**Guidelines for Process Safety in Bioprocess Manufacturing Facilities** CCPS (Center for Chemical Process Safety), 2010-11-23 This book helps advance process safety in a key area of interest Currently no literature exists which is solely dedicated to process safety for the bioprocessing industry There are texts guidelines and standards on biosafety at the laboratory level and for industrial hygiene but no guidelines for large scale production facilities In fact biosafety is largely defined as a field that promotes safe

laboratory practices procedures and use of containment equipment and facilities Additionally biomedical engineers biologists or other professionals without chemical engineering training or knowledge of inherently safe design are designing many of these facilities Biotechnology United States.
