### Abstract

**Background**—The United States has a complex healthcare system that is undergoing substantial reformations. There is a need for high-quality, economic evaluations of nursing practice. An updated review of completed economic evaluations relevant to the field of nursing within the U.S. healthcare system is timely and needed.

**Objectives**—The purpose of this study was to evaluate and describe the quantity and quality of economic evaluations in nursing-relevant research performed in the U.S. between 1997 and 2015.

**Methods**—Four databases were searched. Titles, abstracts, and full-text content were reviewed to identify studies that analyzed both costs and outcomes, relevant to nursing, performed in the U.S.,

**Development Economics** Gérard Roland,2016-05-23 Gerard Roland s new text Development Economics is the first undergraduate text to recognize the role of institutions in understanding development and growth Through a series of chapters devoted to specific sets of institutions Roland examines the effects of institutions on growth property rights market development and the delivery of public goods and services and focuses With the most comprehensive and up to date treatment of institutions on development Roland explores the important questions of why some countries develop faster than others and why some fail while others are successful

Towards a Better Global Economy Franklin Allen,Jere Richard Behrman,Nancy Birdsall,Shahrokh Fardoust,Dani Rodrik,Andrew D. Steer,Arvind Subramanian,2014 Substantial progress in the fight against extreme poverty was made in the last two decades But the slowdown in global economic growth and significant increases in income inequality in many developed and developing countries raise serious concerns about the continuation of this trend into the 21st century The time has come to seriously think about how improvements in official global governance coupled with and reinforced by rising activism of global citizens can lead to welfare enhancing and more equitable results for global citizens through better national and international policies This book examines the factors that are most likely to facilitate the process of beneficial economic growth in low middle and high income countries It examines past present and future economic growth demographic changes the hyperglobalization of trade the effect of finance on growth climate change and resource depletion and the sense of global citizenship and the need for global governance in order to draw longer term implications identify policy options for improving the lives of average citizens around the world and make the case for the need to confront new challenges with truly global policy responses The book documents how demographic changes convergence and competition are likely to bring about massive shifts in the sectoral and geographical composition of global output and employment as the center of gravity of the global economy moves toward Asia and emerging economies elsewhere It shows that the legacies of the 2008 09 crisis high

unemployment levels massive excess capacities and high debt levels are likely to reduce the standard of living of millions of people in many countries over a long period of adjustment and that fluctuations in international trade financial markets and commodity prices as well as the tendency of institutions at both the national and international level to favor the interests of the better off and more powerful pose substantial risks for citizens of all countries The chapters and their policy implications are intended to stimulate public interest and facilitate the exchange of ideas and policy dialogue
