Quality Assurance in Higher Education Don F. Westerheijden, Bjorn Stensaker, Maria Joao Rosa, 2007-09-04 By bringing together leading experts on quality assurance in higher education from seven countries from Europe the USA and South Africa this volume intends to go several steps further than most publications on quality assurance First it brings together views from micro to macro levels in the multi actor space showing how quality assurance impacts the higher education system throughout Second it links quality assurance solidly to issues of regulation translation rather than mechanical implementation and transformation instead of being only focused on quality assurance as a single policy instrument Third it uses this broad range of research insights to criticize current practices explaining for instance why sometimes people have difficulty in tracing any concrete effects of all initiatives taken in this area Finally the book offers proposals for better focusing quality assurance in the future to address institutional challenges better The general purpose of the book then is to give an engaged academic reflection on how quality assurance is embedded in higher education and in a dynamic way to assess its impacts and potential improvements

policy in British higher education drawing extensively on previously untapped archival sources It offers a comprehensive analysis of the policy drivers since 1945 and up to 2011 and of the extent to which even in the so called golden age of university autonomy in the immediate post War period the development of British higher education policy was closely integrated with government policies In particular it highlights how the role of the Treasury in determining the resource base for the expansion of student numbers is key to understanding many of the shifts in policy that occurred This close engagement with government coupled with the historical acceptance of institutional autonomy defines the distinctiveness of the British higher education system as compared with other countries What the book also shows however is that policy was rarely driven directly by Ministers but emerged out of inter relationships between the Treasury the responsible Department the intermediary bodies the higher education representative bodies and the research communities The policy process was interactive rather than directed The conclusions offer a new interpretation of the development of British higher education

**Africa** Peter Neema-Abooki, 2022-12-16 This book explores quality assessment and enhancement in higher education in Africa to illustrate the need to develop quality practices in measuring effective education and continually search for permanent improvement. The book demonstrates that technological and socio-economic trends, innovations and inventions of the twenty-first century demand that additional attention be placed upon education for national, regional and international development. Since conventions for quality assessment and enhancement need to be defined and systematic structures constructed to develop quality practices, the book shows how quality in higher education within Africa has been established and advanced to provide a framework for monitoring, auditing and reviewing assessment and enhancement. Though the book considers African complexities and diversity, it incorporates global trends and utilises an international focus that enables readers to devise appropriate strategies for developing and enhancing quality and standards in higher education in both continental Africa and beyond. Illustrating why quality assessment and enhancement should be embraced in all aspects including inputs, processes, outputs and outcomes in educational settings globally, this book will be of interest to policymakers and scholars in the fields of Higher Education Quality and Global Studies, African Education, African Studies and Management and Administration, Leadership and Professional Development Studies.
