Russian Navy Myth And Reality:

The Russian Navy Eric Morris,1977 *The Royal Navy and German Naval Disarmament 1942-1947* Chris Madsen,2020-05-05 After the bitter lessons of German self disarmament in 1919 Britain was far more alert and focused when it came to overseeing the disarmament of Germany s naval forces after World War II This book shows how well prepared the British were second time around *Decommissioned Russian Nuclear Submarines and International Cooperation* Charles Krupnick,2017-07-06 With the end of the Cold War Russia s submarines were no longer needed to deter or fight Western navies and were very expensive to operate and maintain Older submarines were taken out of service in large numbers but without firm plans and infrastructure in place to remove and adequately care for their nuclear components problems soon developed over the disposition of spent fuel assemblies Problems arose also of course between Russia and the international community as to the best way to respond to the challenge This book looks at those problems first discussing Russia s economy its environment and the Russian Navy and then covering in detail the spent fuel of Russian submarines and related nuclear problems The engagement of the international community on the issue is then addressed A theoretical analysis is offered on how Russia s fellow nations can help remedy a troubling environmental problem in a difficult country Maritime Strategy and Sea Denial Milan Vego,2018-12-07 This book focuses on the theory and practice of maritime strategy and operations by the weaker powers at sea Illustrated by examples from naval and military history the book explains and analyzes the strategies of the weaker side at sea in both peacetime and wartime in defense versus offense the main prerequisites for disputing control of the sea and the conceptual framework of disputing control of the sea It also explains and analyzes in some detail the main methods of disputing sea control avoiding seeking decisive encounters weakening enemy naval forces over time counter containment of enemy naval forces destroying the enemy s military economic potential at sea attacks on the enemy coast defense of the coast defense capturing important positions basing areas and defense capturing of a choke point A majority of the world s navies are currently of small or medium size In the case of a war with a much stronger opponent they would be strategically on the defensive and their main objective then would be to dispute control of the sea by a stronger side at sea This book provides a practical guide to such a strategy This book would be of much interest to students of naval power maritime security strategic studies and military naval history Naval Policy and Strategy in the Mediterranean John B. Hattendorf,2013-11-05 Maritime strategy and naval power in the Mediterranean touches on migration the environment technology economic power international politics and law as well as calculations of naval strength and diplomatic manoeuvre These broad and fundamental themes are explored in this volume

Transformation in Russian and Soviet military history , The sea in Russian strategy Andrew Monaghan,Richard Connolly,2023-06-27 For the first two decades after the Cold War Russian naval power hardly featured in the Euro Atlantic community s strategic thinking This began to change in the mid 2010s as the idea that the Russian navy

poses a threat to NATO began to gain ground That threat took shockingly real form in February 2022 when Moscow launched its invasion of Ukraine The sea in Russian strategy is the first sustained examination of Russian maritime power in the period since the fall of the Soviet Union It brings together leading specialists from public policy and academia to reflect on historical and contemporary aspects of Russia's naval strategy and capacities At a time of mounting tensions which some observers have named the Fourth Battle of the Atlantic the book offers an informed and nuanced discussion taking into account the view from Moscow and how this differs from western perspectives It sketches a trajectory of Russia's power at sea and reflects on current capabilities and problems as well as Moscow's strategic planning for the future *The Soviet Navy* Bruce W. Watson, Susan M Watson, Calland Carnes, Brian Larson, 2020-01-09 Since Admiral Sergei G Gorshkov was appointed to the office of commander in chief of the Soviet Navy in 1956 the Soviet Union has made a massive investment in naval construction training and operations As a result the Soviet Navy has grown from a coastal defense force to one of the world's two strongest navies This book offers a detailed assessment of every major aspect of the Soviet Navy from fleet structure and training facilities to command and control procedures and warfare and intelligence collection capabilities Soviet Political and Military Conduct in the Middle East A. Sella, 1981-04-09 **China Goes to Sea** Andrew S. Erickson, Lyle J Goldstein, Carnes Lord, 2009-07-01 In modern history China has been primarily a land power dominating smaller states along its massive continental flanks But China's turn toward the sea is now very much a reality as evident in its stunning rise in global shipbuilding markets its vast and expanding merchant marine the wide offshore reach of its energy and minerals exploration companies its growing fishing fleet and indeed its increasingly modern navy Yet for all these achievements there is still profound skepticism regarding China's potential as a genuine maritime power Beijing must still import the most vital subcomponents for its shipyards maritime governance remains severely bureaucratically challenged and the navy evinces at least as of yet little enthusiasm for significant blue water power projection capabilities This volume provides a truly comprehensive assessment of prospects for China's maritime development by situating these important geostrategic phenomena within a larger world historical context China is hardly the only land power in history to attempt transformation by fostering sea power Many continental powers have elected or been impelled to transform themselves into significant maritime powers in order to safeguard their strategic position or advance their interests We examine cases of attempted transformation from the Persian Empire to the Soviet Union and determine the reasons for their success or failure Too many works on China view the nation in isolation Of course China's history and culture are to some extent exceptional but building intellectual fences actually hinders the effort to understand China's current development trajectory Without underestimating the enduring pull of China's past as it relates to threats to the country's internal stability and its landward borders this comparative study provides reason to believe that China has turned the corner on a genuine maritime transformation If that proves indeed to be the case it would be a remarkable if not singular event in the history of the last two millennia
