the Farafrā Oasis hitherto one of the least well known within the Western Desert Farafrā became particularly important during the middle Holocene the period when climate conditions were most favourable with later brief humid episodes even in the historic periods The results of the long term research cycle presented here combined with data from the survey of the whole Wadi el Obeiyid still in progress allow the authors to identify changes in the peopling of the oasis and to define various occupation phases The new chronology for the Wadi el Obeiyid is one of the main achievements of the book and as demonstrated in the final chapter is in complete agreement with the main cultural units of other territories in the Western Desert On this chronological basis the contacts between the latter and the populations established on the Nile are brought into sharper focus The importance of the archaeological documents discovered at Farafrā and at the same time their fragility due to the deterioration of the physical environment and the uncontrolled human activities make us fear for their conservation We hope that this book with its complete documentation of the precious nature of the Farafrā Oasis landscape and its archaeological heritage may help to promote more effective policies for its safeguard

The Palaeolithic Origins of Human Burial Paul Pettitt, 2010-12-20 Humans are unique in that they expend considerable effort and ingenuity in disposing of the dead Some of the recognisable ways we do this are visible in the Palaeolithic archaeology of the Ice Age The Palaeolithic Origins of Human Burial takes a novel approach to the long term development of human mortuary activity the various ways we deal with the dead and with dead bodies It is the first comprehensive survey of Palaeolithic mortuary activity in the English language Observations in the modern world as to how chimpanzees behave towards their dead allow us to identify core areas of behaviour towards the dead that probably have very deep evolutionary antiquity From that point the palaeontological and archaeological records of the Pliocene and Pleistocene are surveyed The core chapters of the book survey the mortuary activities of early hominins archaic members of the genus *Homo* early *Homo sapiens* the Neanderthals the Early and Mid Upper Palaeolithic and the Late Upper Palaeolithic world Burial is a striking component of Palaeolithic

mortuary activity although existing examples are odd and this probably does not reflect what modern societies believe burial to be and modern ways of thinking of the dead probably arose only at the very end of the Pleistocene When did symbolic aspects of mortuary ritual evolve When did the dead themselves become symbols In discussing such questions The Palaeolithic Origins of Human Burial offers an engaging contribution to the debate on modern human origins It is illustrated throughout includes up to date examples from the Lower to Late Upper Palaeolithic including information hitherto unpublished *Images, Perceptions and Productions in and of Antiquity* Maria Helena Trindade Lopes, André Patrício, 2023-01-06 This book provides access to new and exclusive research in several Antiquity and Antiquity related fields and subjects Revolving around four general subjects Ancient Egypt the Ancient Near and Middle East the Classical World and the Reception of Antiquity it will provide access to new works spanning from archaeology literature art reception studies among others allowing the reader to gain insights into some of the most current subjects of investigation in modern academia

Africa from MIS 6-2 Sacha C. Jones, Brian A. Stewart, 2016-03-04 Bringing together archaeological paleoenvironmental paleontological and genetic data this book makes a first attempt to reconstruct African population histories from out species evolution to the Holocene Africa during Marine Isotope Stages MIS 6 to 2 190 12 000 years ago witnessed the biological development and behavioral florescence of our species Modern human population dynamics which involved multiple population expansions dispersals contractions and extinctions played a central role in our species evolutionary trajectory So far the demographic processes modern human population sizes distributions and movements that occurred within Africa during this critical period have been consistently under addressed The authors of this volume aim at 1 examining the impact of this glacial interglacial glacial cycle on human group sizes movements and distributions throughout Africa 2 investigating the macro and micro evolutionary processes underpinning our species anatomical and behavioral evolution and 3 setting an agenda whereby Africa can benefit from and eventually contribute to the increasingly sophisticated theoretical and methodological palaeodemographic frameworks developed on other continents
