Propaganda and Information Warfare in the Twenty-First Century Scot Macdonald, 2006-12-05 This is the first book to analyze how the technology to alter images and rapidly distribute them can be used for propaganda and to support deception operations In the past propagandists and those seeking to conduct deception operations used crude methods to alter images of real people events and objects which could usually be detected relatively easily Today however computers allow propagandists to create any imaginable image still or moving with appropriate accompanying audio Furthermore it is becoming extremely difficult to detect that an image has been manipulated and the Internet television and global media make it possible to disseminate altered images around the world almost instantaneously Given that the United States is the sole superpower few if any adversaries will attempt to fight the US military conventionally on the battlefield Therefore adversaries will use propaganda and deception especially altered images in an attempt to level the battlefield or to win a war against the United States without even having to fight militarily Propaganda and Information Warfare in the 21st Century will be of great interest to students of information war propaganda public diplomacy and security studies in general

Emergency Propaganda Kumar Ramakrishna, 2013-04-15 Sheds new light on the hitherto neglected years of the Emergency 1955-58 demonstrating how it was British propaganda which decisively ended the shooting war in December 1958 The study argues for a concept of propaganda that embraces not merely words in the form of film radio and leaflets but

also deeds **Cautious Crusade** Steven Casey, 2001-11-15 America's struggle against Nazism is one of the few aspects of World War II that has escaped controversy. Historians agree that it was a widely popular war different from the subsequent conflicts in Korea and Vietnam because of the absence of partisan sniping, ebbing morale, or calls for a negotiated peace. In this provocative book, Steven Casey challenges conventional wisdom about America's participation in World War II. Drawing on the numerous opinion polls and surveys conducted by the U.S. government, he traces the development of elite and mass attitudes toward Germany from the early days of the war up to its conclusion. Casey persuasively argues that the president and the public rarely saw eye to eye on the nature of the enemy, the threat it posed, or the best methods for countering it. He describes the extensive propaganda campaign that Roosevelt designed to build support for the war effort and shows that Roosevelt had to take public opinion into account when formulating a host of policies, from the Allied bombing campaign to the Morgenthau plan to pastoralize the Third Reich. By examining the previously unrecognized relationship between public opinion and policy making during World War II, Casey's groundbreaking book sheds new light on a crucial era in American history.

Examines the formulation and implementation of national security policy and considers ways to achieve a more effective organization among the several branches and agencies of the Government involved with national security policy.
