## **Quality Perception Parboil Rice:**

**Rice Quality Handbook** Randall G. Mutters, James F. Thompson, 2009-01-01      **Assessing quality attributes that drive preference and consumption of local rice in Ghana** Ayeduvor, Selorm, 2018-05-30 Rice consumption in Ghana has more than quadrupled in the last 60 years becoming a common staple food However this increasing demand is being met by imports The rise in rice imports has led to a renewed interest in promoting domestic production of rice to substitute for imported rice However it is not clear how current rice development policies are informed by the preferences of consumers for specific quality attributes of rice This study assesses the preferred rice qualities that drive consumption of local rice in Ghana Through a review of previous studies on consumer preferences of rice complemented with information collected through interviews with local rice traders millers and other stakeholders this paper describes the types of rice and their sources the types of rice consumers and the packaging and quality attributes of local rice in key markets in Ghana We find that the quality of branded local rice types has improved in recent years However unbranded local rice in Ghana is still commonly contaminated with foreign materials is made up of co mingled varieties and has a large share of broken and yellowish grain In addition local rice continues to be sold at a lower price than imported rice of same quality This is largely due to the perceived low quality of local rice by consumers that results in low demand Marketing campaigns and sensitization to advocate for consumption of local rice are recommended policy options to increase consumer awareness and to build demand for quality local rice in Ghana

**Rice Quality** Kshirod R Bhattacharya, 2011-06-27 Rice is a unique and highly significant crop thought to help feed nearly half the planet on a daily basis An understanding of its properties and their significance is essential for the provision of high quality products This is all the more true today as international trade in rice trade has been increasing rapidly in recent years This important book reviews variability in rice characteristics and their effects on rice quality After an introduction on rice quality that also explores paradoxes associated with the crop the book goes on to examine rice physical properties and milling quality This leads to a discussion of the effects that the degree of milling has on rice quality The ageing of rice and its cooking and eating quality are investigated in the following chapters before an analysis of the effect of parboiling on rice quality Later chapters consider the product making and nutritional quality of rice and investigate speciality rices and rice breeding for desirable quality The book concludes with an extensive chapter on rice quality analysis and an appendix containing selected rice quality test procedures With its distinguished author Rice quality a guide to rice properties and analysis proves an invaluable resource for professionals in the rice industry and researchers and post graduate students interested in rice Examines the physical properties of rice such as grain appearance and density and friction Investigates the ageing of rice and its cooking and eating quality The product making and nutritional aspects of rice are also considered

partnership on support to National Rice Development Strategies NRDS within Coalition for African Rice Development CARD AfricaRice and FAO decided to conduct a series of rice policy reviews for Ghana Ivory Coast and Mali in 2019 The following study uses the Ex ante Carbon balance Value Chain tool EX ACT VC developed in 2016 by FAO to assess the Ghanaian rice value chain s environmental in terms of climate mitigation and climate resilience and socio economic impact for a business as usual scenario in 2020 compared to a growth scenario for 2030 Promotion of good agricultural practices GAP the reduction of crop losses and an increase in the use of inputs and mechanization are the different strategies considered in this study that would help in realizing the aim of self sufficiency Through the implementation of these practices along with the expansion of

rice growing areas the income per day of work per farmer would increase by more than USD 4 reaching approx USD 9 day of work in the value chain The gross production value of the rice value chain would reach USD 856 million which is an additional USD 511 million in gross production value by 2030 An upgraded rice value chain would also result in an increase in the value added by USD 378 million by 2030 with an overall positive carbon balance that would emit 284 852 tCO<sub>2</sub> e of greenhouse gas emissions

The role of small and medium agrifood enterprises in food systems transformation: the case of rice processors in Senegal Ilie, E.T., Kelly, S., Food and Agriculture Organization of the United Nations ,2021-03-22 The objective of this publication is multifold First it aims to learn from small and medium sized agrifood manufacturers about the role they play in food systems transformation in Senegal and the policy reforms required to harness their potential Second and more specifically it gleans lessons from structured interviews with Senegalese rice millers based on their day to day realities highlighting the business creativity used by these firms in order to deal with difficult enabling environments Third the methodology adopts a food systems approach to analyze the target enterprises cross fertilizing different disciplinary perspectives in order to develop evidence for the public sector on integrated policy making that better supports the role of small agrifood enterprises in sustainable transformation Finally the study shares ideas about innovations related to procurement operations logistics finance marketing and sales human resources and strategic partnerships An important contribution of this work is to demonstrate the multidimensional and complex nature of the environment within which agrifood manufacturers do business and the need for the public sector to harness their potential to reduce poverty through off farm employment generation and to improve food security through the sustainable supply of affordable and nutritious food to domestic and export markets
