Wooden Church Architecture of the Russian North Evgeny Khodakovsky, 2015-08-11 The book presents a broad panoramic overview of church architecture in the Russian North between the fourteenth and nineteenth centuries While it is inevitably overshadowed by the imperial splendour of the country's capital cities this unique phenomenon is regarded as the

most distinctive national expression of traditional Russian artistic culture and at the same time as a significant part of humanity's worldwide architectural heritage. The chief intention of the book is to present the regionally specific features of the wooden churches of the Russian North which vary from area to area for local natural or historical reasons. This approach touches upon the very important questions of the typology and classification of the multiplicity of architectural forms. The regional view entails giving clear definitions of the ambiguous terms architectural school and tradition, explaining the origins and shaping impulses for the different regional clusters of objects. Structurally, the book presents a history of the development of wooden church architecture in the Russian North and then follows the key points of the mediaeval Russian expansion along the waterways from Novgorod into the North: the Svir River, Lake Onega, the town of Kargopol and the River Onega, the White Sea, the Rivers Dvina, Pinega and Mezen – those areas that still retain the most splendid pieces of Russian regional wooden church architecture. The study is based on field research and provides an up-to-date multi-faceted view of Russian wooden architecture.

Russian Mediaeval Architecture with an Account of the Transcaucasian Styles and Their Influence in the West, **Russia** Richard Anderson, 2015-11-15. This book offers a comprehensive account of Russia's architectural production from the late nineteenth century to the present, explaining how its architecture was both shaped by and came to embody Russia's rapid cultural, economic and social revolutions over the past century. Richard Anderson looks at Russia's complex relationship to global architectural culture, exploring the country's central presence in the Rationalism and Constructivism movements of the 1920s as well as its role as a key protagonist during the Cold War. Looking deeply at Soviet Russia, he brings the relationship between architecture and socialism into focus through detailed case studies that situate buildings and architectural concepts within the socialist milieu of Soviet society. He tracks the way Russian architectural institutions departed from the course of modernism being developed in capitalist countries and he reappraises the architecture of the Stalin era and the final decades of the USSR. Finally, he traces the influence of Soviet conventions on contemporary Russian architecture, which is now a more heterogeneous mix of approaches and styles, and how it made a lasting and little-known impact on territories extending from the Middle East to Central Asia and into China. A bold new assessment of Russia's architectural legacy and contemporary contributions, this book is a fascinating exploration of a tumultuous place and the creativity that has come from it.

architectural setting for the splendours and extravagances of her court most especially the two luxurious palace ensembles outside St Petersburg at Tsarskoye Selo and Pavlovsk His reputation prior to his arrival in Russia was based almost entirely on his authorship of a book on the baths of ancient Rome he had built nothing as yet but while serving as Architect to Her Imperial Majesty Cameron was responsible for some of the most dazzling and original architectural creations of the eighteenth century This book tells a fascinating story of enterprise initiative amazing patronage and very remarkable architectural achievements on a large scale all of which took place within a unique historical and cultural context Dimitri Shvidkovsky weaves together the intriguing and still not completely documented biography of an enigmatic architect possibly a Jacobite rebel and exile and the life of the great Russian ruler Catherine II This is set against the backdrop of the rapidly developing influence of British culture on Russian society Architects park designers and gardeners from England and Scotland were to be found in every part of Russia by the end of the eighteenth and the beginning of the nineteenth century helping to establish a particular form of design whose cultural impact was made all the more dramatic by its adoption and development by native Russian architects and designers This book ravishly illustrated with views of the palaces and gardens of imperial Russia many now destroyed places Russian architecture and garden design of the neo classical period within its European context for the first time and explores the hitherto neglected connections between British and Russian architecture of the late eighteenth and early nineteenth centuries It offers a fascinating and original account of Russian culture in this period
