*The Arc of Faith-Based Initiatives* John P. Bartkowski, Susan E. Grettenberger, 2018-05-17 This volume offers an in depth examination of a diverse range of faith based programs implemented in three different geographical locales family support in rural Mississippi transitional housing in Michigan and

addiction recovery in the Pacific Northwest Washington Oregon Various types of religious service providers faith intensive and faith related are carefully examined and secular organizations also serve as an illuminating point of comparison Among other insights this book reveals how the three C s of social service provision programmatic content organizational culture and ecological context all combine to shape the delivery of welfare services in the nonprofit world This book warns against simplistic generalizations about faith based organizations Faith based providers exhibit considerable diversity and quite often remarkable resilience in the face of challenging social circumstances An appreciation of these nuances is critical as policies concerning faith based organizations continue to evolve *The New Imperial Presidency* Andrew Rudalevige, 2008-12-15

Has the imperial presidency returned Well written and while indispensable for college courses should appeal beyond academic audiences to anyone interested in how well we govern ourselves I cannot help regarding it as a grand sequel for my own *The Imperial Presidency* Arthur Schlesinger Jr Has the imperial presidency returned This question has been on the minds of many contemporary political observers as recent American administrations have aimed to consolidate power In *The New Imperial Presidency* Andrew Rudalevige suggests that the congressional framework meant to advise and constrain presidential conduct since Watergate has slowly eroded Rudalevige describes the evolution of executive power in our separated system of governance He discusses the abuse of power that prompted what he calls the resurgence regime against the imperial presidency and inquires as to how and why over the three decades that followed Watergate presidents have regained their standing Chief executives have always sought to interpret constitutional powers broadly The ambitious president can choose from an array of strategies for pushing against congressional authority finding scant resistance he will attempt to expand executive control Rudalevige s important and timely work reminds us that the freedoms secured by our system of checks and balances do not proceed automatically but depend on the exertions of public servants and the citizens they serve His story confirms the importance of the living Constitution a tradition of historical experiences overlaying the text of the Constitution itself *America Beyond Black and White* Ronald Fernandez, 2009-05-14 This book is both powerful and important Powerful for the testimony it provides from Americans of many different and even mixed races about their experiences And important because there is a racial revolution underway that will upend race as we know it during the twenty first century John Kenneth White Catholic University of America *America Beyond Black and White* is a call for a new way of imagining race in America For the first time in U S history the black white dichotomy that has historically defined race and ethnicity is being challenged not by a small minority but by the fastest growing and arguably most vocal segment of the increasingly diverse American population Mexicans Chinese Japanese Koreans Indians Arabs and many more who are breaking down and recreating the very definitions of race Drawing on interviews with hundreds of Americans who don t fit conventional black white categories the author invites us to empathize with these doubles and to understand why they may represent our best chance to throw off the strictures of the black white dichotomy The revolution is already underway as

newcomers and mixed race fusions refuse to engage in the prevailing Anglo Protestant culture Americans face two choices understand why these individuals think as they do or face a future that continues to define us by what divides us rather than by what unites us

**Self-Financed Candidates in Congressional Elections** Jennifer A. Steen, 2009-09-08 Are our elections for sale Americans have long asked this question in the face of skyrocketing campaign spending by candidates and parties Then in the 1990s came a wave of wealthy individuals whose deep pockets seemed to be buying political offices across the country Our worst suspicions were confirmed Or were they What effect do self financiers really have on electoral outcomes Jennifer Steen's authoritative empirical study of self financed candidates is a landmark in American politics Steen thoroughly dispels the notion that self funded candidates can buy legislative seats proving that the vast majority of self financiers do not win their elections Her book gives us a truer understanding of self financiers actual influence on campaign competition and rhetoric Jennifer A Steen is Assistant Professor of Political Science at Boston College and a former political consultant She is one of the nation's leading authorities on self financed candidates

*Pluralism and Freedom* Stephen V. Monsma, 2012 Faith based organizations play a major role in providing a host of health educational and social services to the public Nearly all these efforts however have been accompanied by intense debate and numerous legal challenges The right of faith based organizations to hire based on religion the presence of religious symbols and icons in rooms where government subsidized services are provided and the enforcement of gay civil rights to which some faith based organizations object all continue to be subjects of intense debate and numerous court cases In *Pluralism and Freedom* Stephen V Monsma explores the question of how much autonomy should faith based organizations retain when they enter the public realm He contends that pluralism and freedom demand their religious freedom be respected but that freedom of all religious traditions and of the general public and secular groups be equally respected ideals that neither the left nor the right live up to In response Monsma argues that democratic pluralism requires a genuine authentic but also a limited autonomy for faith based organizations providing public services and offers practical concrete public policy applications of this framework in practice

*Faith-Based Social Services* Stephanie C. Boddie, Ram A. Cnaan, 2012-11-12 Read the latest studies on the effectiveness of religious based services and the problems revealed in the assessment The Charitable Choice provision and the Bush Administration's National Faith Based Initiative have broadened the scope of social services delivered through faith based organizations There are expectations that these faith based social service providers will be more effective but how should that effectiveness be measured *Faith Based Social Services Measures Assessments and Effectiveness* explains the

nature and quality of religion based social service delivery while serving as a point of reference for future research and work This unique source tackles the important complex issue of measuring the effectiveness of faith based social services in comparison to secular services while providing analysis of the latest available studies Faith Based Social Services Measures Assessments and Effectiveness provides a conceptual analysis of FBOs faith based organizations that reflects the need to gather detailed studies to assess social service effectiveness while reviewing the crucial issues challenging public policy The latest empirical research is detailed including the problems found when comparing secular and faith based social service providers their organizational structures and the types of services offered Analysis is included of the data from a three state evaluation of welfare to work programs a study of four types of faith based services found in four cities and an assessment of a church based program for teenage drop outs Topics in Faith Based Social Services Measures Assessments and Effectiveness include discussion on how social science research shunned faith based services and how this neglect affected effectiveness problems inherent in efficacy assessment making funding priorities decisions the causes of outcome differences a model of evaluation based on randomized controlled clinical trials using measurement practices currently used by the nonprofit sector comparative case studies in transitional housing parent education and residential substance abuse treatment programs latest analysis of research involving faith based organizations and the provided services efficacy much more Faith Based Social Services Measures Assessments and Effectiveness is illuminating reading perfect for social work professionals students educators sociologists religious leaders and seminary educators

**Charitable Choice at Work** Sheila Suess Kennedy, 2006-11-17 Too often say its critics U S domestic policy is founded on ideology rather than evidence Take Charitable Choice legislation enacted with the assumption that faith based organizations can offer the best assistance to the needy at the lowest cost The Charitable Choice provision of the 1996 Welfare Reform Act buttressed by President Bush s Faith Based Initiative of 2000 encouraged religious organizations including congregations to bid on government contracts to provide social services But in neither year was data available to prove or disprove the effectiveness of such an approach Charitable Choice at Work fills this gap with a comprehensive look at the evidence for and against faith based initiatives Sheila Suess Kennedy and Wolfgang Bielefeld review the movement s historical context along with legal analysis of constitutional concerns including privatization federalism and separation of church and state Using both qualitative and where possible statistical data the authors analyze the performance of job placement programs in three states with a representative range of religious political and demographic traits Massachusetts Indiana and North Carolina Throughout they focus on measurable outcomes as they compare non faith based with faith based organizations nonprofits with for profits and the logistics of contracting before and after Charitable Choice Among their findings in states where such information is available the composition of social service contractor pools has changed very little Reflecting their varied political cultures states have funded programs differently Faith based organizations have not been eager to seek government

contracts perhaps wary of additional legal restraints and reporting burdens The authors conclude that faith based organizations appear no more effective than secular organizations at government funded social service provision that there has been no dramatic change in the social welfare landscape since Charitable Choice and that the constitutional concerns of its detractors may be valid This empirical study penetrates the fog of the culture wars moving past controversy over the role of religion in public life to offer pragmatic suggestions for policymakers and organizations who must decide how best to assist the needy Faith, Politics, and Power Rebecca Sager, 2010-01-15 This title explores how there is often more than meets the eye where politics and money are concerned Faith Based Initiatives are no exception The book looks at how despite the good intentions of some faith based policies did not create new significant programmes to help those in need

Religion and Politics in America Robert Booth Fowler, 2018-05-04 this book focuses on religion and politics and the dynamic interactions between them It helps to understand the politics of religion in the United States and to appreciate the strategic choices that politicians and religious participants make when they participate in politics **Faith-Based Policy** John Chandler, 2013-12-16 In 2001 George W Bush created the White House Office of Faith Based and Community Initiatives The driving force behind the policy was to create a level playing field where faith based organizations could compete on an equal footing with secular organizations for government funding of social aid programs Given on the one hand the continuation of faith based policy under Barack Obama and on the other the continued support by the vast majority of the American people for some form of such policy the need has emerged to clearly understand what this policy is and the issues that it raises Why First because the policy reveals new paradigms that explode traditional political and religious designations such as conservative liberal or evangelical progressive Secondly it is a policy which is setting precedents that with time will only become more entrenched in the institutional fabric of American government and the values of the culture Finally it does not seem to be a policy that is likely to just go away And if it won't go away then how should responsible policy be conducted While John Chandler's Faith Based Policy A Litmus Test for Understanding Contemporary America responds to this need to understand it also acknowledges that there is already a substantial amount of documentation available which taken together provides a comprehensive though sometimes biased picture of faith based policy This book contributes a relatively brief impartial analysis that draws on and synthesizes the available information More specifically in order to dissipate the confusion surrounding the perceptions that many have had concerning the intention and meaning of the policy this book provides insight into 1 the theological visions of the faith based actors behind the policy 2 how these actors have tried to apply these visions as the program has evolved in the 2000s 3 the divisiveness and debate that has characterized the faith based experiment and 4 how all of the above may be held up for contemplation by the reader as a mirror of developing American culture **Ordered Liberty** James E. Fleming, Linda C. McClain, 2013-01-01 Fleming and McClain defend a civic liberalism that takes seriously not just rights but responsibilities and virtues Issues taken up include same sex marriage

reproductive freedom regulation of civil society and the family education of children and clashes between First Amendment freedoms of association and religion and antidiscrimination law

**Faith-Based Inefficiency** Bob Wineburg, 2007-01-30 On January 29 2001 President Bush established the White House Office of Faith Based and Community Initiatives Its stated mission is to fight society's ills by rallying the armies of compassion inside America's churches In *Faith Based Inefficiency* Bob Wineburg argues that beneath the compassionate camouflage lies a five star war plan to demolish government programs mobilize and increase the size of the evangelical Christian voting block shift government money to churches and other faith based organizations in the conservative led culture war and develop a smoke screen of convincing media images and baffling words to confuse detractors This largely understated relationship between the plan's politics and its service delivery has been overlooked until now Wineburg untangles the web of motives and complex activities in this newest dimension of the ongoing culture war to capture America's soul He identifies the parties religious extremists social engineers and politicians and shows how they work to further the agenda of the core constituency of compassionate conservatism His analysis clearly explains this initiative and exposes the naivete of the Administration's approach to fixing the serious and complex problems of persistent poverty In addition Wineburg illustrates through first hand examples what is required for effective services and he shows how local communities can develop plans to produce more skills for coping with local problems He addresses complex issues like worker displacement illiteracy child abuse substance abuse and prison reentry while offering workable options for small churches to participate in partnerships with government and other local nonprofits to prevent solve and manage such problems

*The Challenge of Pluralism* J. Christopher Soper, Kevin R. den Dulk, Stephen V. Monsma, 2017-01-31 In a thoroughly revised and expanded edition that now includes France this essential text offers a rigorous systematic comparison of church state relations in six Western nations the United States France England Germany the Netherlands and Australia As successful and stable political democracies these countries share a commitment to protecting the religious rights of their citizens The book demonstrates however that each has taken substantially different approaches to resolving basic church state questions The authors examine both the historical roots of those differences and more recent conflicts over Islam and other religious minorities explain how contemporary church state issues are addressed and provide a framework for assessing the success of each of the six states in protecting the religious rights of its citizens using a framework based on the ideal of governmental neutrality and evenhandedness toward people of all faiths and of none Responding to the general confusion about the relationship between church and state in the West this book offers a much needed comparative analysis of a topic that is increasingly a source of political conflict The authors argue that the US conception of church state separation with its emphasis on avoiding government establishment of religion is unique among political democracies and discriminates against religious groups by denying religious organizations access to government services provided to other organizations The authors persuasively conclude that the United States can learn a great deal

from other Western nations in promoting religious neutrality and the free exercise of religion      **Faith, Hope, and Jobs**

Stephen V. Monsma, 2006-08-04 A front burner issue on the public policy agenda today is the increased use of partnerships between government and nongovernmental entities including faith based social service organizations In the wake of President Bush's faith based initiative many are still wondering about the effectiveness of these faith based organizations in providing services to those in need and whether they provide better outcomes than more traditional government secular nonprofit and for profit organizations In Faith Hope and Jobs Stephen V Monsma and J Christopher Soper study the effectiveness of 17 different welfare to work programs in Los Angeles County a county in which the U S government spends 14% of its entire welfare budget and offer groundbreaking insight into understanding what works and what doesn't Monsma and Soper examine client assessment of the programs their progress in developing attitudes and resources important for finding self supporting employment and their experience in finding actual employment The study reveals that the clients of the more explicitly faith based programs did best in gaining in social capital and were highly positive in evaluating the religious components of their programs For profit programs tended to do the best in terms of their clients finding employment Overall the religiously active respondents tended to experience better outcomes than those who were not religiously active but surprisingly the religiously active and non active tended to do equally well in faith based programs Faith Hope and Jobs concludes with three sets of concrete recommendations for public policymakers social service program managers and researchers
