Abstract. *Teaching profession is considered to be a social action that is set in the life-world, where intersubjective relations are demonstrated and must be valued by the teacher in any circumstance in which it acts. In an attempt to equalize educational opportunity for all learners, a deep insight into education of exceptional students is emphatically given due consideration. This study drew attention to the main idea of social phenomenology of Alfred Schutz and how it could be of assistance in providing a full integration of exceptional students in society. It presented the needs of implementing social action to different kinds of exceptionalities in special educational system from the perspective of social phenomenology of Alfred Schutz. By incorporating Schutz's conceptional theory of social action into special education, this paper recommended that the special education teachers should be more concerned on mutual understanding and accepting the subjects' psychological state of mind and other problems they encounter academically. They should value and apply the aspects accentuated by this theory within the educational framework.*

INTRODUCTION

In every classroom door lies a world of abilities and disabilities. Some students learn quite easily, while others require much assistance before, they learn. Some are well behaved while others are mischievous. Some friendly, while others are ill at ease with their pairs. In addition, students perform differently at different times in different circumstances and such variations contribute to the wonder of individuality. This implies that students are individuals with different personalities, tastes, skills, learning needs, learning abilities which also implies that they present different challenges to the teacher. Extending this means that all students especially those with special learning needs (exceptional individuals) deserve special care and special teaching. The only discipline that offers these special care and teaching is special education. Special education is specially designed to meet the individual needs of exceptional students. Such is the task of this paper. Hence, a dimensional approach in this study is featured from the angle of phenomenology.

Phenomenology is of great importance when it comes to life-world experiences. "It is the philosophical study of the structures of experience and consciousness; descriptive of the givens of immediate experience. By extension, it is an attempt to capture the individual's understanding, experience and conception (Agama, 2020)" of the life-world. It is acknowledged that the role being played by phenomenology in terms of understanding human behaviour helps a lot in fishing out the true meaning associated with personal activities within social context. Phenomenology has been of keen interest in understanding the experiential world on daily life along with social reality. It recognizes social reality as part of human activity, whereas social reality relies most

False Moves in Philosophy and Social Theory Patrick Murray, Jeanne Schuler, 2023-09-12 This book considers diverse philosophical topics unified by the identification of false moves commonly found in modern philosophy mainstream Anglo American philosophy and social theory The authors expose the sources of fundamental problems that recur in philosophy basic problems with what the authors call factoring philosophy Factoring philosophy fails to attend to the phenomenological task of determining when what is distinguishable is separable and when not Consequently factoring philosophy makes phenomenological mistakes false moves when it treats as separable what is only distinguishable Analytic philosophy is prone to false moves when it fails to recognize that phenomenology is the necessary complement to analysis There is nothing wrong with analysis we might as well give up thinking as give up analysis and nothing is wrong with the values prized by analytic philosophy As Hegel observed philosophizing requires above all that each thought should be grasped in its full precision and that nothing should remain vague and indeterminate Ultimately this book contends that false moves prevail in philosophical analysis and social theory when they neglect their phenomenological foundations
