Multivariate Statistical Methods in Physical Anthropology G.N. van Vark, W.W. Howells, 2012-12-06 Physical anthropologists like other research workers are recognizing that the standard multivariate statistical techniques of recent decades are in need of refinement and greater precision. Increasingly it is felt that more sophisticated methods are called for specifically designed for the materials and problems at issue. To this end the editors were asked by organizers of the First Intercongress of the International Union of Anthropological and Ethnological Sciences to develop a symposium on this general subject. With the title of this book the symposium was held in Amsterdam on April 23-25, 1981. Invited were mathematical statisticians who were known to have an acquaintance with and interest in anthropological problems together with anthropologists and human geneticists who consider multivariate methodology essential for their research. This volume constitutes an updated and revised selection from among the papers presented together with a few supplementary papers by authors who were not present but whose work fills out the intended coverage and makes the volume more complete with respect to the state of affairs in the field. The papers are devoted both to new methodology and to its practical application. Mathematical statisticians may wish to know more about the biological nature and the kinds of materials and samples on which mathematical thinking can be exercised. Anthropologists as practitioners may not be fully aware of the possibilities and limitations in particular mathematical models and methods. Our purpose has been to bring the two groups together for personal discussions across disciplinary lines as well as within disciplines.

New Interpretations of Ape and Human Ancestry Russell Ciochon, 2012-12-06

Bioarchaeology of Southeast Asia Marc Oxenham, Nancy Tayles, 2006-04-20 Bioarchaeology of Southeast Asia focuses uniquely on the physical remains of the prehistoric peoples of this region.

The Evolving Female Mary Ellen Morbeck, Alison Galloway, Adrienne Zihlman, 1996-12-09 A human female is born, lives her life and dies within the space of a few decades but the shape of her life has been strongly influenced by 50 million years of primate evolution and more than 100 million years of mammalian evolution. How the individual female plays out the stages of her life from infancy through the reproductive period to old age and how these stages have been formed by a long evolutionary process is the theme of this collection. Written by leading scholars in fields ranging from evolutionary biology to cultural anthropology, these essays together examine what it means to be female, integrating the life histories of marine mammals, monkeys, apes and humans. The result is a fascinating inquiry into the similarities among the ways females of different species balance the need for survival with their role in reproduction and mothering. The Evolving Female offers an outlook integrating life history with an intimate examination of female life paths. Behavior, anatomy and physiology, growth and development, cultural identity of women: the individual and the society are among the topics investigated. In addition to the editors, the contributors are Linda Fedigan, Kathryn Ono, Joanne Reiter, Barbara Smuts, Mariko Hiraiwa, Hasegawa, Mary

McDonald Pavelka Caroline Pond Robin McFarland Silvana Borgognini Tarli and Elena Repetto Gilda Morelli Patricia Draper Catherine Panter Brick Virginia J Vitzthum Alison Jolly and Beverly McLeod **The Archetype of the Ape-Man** Dawn Prince-Hughes,2001 This interdisciplinary dissertation explores the archetype of the ape man from a phenomenological perspective with its genesis and present continuation dependent on extant and accreted human behavior and morphology In order to ascertain the embedded components of the ape man archetype an identikit ape man as a discrete phenomenon is derived after the examination of cross cultural examples world wide Next this discrete phenomenon and its constituent parts are compared both to extant ape species behavior and morphology and the paleoanthropological evidence to determine in what ways if any components of each are reflected accurately in the phenomenon Utilizing concepts in the fields of cultural and physical anthropology ethology psychology and philosophy this dissertation asserts as its conclusion that the archetype of the ape man is a result of accreted and enacted collective memories and reflects an important phenomenon integral to human thought and form The Human Legacy Leon Festinger,1983-07-18 For more than a million years man s utter dependence on technology has been producing a host of intricate problems For example we steadily reduce the need for human labor while finding ways to increase life expectancy We mass produce the automobile without grasping the harsh effects it leaves on the environment The Human Legacy concerns the evolution and development of man physically socially psychologically into the latest version of the species we see around us today The author paints an intriguing picture of man living in complex societies and trying to solve the unanticipated consequences of action Understanding Human Evolution Jeffrey K. McKee,2015-10-16 For the one term course in human evolution paleoanthropology or fossil hominins taught at the junior senior level in departments of anthropology or biology This new edition provides a comprehensive overview to the field of paleoanthropology the study of human evolution by analyzing fossil remains It includes the latest fossil finds attempts to place humans into the context of geological and biological change on the planet and presents current controversies in an even handed manner Paleolithic Politics Barry Cooper,2020-04-30 Using his background in political theory and philosophical anthropology Barry Cooper is the first political scientist to propose new interpretations of some of the most famous extant Paleolithic art and artifacts in Paleolithic Politics This book is inspired by Eric Voegelin one of the major political scientists of the last century who developed an interest in the very early symbolism associated with the caves and rock shelters of the Upper Paleolithic but never finished his analysis Cooper who has written extensively on Voegelin s theories takes up the enterprise of applying Voegelin s approach to an analysis of portable and cave art He specifically applies Voegelin s philosophy of consciousness his concept of the compactness and differentiation of consciousness his argument regarding the experience and symbolizations of reality and his notion of the primary experience of the cosmos to images previously regarded as pedestrian Cooper demonstrates the political significance of the earliest expressions of human existence and is among the first to argue that political life began not with the Greeks but 25 000 years before them
