Pyramids And Temples Of Gizeh:

The Pyramids and Temples of Gizeh Flinders Petrie, 2020-08-06 This early work by the British archaeologist Flinders Petrie was originally published in 1883 and we are now republishing it with a brand new introductory biography The Pyramids and Temples of Gizeh is a scholarly work on the surveying and construction of one of the world's ancient wonders William Matthew Flinders Petrie was born on 3rd July 1853 in Kent England son of William Petrie and Anne Flinders He showed an early interest in the field of archaeology and by his teenage years was surveying local Roman monuments near his family home Flinders Petrie continued to have many successes in Egypt and Palestine throughout his career most notably his discovery of the Mernept stele a stone tablet depicting scenes from ancient times His excellent methodology and plethora of finds earned him a Knighthood for his services to archaeology in 1923 **The pyramids and temples of Gizeh** W.M.F. New rev. ed** William Matthew Flinders Petrie, *Pyramids and Temples of Gizeh* W M Flinders Petrie,2020-06 The nature of the present work is such that perhaps few students will find interest in each part of it alike The ends and the means appeal to separate classes the antiquarian whose are the ends will look askance at the means involving co ordinates probable errors and arguments based on purely mechanical considerations the surveyor and geodetist whose are the means will scarcely care for their application to such remote times the practical man who may follow the instrumental details may consider the discussion of historical problems to be outside his province while only those familiar with mechanical work will fuUy realize the questions of workmanship and tools here explained An investigation thus based on such different subjects is not only at a disadvantage in its reception but also in its production And if in one part or another specialists may object to some result or suggestion the plea must be the difficulty of making certain how much is known and what is believed on subjects so far apart and so much debated The combination of two apparently distinct subjects is often most fertile in results and the

mathematical and mechanical study of antiquities promises a full measure of success It is sometimes said or supposed that it must be useless to apply accuracy to remains which are inaccurate that fallacies are sure to result and that the products of such a method rather originate with the modern investigator than express the design of the ancient constructor But when we look to other branches of historical inquiry we see how the most refined methods of research are eagerly followed how philology does not confine itself to the philological ideas of the ancient writers but analyzes their speech so as to see facts of which they were wholly unconscious how chemistry does not study the chemical ideas but the chemical processes and products of the ancients how anthropology examines the bodies and customs of men to whom such inquiries were completely foreign Hence there is nothing unprecedented and nothing impracticable in applying mathematical methods in the study of mechanical remains of ancient times since the object is to get behind the workers and to see not only their work but their mistakes their XIV INTRODUCTION amounts of error the limits of their ideas in fine to skirt the borders of their knowledge and abilities so as to find their range by means of using more comprehensive methods Modern inquiry should never rest content with saying that anything was exact but always show what error in fact or in work was tolerated by the ancient worker and was considered by him as his allowable error 2 The materials of the present volume have been selected from the results of two winters work in Egypt Many of the points that were examined and some questions that occupied a considerable share of the time have not been touched on here as this account is limited to the buildings of the fourth dynasty at Gizeh with such examples of later remains as were necessary for the discussion of the subject All the inscriptions copied were sent over to Dr Birch who has published some in full and extracted what seemed of interest in others Dr Weidemann has also had some of them and they do not need therefore further attention on my part Papers on other subjects including the Domestic Remains Brickwork Pottery and travellers graffiti each of which were examined with special reference to their periods are in course of publication by the Royal Archaeological Institute The mechanical methods and tools employed by the Egyptians were discussed at the Anthropological Institute and are more summarily noticed here *The Pyramids and Temples of Gizeh - Scholar's Choice Edition* William Matthew Flinders Petrie, 2015-02-08 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping
