Sellin ,2014-10-24 This Special Publication contains 43 scientific studies presented at the 5th conference on Clays in natural and engineered barriers for radioactive waste confinement held in Montpellier France in 2012 The conference and this resulting volume cover all the aspects of clay characterization and behaviour considered at various temporal and spatial scales relevant to the confinement of radionuclides in clay from basic phenomenological process descriptions to the global understanding of performance and safety at repository and geological scales Special emphasis has been given to the modelling of processes occurring at the mineralogical level within the clay barriers The papers in this Special Publication consider research into argillaceous media under the following topic areas large scale geological characterization clay based concept large scale experiments hydrodynamical modelling geochemistry geomechanics mass transfer gas transfer mass transfer mechanisms The collection of different topics presented in this Special Publication demonstrates the diversity of geological repository research *The Publishers' Trade List Annual* ,1969 *Nuclear Science and Technology, a Selective Bibliography* U.S. Atomic Energy Commission,1958 *Linkages and Feedbacks in Orogenic Systems* Richard D. Law, J. Ryan Thigpen, Arthur J. Mersch, Harold Stowell,2017-09-11 Dedicated to Bob Hatcher this Memoir explores linkages between tectonic processes through a series of field numerical and laboratory based studies concentrating on feedback mechanisms within ancient and evolving orogens by which individual or linked tectonic processes may influence or predetermine the operation of other processes in space and time Case studies cover a wide range of ancient to modern orogens the Svecofennian of southern Finland the Gyeonggi Massif of Korea the Caledonides of northern Scotland the Variscan of the East European craton the Appalachians of the eastern United States the European Alps and Dinarides north Cascades of the northwestern United States and the Himalaya Emphasis is placed on integration between data sets developed from a wide range of analytical approaches including field mapping seismic reflection profiling strain analyses petrology isotopic dating and numerical modeling based studies of thermal evolution associated with tectonic processes such as thrust related burial and exhumation *Environmental Health Perspectives* ,2004 **El-Hi Textbooks & Serials in Print, 2000** ,2000 **Microtectonics** Cees W. Passchier, Rudolph A. J. Trouw,2005-08-31 High number of high quality line drawings and photographs not only support the text but also give readers valuable experience in interpreting what they observe in the field Newest developments in microtectonics have been included in all chapters so that all chapters have been revised and updated e.g. new information on brittle microstructures **Handbook of Metal-Microbe Interactions and Bioremediation** Surajit Das, Hirak Ranjan Dash,2017-04-07 Around the World metal pollution is a major problem Conventional practices of toxic

metal removal can be ineffective and or expensive delaying and exacerbating the crisis Those communities dealing with contamination must be aware of the fundamentals advances of microbe mediated metal removal practices because these methods can be easily used and require less remedial intervention This book describes innovations and efficient applications for metal bioremediation for environments polluted by metal contaminants **Conservation Paleobiology** Gregory P. Dietl, Karl W. Flessa, 2017-11-17 In conservation perhaps no better example exists of the past informing the present than the return of the California condor to the Vermilion Cliffs of Arizona Extinct in the region for nearly one hundred years condors were successfully reintroduced starting in the 1990s in an effort informed by the fossil record condor skeletal remains had been found in the area s late Pleistocene cave deposits The potential benefits of applying such data to conservation initiatives are unquestionably great yet integrating the relevant disciplines has proven challenging Conservation Paleobiology gathers a remarkable array of scientists from Jeremy B C Jackson to Geerat J Vermeij to provide an authoritative overview of how paleobiology can inform both the management of threatened species and larger conservation decisions Studying endangered species is difficult They are by definition rare some exist only in captivity and for those still in their native habitats any experimentation can potentially have a negative effect on survival Moreover a lack of long term data makes it challenging to anticipate biotic responses to environmental conditions that are outside of our immediate experience But in the fossil and pre-fossil records from natural accumulations such as reefs shell beds and caves to human made deposits like kitchen middens and archaeological sites enlightening parallels to the Anthropocene can be found that might serve as a primer for present day predicaments Offering both deep time and near time perspectives and exploring a range of ecological and evolutionary dynamics and taxa from terrestrial as well as aquatic habitats Conservation Paleobiology is a sterling demonstration of how the past can be used to manage for the future giving new hope for the creation and implementation of successful conservation programs *Anthropogenic Effects on the Microbial Communities of Terrestrial Ecosystems* Xingjia Xiang, Jianming Wang, Mark Radosevich, Yaping Lin, Wenchen Song, 2025-08-29 Microorganisms are important participants in supporting the functionality and diversity of terrestrial ecosystems The microbial community is a key component that determines the structure function and complex processes of terrestrial ecosystems The patterns and mechanisms of microbial community structure and function with respect to geographical scales and environmental changes have always been a focal and hot topic in environmental microbiology ecology and geography research However with the intensification of climate change and changes caused by other human activities the ability of terrestrial ecosystems to withstand disturbances and maintain their functionality is increasingly being put to the test The role and changes of terrestrial ecosystem microorganisms in addressing this issue have become a global focus and challenge for research *Science Citation Index*, 1995 Vols for 1964 have guides and journal lists *Current Book Review Citations*, 1983
