Naval Aviation News, 1984-09 *The U.S. Combat Aircraft Industry, 1909-2000* Mark A. Lorell, 2003-10-29 Drawing on primary and secondary sources on the aircraft industry this report provides a brief survey of industry structure innovation and competition in the U S fixed wing combat aircraft industry from its earliest days to the present It supports a much larger research effort examining the future of the structure innovation and competition of the U S military aircraft industrial base that responds to congressional concerns about that future *The Cutting Edge* Mark A. Lorell, Hugh P. Levaux, Elizabeth Giddens, Jennifer Gross, Erik Moller, 1998-10-20 The proposition that innovation is critical in the cost effective design and development of successful military aircraft is still subject to some debate RAND research indicates that innovation is promoted by intense competition among three or more industry competitors Given the critical policy importance of this issue in the current environment of drastic consolidation of the aerospace defense industry the authors here examine the history of the major prime contractors in developing jet fighters since World War II They make use of an extensive RAND database that includes nearly all jet fighters fighter attack aircraft and bombers developed and flown by U S industry since 1945 as well as all related prototypes modifications upgrades etc The report concludes that 1 experience matters because of the tendency to specialize and thus to develop system specific expertise 2 yet the most dramatic innovations and breakthroughs came from secondary or marginal players trying to compete with the industry leaders and 3 dedicated military R D conducted or directly funded by the U S government has been critical in the development of new higher performance fighters and bombers

Cinema of Simulation: Hyperreal Hollywood in the Long 1990s Randy Laist,2015-03-26 Hyperreality is an Alice in Wonderland dimension where copies have no originals simulation is more real than reality and living dreams undermine the

barriers between imagination and objective experience The most prominent philosopher of the hyperreal Jean Baudrillard formulated his concept of hyperreality throughout the 1980s but it was not until the 1990s that the end of the Cold War along with the proliferation of new reality bending technologies made hyperreality seem to come true In the lost decade between the fall of the Berlin Wall and 9 11 the nature of reality itself became a source of uncertainty a psychic condition that has been recognizably recorded by that seismograph of American consciousness Hollywood cinema The auteur cinema of the 1970s aimed for gritty realism and the most prominent feature of Reagan era cinema was its fantastic unrealism Clinton era cinema however is characterized by a prevailing mood of hyperrealism communicated in various ways by such benchmark films as JFK Pulp Fiction and The Matrix The hyperreal cinema of the 1990s conceives of the movie screen as neither a window on a preexisting social reality realism nor as a wormhole into a fantastic dream dimension escapism but as an arena in which images and reality exchange masks blend into one another and challenge the philosophical premises which differentiate them from one another Cinema of Simulation Hyperreal Hollywood in the Long 1990s provides a guided tour through the anxieties and fantasies reciprocally social and cinematic which characterize the surreal territory of the hyperreal
