Paleolithic Pebble Industries In Europe:

Lithic Materials and Paleolithic Societies Brian Adams, Brooke Blades, 2009-05-06 *Lithic Materials and Paleolithic Societies* provides a detailed examination of the Paleolithic procurement and utilization of the most durable material in the worldwide archaeological record. The volume addresses sites ranging in age from some of the earliest hominin occupations in eastern and southern Africa to late Pleistocene and post Pleistocene occupations in North America and Australia. The Early Paleolithic in India and the Near East, the Middle Paleolithic in Europe, and the Late Paleolithic in Europe and eastern Asia are also considered. The authors include established researchers who provide important synthetic statements updated with new information. Recent data are reported often by younger scholars who are becoming respected members of the international research community. The authors represent research traditions from nine countries and therefore provide insight into the scholarly present as well as the Paleolithic past. Attempts are frequently made to relate lithic procurement and utilization to the organization of societies and even broader concerns of hominin behaviour. The volume re-evaluates existing interpretations in some instances by updating previous work of the authors and offers provocative new interpretations that at times call into question some basic assumptions of the Paleolithic. This book will be invaluable reading for advanced students and researchers in the fields of palaeolithic archaeology, geoarchaeology, and anthropology.

Sourcebook of Paleolithic Transitions Marta Camps, Parth Chauhan, 2009-09-01 As the study of Palaeolithic technologies moves towards a more analytical approach, it is necessary to determine a consistent procedural framework. The contributions to this timely and comprehensive volume do just that. This volume incorporates a broad chronological and geographical range of Palaeolithic material from the Lower to Upper Palaeolithic. The focus of this volume is to provide an analysis of Palaeolithic technologies from a quantitative empirical perspective. As new techniques, particularly quantitative methods for analyzing Palaeolithic technologies, gain popularity, this work provides case studies, particularly showcasing these new techniques. Employing diverse case studies and utilizing multivariate approaches, morphometrics, model-based approaches, phylogenetics, cultural transmission studies, and experimentation, this volume provides insights from international contributors at the forefront of recent methodological advances. **Palaeolithic Pebble Industries in Europe** Luu Tran Tieu, 1991.

Wirtschaftsgeschichte Siedlung Einzelfund **Stone Tools and Fossil Bones** Manuel Domínguez-Rodrigo, 2012-03-26 The stone tools and fossil bones from the earliest archaeological sites in Africa have been used over the past fifty years to create models that interpret how early hominins lived, foraged, behaved, and communicated, and how early and modern humans evolved. In this book, an international team of archaeologists and primatologists examines early Stone Age tools and bones and uses scientific methods to test alternative hypotheses that explain the archaeological record. By focusing on both lithics and faunal records, this volume presents the most holistic view to date of the archaeology of human origins. **European Prehistory**, 1995. **Asian Paleoanthropology** Christopher J. Norton, David R. Braun, 2010-08-26 This volume brings together

a group of authors that address the question of the first out of Africa into Asia c 2 Ma The scope of the book is comprehensive as it covers almost every major region of Asia The primary goal of this volume is to provide an updated synthesis of the current state of the Asian paleoanthropological and paleoenvironmental records Papers include detailed studies of the theoretical constructs underlying the move out of Africa including detailed reconstructions of the paleoenvironment and possible migration routes Other papers detail the Plio Pleistocene archaeological and hominin fossil records of particular regions

Early Humans at the Gates of Europe David Lordkipanidze, Ofer Bar-Yosef, Marcel Otte, 2000 **Prehistoric Ukraine** Malcolm C. Lillie, Inna D. Potekhina, 2020-09-30 This volume covers the Prehistory of Ukraine from the Lower Palaeolithic through to the end of the Neolithic periods This is the first comprehensive synthesis of Ukrainian Prehistory from earliest times through until the Neolithic Period undertaken by researchers who are currently investigating the Prehistory of Ukraine At present there are no other English language books on this subject that provide a current synthesis for these periods The chapters in this volume provide up to date overviews of all aspects of prehistoric culture development in Ukraine and present details of the key sites and finds for the periods studied The book includes the most recent research from all areas of prehistory up to the Neolithic period and in addition areas such as recent radiocarbon dating and its implications for culture chronology are considered as is a consideration of aDNA and the new insights into culture history this area of research affords alongside recent macrofossil studies of plant use and anthropological and stable isotope studies of diet which all combine to allow greater insights into the nature of human subsistence and cultural developments across the Palaeolithic to Neolithic periods in Ukraine It is anticipated that this book will be an invaluable resource for students of prehistory throughout Europe in providing an English language text that is written by researchers who are active in their respective fields and who possess an intimate knowledge of Ukrainian prehistory

The Pleistocene Old World Olga Soffer, 2013-11-11 Regional approaches to past human adaptations have generated much new knowledge and understanding Researchers working on problems of adaptations in the Holocene from those of simple hunter gatherers to those of complex sociopolitical entities like the state have found this approach suitable for comprehension of both ecological and social aspects of human behavior This research focus has however until recently left virtually untouched a major spatial and temporal segment of prehistory the Old World during the Pleistocene Extant literature on this period by and large presents either detailed site specific accounts or offers continental or even global syntheses that tend to compile site specific information but do not integrate it into whole constructs of functioning sociocultural entities This volume presents our current state of knowledge about a variety of regional adaptations that characterized prehistoric groups in the Old World before 10 000 B P The authors of the chapters consider the behavior of humans rather than that of objects or features and present data and models for various aspects of past cultures and for culture change These presentations integrate findings and understandings derived from a number of related disciplines actively involved in researching the past Data and interpretations are offered on

a range of Old world regions during the Paleolithic including Africa Asia Australia and Europe and chronological coverage spans from the Early to Late Pleistocene **Encyclopedia of Human Evolution and Prehistory** Eric Delson, Ian Tattersall, John Van Couvering, Alison S. Brooks, 2004-11-23 Praise for the first edition The most up to date and wide ranging encyclopedia work on human evolution available American Reference Books Annual For student researcher and teacher the most complete source of basic information on the subject Nature A comprehensive and authoritative source filling a unique niche essential to academic libraries important for large public libraries Booklist RBB
