Freedom of Religion in the 21st Century Hans-Georg Ziebertz, Ernst Hirsch Ballin, 2015-10-20 Freedom of religion consists of the right to practice to manifest and to change one's religion. The modern democratic state is neutral towards the variety of religions but protects the right of citizens to practice their different religious beliefs. Recent history shows that a number of religious claims challenge the neutral state. This happens especially when secularity is rejected as the basis of the modern state. How can conflicting interpretations of the relation between religion and state be balanced in our world? This book reflects on conflicts that seem to be implied in the freedom of religion on its causes and how they can be overcome. Contributors are Katajun Armipur, Ernst Hirsch Ballin, Ian Cameron, Susanne D. Hnert, Leslie Francis, Carsten Gennerich, Handi Hadiwitanto, Mandy Robbins, Prof. Hans Schilderman, Stefanie Schmahl, Carl Sterkens, Alexander Unser, Johannes A. van der Ven, and Hans Georg Ziebertz.

The Handbook of Intellectual Disability and Clinical Psychology Practice Alan Carr, Christine Linehan, Gary O'Reilly, Patricia Noonan Walsh, John McEvoy, 2016-04-12. The Handbook of Intellectual Disability and Clinical Psychology Practice will equip clinical psychologists in training with the skills necessary to complete a clinical placement in the field of intellectual disability. Building on the success of the previous edition, this handbook has been extensively revised. Throughout the text, references and website addresses have been updated to reflect important developments since the publication of the first edition. Recent research findings on the epidemiology, aetiology, course, outcome, assessment, and treatment of all psychological problems considered in the book have been incorporated into the text. Account has been taken of changes in the diagnosis and classification of intellectual disability and psychological problems reflected in the AAIDD 11 and the DSM 5. New chapters on the assessment of adaptive behaviour and support needs, person-centred active support, and the assessment of dementia in people with intellectual disability have been added. The book is divided into eight sections. Section 1 covers general conceptual frameworks for practice, diagnosis, classification, epidemiology, and lifespan development. Section 2 focuses on assessment of intelligence, adaptive behaviour, support needs, quality of life, and the processes of interviewing and report writing. Section 3 covers intervention frameworks, specifically active support, applied behavioural analysis, and cognitive behaviour therapy. Section 4 deals with supporting families of children with intellectual disability, genetic syndromes, and autism spectrum disorders. Section 5 covers issues associated with intellectual disability first evident or prevalent in middle childhood. Section 6 deals with adolescent concerns, including life skills training, relationships, and sexuality. Section 7 focuses on residential, vocational, and family-related challenges of adulthood and aging. Section 8 deals with professional issues and risk assessment. Chapters cover theoretical and empirical issues on the one hand and practice issues on the other. They close with summaries and suggestions for further reading for practitioners and families containing a member with an intellectual disability. Where appropriate, in many chapters, practice exercises to aid skills development have been included. The second edition of the Handbook of Intellectual Disability and Clinical Psychology Practice is one of a set of three volumes which cover the lion's share of the curriculum for clinical psychologists in training in

the UK and Ireland The other two volumes are the Handbook of Child and Adolescent Clinical Psychology Third Edition by Alan Carr and the Handbook of Adult Clinical Psychology Practice Second Edition edited by Alan Carr Muireann McNulty

The Wellbeing of Women in Entrepreneurship

Maria-Teresa Lepeley, Katherina Kuschel, Nicholas Beutell, Nicky Pouw, Emiel L. Eijdenberg, 2019-07-01. Women accomplish nearly two thirds of total work around the world, including household duties, comprise one third of the formal labor force, but women receive one tenth of the world's income and own only one hundredth of the world's property. Entrepreneurship is a vehicle for advancing the lives of women around the world. This book brings together 49 distinguished entrepreneurship scholars to provide a unique global vision of the wellbeing of women entrepreneurs, necessary for fostering sustainable development and inclusive societies. Although gender inequality is an important issue, solutions leading to gender parity are far from reaching ideal levels in the formal workplace and globally. Meanwhile, the number of women involved in entrepreneurship is growing exponentially because there are more opportunities for women to own a business and be their own boss. This offers women the most desirable and flexible working conditions that better align with women's lifestyles and multiple family responsibilities. However, entrepreneurial activities are demanding and complex compared to men; women face special challenges that deserve close attention. This book presents research and programs to effectively support women entrepreneurs in reaching levels of wellbeing required to ensure business sustainability and personal prosperity. Offering a diversity of perspectives from around the globe, *The Wellbeing of Women in Entrepreneurship* is of great interest to academics and practitioners working in teaching and research in disciplines including business management, entrepreneurship, organizational change, human centered management, human resources, sustainable development, and women's studies.
