F. Connolly, 1960 *Value Added Products From Food Waste* Elsa Cherian, Baskar Gurunathan, 2024-03-21 The rapid increase in industrial processes for the preparation and processing of various food products have resulted in the creation of large quantities of waste These food wastes contain large amounts of nutrients which can be further converted into useful products making byproduct technology increasingly important Byproducts produced from various agro based industries like cereals fruits vegetable processing fish meat and poultry can be converted into beneficial products For instance cereal and legume processing produces large quantities of wastes which can result in environmental problems affecting air soil and water quality These wastes can be efficiently utilized and converted into value added products such as bioethanol butanol biohydrogen biogas biocoal industrially treasured enzymes biofertilizer proteins and organic acids Value Added Products From Food Waste covers waste management techniques utilized for managing raw materials in the food industry in an efficient way recovering and reusing waste or neutralizing unwanted components Chapters focus on the latest technologies and efficient management systems in all areas of food processing that make this process economical and minimize the hazards caused by the deposition of waste From the dairy industry to cereals to fruits

and vegetables to fish each aspect of the food industry is examined with an eye for how to utilize food waste transforming these wastes into value added products

Analog for Planetary Exploration W. Brent Garry, Jacob E. Bleacher, 2011 Where on Earth is it like Mars How were the Apollo astronauts trained to be geologists on the Moon Are volcanoes on Earth just like the ones on other planets The exploration of our solar system begins in our own backyard Discoveries on other planetary bodies cannot always be easily explained Therefore geologic sites on this planet are used to better understand the extraterrestrial worlds we explore with humans robots and satellites

Analog for Planetary Exploration is a compilation of historical accounts of astronaut geology training overviews of planetary geology research on Mars educational field trips to analog sites plus concepts for future human missions to the Moon This Special Paper provides a great overview of the science training and planning related to planetary exploration for students educators researchers and geology enthusiasts After all as we learn about the solar system we can better understand our own planet Earth
