Putting The Information Infrastructure To Work Report Of The Information Infrastructure Task Force Committee:

Putting the Information Infrastructure to Work United States. Information Infrastructure Task Force. Committee on Applications and Technology, 1994 An interconnection of computer networks telecommunications services and applications the National Information Infrastructure NII can open up new vistas and profoundly change much of American life This report explores some of the opportunities and obstacles to the use of the NII by people and organizations The goal is to express how improvements in the technical foundation upon which all modern communications rests can benefit all Americans by focusing on the uses of the NII and the benefits to be derived by applications of advanced computing and communications technologies This document describes how the evolving NII can enhance the competitiveness of our manufacturing base increase speed and efficiency of electronic commerce improve health care delivery and control costs promote development and accessibility of quality education and lifelong learning improve effectiveness of environmental monitoring and assessing human impacts upon the earth sustain the role of libraries as agents of democratic and equal access to information and provide government services to the public faster more responsively and more efficiently In addition to articulating a national vision that can serve as a framework for discussion and dialogue a second goal is to improve public policy making to identify critical barriers enablers and the tools of government action most effective in each of these areas In this way the benefits of government activities in support of the NII can be maximized while minimizing unintended or undesirable consequences Several themes emerge equity of access pursuit of demonstrations and pilot projects standards setting process privacy and communications security training and support identification of long term research and development priorities and performance measurements to assess both public and private investments and experiments It is hoped that careful consideration of the policy questions raised here will both facilitate the development of the NII and guide its evolution so that it best meets public purposes MAS **Standards Policy for Information Infrastructure** Brian Kahin, Janet Abbate, 1995

Although there are many competing visions of information infrastructure there is universal agreement that standards will play a critical role The history of OSI the Internet and industry consortia shows that standards development has become a rich multifaceted process critically linked to market strategy and major issues of public policy The thirty three contributions to this book present a comprehensive picture of the state of the art in standards development for information technology and the options for federal policy The book includes both independent analysis and the perspectives of major stakeholders and other interested parties such as AT T the American National Standards Institute the European Commission and the Society of Motion Picture and Television Engineers A Publication of the Information Infrastructure Project at Harvard University
