Software Testing and Global Industry Valentine Casey,2008-12-18 Today software development has truly become a globally sourced commodity This trend has been facilitated by the availability of highly skilled software professionals in low cost locations in Eastern Europe Latin America and the Far East Organisations endeavouring to leverage the opportunities this provides and to avail of the benefits of establishing operations close to emerging markets have embraced this strategy in large numbers Software testing plays a key role in delivering high quality products and is a labour intensive complex and expensive activity In the context of Global Software Development GSD to date testing has been perceived as a well defined task that is relatively straightforward and lends itself to being outsourced or offshored This volume considers this specific topic and demonstrates that testing in a GSD environment is not a simple activity It is prone to be negatively impacted by all the factors associated with distributed software development This work also provides practical solutions which can be utilised to address these important issues

While the primary focus of this work is software testing it is also the culmination of 10 years research by the author in the area of GSD During this period he has considered all aspects of the software development life cycle This experience and knowledge has been incorporated into this volume It is therefore relevant to note this work is of value to the wider software community not just to those interested in testing It specifically considers the establishment of virtual teams and their efficient and effective operation Therefore this book has relevance to all those interested in implementing or improving a GSD strategy Its particular strengths are that while it is a scholarly work it is industry based and practical

Structuring the Thesis David Kember, Michael Corbett, 2018-07-23 The book is a collective investigation of the structuring of theses in education the social sciences and other disciplines that commonly do not follow the standard procedures of the scientific method To help research students design a structure for their own thesis and liberate their investigations from the constraints associated with the use of the conventional structure it explains how the structures adopted were designed to suit the topic methodology and paradigm It also provides a wide range of examples to draw upon which suit a broad spectrum of theory methodological approaches research methods and paradigms Additionally by analyzing the methodologies and paradigms and reviewing the methodological and paradigmatic spectrum it offers a significant contribution to the way research is conceptualized The book addresses a number of key questions faced by students supervisors and examiners Why do examiners often find it difficult to read work in non scientific disciplines when theses are structured in accordance with the conventional scientific method Why do students in non scientific disciplines struggle to write up the outcomes of their research in the conventional structure What alternative thesis structures can be devised to better suit the wide range of methods Which theories and paradigms are commonly followed in education and the social sciences and how do these perspectives influence the research process What methods theories and paradigms are commonly adopted by education and social science students and what problems do these pose when students write their theses
