Pursuit Of National Interests Through:

Pursuing the National Interest Karl K. Schonberg, 2003-10-30 The history of twentieth century American foreign policy presents an indictment of classical and structural realism and systemic theories of international relations more generally Examining five crucial movements of transition in American foreign policy making before and after each of the world wars and the end of the Cold War Shonberg argues that the national interest resides mostly in the eye of the beholder and that the idiosyncratic perceptions beliefs and values of individuals are of vital importance in the policy process Thus America s recent experiences in global politics interpreted through the lens of national ideology has defined and created the ultimate shape of a new foreign policy

National Interests And Presidential Leadership Donald E. Nuechterlein, 2019-04-10 Many scholars have ignored the concept of national interest simply because no logical systematic means of dealing with this key aspect of international politics has been available A new approach to defining national interest forms the basis for this study of presidential decisions on U S involvement in foreign wars Professor Nuechterlein looks at various crisis situations to determine what defense economic world order and ideological interests are at stake he identifies sixteen cost risk and value factors that affect the U S view of which interest is most vital in a given situation In any dispute it is the interest that is considered vital too important to compromise that is the key element in crisis decisions Professor Nuechterlein uses his analytical framework to examine the ways Presidents Wilson Roosevelt Truman Johnson and Nixon perceived the national interest when making their decisions to begin or extend U S war involvement He assesses the value of National Security Council participation in the decision making process and presents case study analyses of three imminent U S foreign policy concerns Quebec s possible separation from Canada the Panama Canal Treaty and the potential for race war in South Africa with an epilogue on the challenges facing Carter The author suggests that the most important U S national interest in the future will be economic with energy conservation a top priority

The Fall and Rise of National Interest Serena Giusti, 2022-10-31 This book intends to make NI more accessible and viable especially as a critical device for better understanding contemporary politics The purpose is to refresh the debate on NI and to explore this fascinating concept appreciating its multifaceted and malleable nature Throughout time NI has been presented as an ambiguous but obstinate concept in politics political discourse and theoretical elaboration NI has constantly resurfaced and many designate themselves as its protectors Its increasing relevance pertinence and recurrence make it clear that it can no longer be ignored in political analysis

In the National Interest Benjamin Frankel, 1990 This reader contains a sample of the best essays published in the foreign policy quarterly The National Interest during its first four years The period covered by this volume was a critical one for American foreign policy It represented a recovery of confidence after the uncertainty and self laceration of the 1960s and 1970s But it was also a period when dramatic events in the communist world raised fundamental questions about the ending of the Cold War and about prevailing American foreign policy The essays in this volume examine the basic

and enduring questions of international politics and the national security of the United States These and related issues are discussed in the reader by leading American policymakers academics and commentators Co published with The National Interest *The National Interest in International Relations Theory* S. Burchill, 2005-05-11 This is the first systematic and critical analysis of the concept of national interest from the perspective of contemporary theories of International Relations including realist Marxist anarchist liberal English School and constructivist perspectives Scott Burchill explains that although commonly used in diplomacy the national interest is a highly problematic concept and a poor guide to understanding the motivations of foreign policy *National Interest and International Aviation* Erwin von den Steinen, 2006-01-01 Many of the problems and opportunities facing society today are determined by issues of mobility Access to people products information and resources has emerged as a priority in the foreign policies of most states Inevitably considerations of national interest have played a central role in the structure and operations of the international aviation system Meanwhile air transport has been a catalyst for the phenomenon of globalization This first in depth exploration of the vital relationship between aviation policy and national interest in today's global economy focuses on those areas of concern where the international community has common ground or where conflicts of interest are most likely to arise Revealing deeply informed perspectives gained from decades of distinguished public service in many areas of aviation policy Erwin von den Steinen reviews the rules that govern the conduct of commercial air services between nations and considers the prospects of aviation in the 21st Century He explains how timely understanding of national interest can provide a context for global and local policy to connect and why the international aviation system is vital for the peaceful and sustainable development of modern states and societies With such insights and powerful practical recommendations von den Steinens analysis will be of enormous value to those concerned with air transport from technical research and design to the highest levels of government as well as to lawyers and academics in international law and relations and a tour of the major issues in international aviation law and policy under the guidance of an authentic homme engage and Ultimately this book is the work of someone who deeply appreciates the aviation industry both at its technical level that of its often frustrating machinations of law and policy and also at the emotional level of a special business that exemplifies freedom and imagination like few others do and Brian F Havel and The Introduction has one of the best free flowing leads to a book detailing the politics of aviation and diplomacy I have come across and I commend this book to lawyers diplomats and students of aero politics and law and I would prescribe this book to my graduate students as compulsory reading for their course in Aero political and legal Environment and Dr Ruwantissa Abeyratne *Ethics and War* Steven P. Lee, 2012 An account of war ethics sensitive to the historical just war theory informed by the contemporary concerns of war Sustainable History and Human Dignity Nayef R.F. Al-Rodhan, 2022-01-01 In Sustainable History and Human Dignity Professor Nayef Al Rodhan shows that it is the human quest for sustainable governance balancing the ever present tension between nine human dignity needs and three human nature attributes

emotionality amorality egoism that has and will most profoundly shape the course of history Beginning with an Ocean Model of a single collective human civilisation Al Rodhan constructs a common human story comprised of multiple geo cultural domains and sub cultures with a history of mutual borrowing and synergies If humanity as a whole is to flourish all of these diverse geo cultural domains must succeed Only thus can lasting peace and prosperity be achieved for all especially in the face of Civilisational Frontier Risks and highly disruptive technologies in the twenty first century **In Search of Germany**

Michael Mertes,2018-01-16 Much that has happened in the world since 1989 gives cause for elation but there is also much that gives reason for alarm The euphoria that attended the dismantling of the Berlin Wall and the collapse of communism has been compromised by tragic events in recent years such as the bitter ethnic rivalries in Yugoslavia the civil war in Rwanda and the terrorist bombings in New York City and Oklahoma City In Search of Germany seeks to accomplish three purposes to initiate a review of the whole of the post World War II period and consider what actually happened in the Federal Republic and in the German Democratic Republic during those forty years to acknowledge that the present age of anxiety did not originate in 1989 and to see that Europe today is indeed in trouble and the difficulties that the world is experiencing have social political and intellectual roots In Search of Germany is an augmented and enlarged collection derived from a special issue of Daedalus Additions that have been made to the book include a chapter by Timothy Garton Ash entitled Germany's Choice a concluding section by the editors and an index While the book focuses on Germany it serves a wider purpose as well by also studying Europe democracy and modernity The prejudices and fears of Germany precisely because they are specific to and yet not peculiar to Germany tell a great deal of why an earlier European and American optimism has been lost and why so much contemporary political discourse avoids explicit consideration of really sensitive issues Half a century after the end of World War II there is interest not only in the policies pursued by the Nazi regime the crimes it perpetrated throughout Europe and the suffering it inflicted on hundreds of millions but also on what preceded that unprecedented tragedy and what has followed it In Search of Germany is a timely and significant analysis of contemporary world politics and will be necessary reading for political scientists historians and scholars of international studies **21st-Century Statecraft** Nayef

Al-Rodhan,2022-07-28 From civilisational frontier risks associated with new challenges like disruptive technologies to the shifting nature of great power conflicts and subversion the 21st century requires a new approach to statecraft In 21st Century Statecraft Professor Nayef Al Rodhan proposes five innovative statecraft concepts He makes the case for a new method of geopolitical analysis called meta geopolitics and for dignity based governance He shows how in an interdependent and interconnected world traditional thinking must move beyond zero sum games and focus on multi sum and symbiotic realist interstate relations This requires a new paradigm of global security premised on five dimensions of security and a new concept of power just power which highlights the centrality of justice to state interests These concepts enable states to balance competing interests and work towards what the author calls reconciliation statecraft Throughout Professor Al

Rodhan brings his philosophical and neuroscientific expertise to bear providing a practical model for conducting statecraft in a sustainable way

Interdisciplinary Perspectives on Socioecological Challenges Anders Siig Andersen, Henrik Hauggaard-Nielsen, Thomas Budde Christensen, Lars Hulgaard, 2023-04-07 This book explores interdisciplinary perspectives on socioecological challenges and offers innovative solutions at both a European and global level This book critically reflects on the latest scientific knowledge regarding the increasing instability of the Earth System caused by human activities during the Anthropocene and the Great Acceleration It focuses on the global and European challenges regarding climate resources bio integrity and environment The authors assess the obstacles to overcoming these challenges and examine the risks posed by path dependencies lock ins and trade offs between global and regional goals They also drill down into the complexities of the European Green Deal specifically the similarities and differences between the scientific analyses and recommendations from the European Environment Agency and the content of the Deal Finally the book looks at the Just Transition put forward by the European Green Deal The authors discuss this in a context of global and European ecological and socioecological challenges and put the question of equality recognition and democratization at the center Outlining new pathways to broaden the scope of scientific collaboration between the natural and technical sciences and the social sciences and the humanities this volume will be of great interest to students and scholars of sustainable development environmental policy and governance and environmental justice

National Interests in International Society Martha Finnemore, 1996-10-15 How do states know what they want Asking how interests are defined and how changes in them are accommodated Martha Finnemore shows the fruitfulness of a constructivist approach to international politics She draws on insights from sociological institutionalism to develop a systemic approach to state interests and state behavior by investigating an

international structure not of power but of meaning and social value An understanding of what states want she argues requires insight into the international social structure of which they are a part States are embedded in dense networks of transnational and international social relations that shape their perceptions and their preferences in consistent ways Finnemore focuses on international organizations as one important component of social structure and investigates the ways in which they redefine state preferences She details three examples in different issue areas In state structure she discusses UNESCO and the changing international organization of science In security she analyzes the role of the Red Cross and the acceptance of the Geneva Convention rules of war Finally she focuses on the World Bank and explores the changing definitions of development in the Third World Each case shows how international organizations socialize states to accept new political goals and new social values in ways that have lasting impact on the conduct of war the workings of the international political economy and the structure of states themselves

Japan's International Democracy Assistance as Soft Power

Maiko Ichihara, 2017-08-15 Japan has increasingly emphasized democracy assistance since the mid 2000s such that it now constitutes a major part of Japan's foreign policy This approach is an ostensible departure from the country's traditional foreign policy stance which tries to avoid bringing values to the forefront of foreign policies This book intends to answer the questions of why Japan has started emphasizing democracy assistance and why it has relegated itself to a minor role in democracy assistance nevertheless It argues that Japan's emphasis on democracy assistance reveals its intention to increase its political influence with regards to China based on democratic values and its usage of the term democracy assistance is a performative speech act to orchestrate a comprehensive approach for international democracy support Shedding light on the novel aspect of Japanese policy this book contributes to the understanding of Japanese foreign policy and democracy promotion Providing the analysis that state's speech act could cause to create foreign policies that counter what is predicted by structural realism this analysis makes contributions to neoclassical realism which explains states foreign policy choices within the constraints of international structure

The Evolution in Military Affairs: Shaping the Future U.S. Armed Forces, 1997

The author assesses potential aspects of the future international security environment which will succeed the post Cold War era and provides a context for sketching the types of military capabilities the nation will require in about 20 years He defines national

security interests describes the future international security environment identifies derivative future national security objectives and strategic concepts and discerns the military capabilities that will be required in the early 21st century The author s analysis should highlight to American national security strategists political leaders and military strategists issues that should be considered in making the decisions which will shape the U S armed forces of the 21st century **Strategic Disarmament, Verification and National Security** Stockholm International Peace Research Institute,2020-12-01

Originally published in 1977 the purpose of this book was to analyse the relationship between the security of two states mutually undergoing strategic disarmament at the time and the need for safeguarding their security by means of a verification system The book thus studies some of the basic problems in the disarmament debate issues that had been the subject of great political controversy Previous studies had been mainly descriptive or historical lacking in objective political analysis and tending to political bias depending on the political school of the author There was thus some justification for the statement made by some outstanding authorities in the field that to date no systematic analysis has been attempted to determine what disarmament measures would optimally require of verification methods Our ambition is to respond to this criticism at least so far as the strategic context of disarmament is concerned Chapter 1 introduces us to the enormous range of repercussions caused by a disarmament agreement Chapter 2 examines the concept of verification analysing the meaning of the term presenting various definitions of what verification is and attempting to systematize the concept It has been noted on many occasions that the verification set up in a disarmament treaty is only one of a number of factors working towards compliance with a treaty In fact the role of verification in presenting the treaty and therefore the security of its participants is to a large extent limited However without many other conditions being satisfied verification on its own can do little to preserve the treaty regime Chapter 3 discusses these conditions Chapter 4 gives a brief analysis of the concept of national interests in general and the concept of national security in particular Among all the elements of security it is military security that plays by far the largest role Because of this Chapter 5 considers a specific case of strategic military security in which security defined as stable strategic deterrence between two states is analysed Finally Chapter 6 analyses the question of what happens to security based on strategic deterrence when states enter into the disarmament process More specifically the role of verification in preserving security in such circumstances is analysed thereby answering the main problem of the book The supporting data for Chapter 6 is given in the Appendix
