Quantitative Economic Policy And Planning Theory And Models Of Economic Control:

Quantitative Economic Policy and Planning Nicolas Spulber, Ira Horowitz, 1978 **Quantitative Economic Policies and Interactive Planning** Andrew J. Hughes Hallett, Hedley J. B. Rees, 1983-01-20 The National Planning Idea In U.s. Public Policy David E Wilson, 2019-07-11 This book explores the eventful but largely forgotten history of national planning efforts in the United States first identifying and comparing five alternative approaches to contemporary national planning then using these approaches to assess the events of 1973 1976 a period when crisis pressures brought a vigorous resurgence of national planning activity and debate Dr Wilson concludes that two new approaches to planning learning adaptive and general systems are increasingly being used in lieu of the long established and less flexible rational and incremental approaches and that these might eventually achieve a beneficial new synthesis in both federal policy practice and social science theory He argues that the twin questions of a planned versus a planning society and of who will plan for whom are inexorably emerging as key issues in U S public policy Along with its companion volume National Planning in the United States An Annotated Bibliography also published by Westview this book provides extensive new interdisciplinary research material and integrative perspectives on current planning challenges *A Select Bibliography On Economic Development* John P. Powelson, 2019-05-20 This bibliography of more than 2 000 titles contains both books and journal articles primarily those published since 1970 Most of the entries are annotated The material is classified according to forty eight categories and there is also a list of relevant titles for each major country in Africa Asia and Latin America **Control Theory and Dynamic Games in Economic Policy Analysis** Maria Luisa Petit, 1990 This book deals with the stabilisation and control of centralised policy making and its economic implications **Labor Literature** United States. Department of Labor. Library, 1977 **Labor Literature** , 1977 *National Planning In The United States* David E. Wilson, 2019-03-13 This annotated bibliography of more than 2 000 entries current through 1977 sheds light on the national planning idea as a substantive issue in past present and future U S public policy presents a bibliographic structure that suggests new emphases relationships and interdisciplinary approaches and makes more easily accessible to students a **Transformation of Economy as a Real Process** Daniel Daianu, 2018-12-07 First published in 1998 this volume is a contribution to the economic analysis of post communist transformation in an evolutionary institutionalist approach The author shows convincingly the role of path dependency of the ways history matters for the success of otherwise sound policies and highlights structural hindrances to fast and successful transformation Thence emerges the key concept of strain The book addresses the question of how to create conditions for sustainable development in societies where these are lacking and stresses the importance of institutional change It also emphasises the role of sound banking institutions and proper regulations the crucial issue of financial vulnerability and fragility the role of reputation means to fight non payments limit to optimal policies etc The author covers a broad international literature and relates it to his insights as a local observer which delivers an interesting reading

Lilly Conference on Recent Developments in Economics Elmus Wicker,1977 *Quantitative Economic Policy*
Reinhard Neck,Christian Richter,Peter Mooslechner,2008-03-04 Econometric techniques and models are still being extensively used in the business of forecasting and policy advice This book presents recent advances in the theory and applications of quantitative economic policy with particular emphasis on fiscal and monetary policies in a European and global context The volume honors Andrew Hughes Hallett a pioneer and major scientist in quantitative economic policy analysis whose contributors are among his friends and former students *The Theory of Economic Policy in a Strategic Context* Nicola Acocella,Giovanni Di Bartolomeo,Andrew Hughes Hallett,2013 Developing a new and highly innovative theory of economic policy this book deals with conflicts between strategic actions by public and private agents It builds on the Lucas critique but also applies the tools introduced by Tinbergen and Theil to dynamic policy games and from there derives a new theory of economic policy Its main propositions describe such properties in the models currently used for policy making as neutrality and equilibrium existence uniqueness and multiplicity These properties are key to understanding the impact of concepts such as rational expectations time inconsistency communication and the use of policy announcements As the numerous examples show they are useful both for model building and for devising optimal institutions The Theory of Economic Policy in a Strategic Context is an essential but accessible tool for economic researchers involved in policy questions

Decision Jati Sengupta, 2012-12-06 Use of information is basic to economic theory in two ways As a basis for optimization it is central to all normative hypotheses used in economics but in decision making situations it has stochastic and evolutionary aspects that are more dynamic and hence more fundamental This book provides an illustrative survey of the use of information in economics and other decision sciences Since this area is one of the most active fields of research in modern times it is not possible to be definitive on all aspects of the issues involved However questions that appear to be most important in this author's view are emphasized in many cases without drawing any definite conclusions It is hoped that these questions would provoke new interest for those beginning researchers in the field who are currently most active Various classifications of information structures and their relevance for optimal decision making in a stochastic environment are analyzed in some detail Specifically the following areas are illustrated in its analytic aspects 1 Stochastic optimization in linear economic models 2 Stochastic models in dynamic economics with problems of time inconsistency causality and estimation 3 Optimal output inventory decisions in stochastic markets 4 Minimax policies in portfolio theory 5 Methods of stochastic control and differential games and 6 Adaptive information structures in decision models in economics and the theory of economic policy

Modelling and Decisions in Economics Ulrike Leopold-Wildburger, Gustav

Feichtinger, Klaus-Peter Kistner, 2013-06-29 Franz Ferschl is seventy According to his birth certificate it is true but it is unbelievable Two of the three editors remembers very well the Golden Age of Operations Research at Bonn when Franz Ferschl worked together with Wilhelm Krelle Martin Beckmann and Horst Albach The importance of this fruitful cooperation is reflected by the fact that half of the contributors to this book were strongly influenced by Franz Ferschl and his colleagues at the University of Bonn Clearly Franz Ferschl left his traces at all the other places of his professional activities in Vienna and Munich This is demonstrated by the present volume as well Born in 1929 in the Upper Austrian Miihlviertel his scientific education brought him to Vienna where he studied mathematics In his early years he was attracted by Statistics and Operations Research During his employment at the Osterreichische Bundeskammer fUr Gewerbliche Wirtschaft in Vienna he prepared his famous book on queueing theory and stochastic processes in economics This work has been achieved during his scarce time left by his duties at the Bundeskammer mostly between 6 a m and midnight All those troubles were however soon rewarded by the chair of statistics at Bonn University As a real Austrian the amenities of the Rhineland could not prevent him from returning to Vienna where he took the chair of statistics

As a participant of SOR 96 one could well observe the current pace of achievements. Many of these results are in these proceedings. The program consisted of two plenary, 17 semi-plenary and 335 contributed lectures in 18 sections. Dynamics and Conflict in Regional Structural Change Manas Chatterji, Robert E. Keunne, 1990-06-18.
