Natural Philosophy Paul Thagard,2019-01-31 Paul Thagard uses new accounts of brain mechanisms and social interactions to forge theories of mind knowledge reality morality justice meaning and the arts *Natural Philosophy* brings new methods for analyzing concepts understanding values and achieving coherence It shows how to unify the humanities with the cognitive and social sciences How can people know what is real and strive to make the world better Philosophy is the attempt to answer general questions about the nature of knowledge reality and values *Natural Philosophy* pursues these questions by drawing heavily on the sciences and finds no room for supernatural entities such as souls gods and possible worlds It provides original accounts of the traditional branches of philosophy including epistemology metaphysics ethics and aesthetics Rather than reducing the humanities to the sciences this book displays fertile interconnections that show that philosophical questions and artistic practices can be much better understood by considering how human brains operate and interact in social contexts The sciences and the humanities are interdependent because both the natural and social sciences cannot avoid questions about methods and values that are primarily the province of philosophy This book belongs to a trio that includes *Brain Mind From Neurons to Consciousness and Creativity* and *Mind Society From Brains to Social Sciences and Professions* They can be read independently but together they make up a *Treatise on Mind and Society* that provides a unified and comprehensive treatment of the cognitive sciences social sciences professions and humanities **For the Love of Beauty** Arthur Pontynen,2017-07-05 For most of the last century the methodology of art history has followed a positivist approach emphasizing form and style fact and history as the means of studying works of art By contrast the philosophical pursuit of truth once central to the fine arts and humanities has largely been abandoned In *For The Love of Beauty* Arthur Pontynen offers a searching and ambitious critique of modern aesthetic practice that aims to restore the pursuit of the knowledge of reality Being to its rightful place Pontynen begins by addressing the question of why the pursuit of truth be it called Dao Dharma God Logos Ideal etc is no longer acceptable in academic circles even though it has been intrinsic to the

purpose of art at most times and in most cultures Lacking the pursuit of truth of some degree of knowledge of what is true and good the humanities necessarily lack intellectual and cultural grounding and purpose Fields of study such as philosophy music art and history are therefore trivialized and brutalized Pontynen s focus on the study of the visual arts details the how the denial of purpose and quality in modernist and postmodernist aesthetics has denied art any possibility of transcending entertainment therapy or propaganda In place of the established narratives Pontynen offers a counter narrative based on a cross cultural pursuit of the good the true and the beautiful He recognizes that substantively different cultural traditions exist and that the truth claims of each may be valid in whole or in part He shows how the history of art parallels the intellectual history of Western culture and how these parallels affect both aesthetics and ethics Pontynen engages with those elements of modernist and postmodernist thought that might be true His purpose is not simply to deny their validity but to engage a viewpoint that does not privilege the notion of a purposeless cosmos For the Love of Beauty will be of interest
