Models And Experiments In Risk And Rationality:

Models and Experiments in Risk and Rationality Bertrand Munier, Mark Machina, 1994-10-31 Models and Experiments in Risk and Rationality presents original contributions to the areas of individual choice experimental economics operations and analysis multiple criteria decision making market uncertainty game theory and social choice The papers which were presented at the FUR VI conference are arranged to appear in order of increasing complexity of the decision environment or social context in which they situate themselves The first section Psychological Aspects of Risk Bearing considers choice at the purely individual level and for the most part free of any specific economic or social context The second section examines individual choice within the classical expected utility approach while the third section works from a perspective that includes non expected utility preferences over lotteries Section four Multiple Criteria Decision Making Under Uncertainty considers the more specialized but crucial context of uncertain choice involving tradeoffs between competing criteria a field which is becoming of increasing importance in applied decision analysis The final two sections examine uncertain choice in social or group contexts *Insurance Economics* Peter Zweifel, Roland Eisen, David L. Eckles, 2021-10-05 Insurance Economics brings together the economic analysis of decision making under risk risk management and demand for insurance among individuals and corporations objectives pursued and management tools used by insurance companies the regulation of insurance and the division of labor between private and social insurance Appropriate both for advanced undergraduate and graduate students of economics management and finance this text provides the background required to understand current research Predictions derived from theoretical arguments are not merely stated but also related to empirical evidence Throughout the book conclusions summarize key results helping readers to check their knowledge and comprehension Issues discussed include paradoxes in decision making under risk and attempts at their resolution moral hazard and adverse selection including the possibility of a death spiral and future challenges to both private and social insurance such as globalization and the availability of genetic information This second edition has been extensively revised Most importantly substantial content has been added to represent the evolution of risk related research A new chapter Insurance Demand II Nontraditional Approaches provides a timely addition in view of recent developments in risk theory and insurance Previous discussions of Enterprise Risk Management long term care insurance adverse selection and moral hazard have all been updated In an effort to expand the global reach of the text evidence and research from the U S and China have also been added **The New Palgrave Dictionary of Economics** ,2016-05-18 The award winning The New Palgrave Dictionary of Economics 2nd edition is now available as a dynamic online resource Consisting of over 1 900 articles written by leading figures in the field including Nobel prize winners this is the definitive scholarly reference work for a new generation of economists Regularly updated This product is a subscription based product Models of Risk Preferences Glenn W. Harrison, Don Ross, 2023-10-23 Models of Risk Preferences collects studies that critically review

alternatives to Expected Utility Theory from the perspective of experimental economics Rational Risk Policy W. Kip Viscusi, 1998-03-12 This book provides a comprehensive and accessible synthesis of Viscusi's 1996 Arne Ryde Memorial lectures on risk policy In this volume Viscusi explores the various forms of irrationality exemplified in individual risk behavior and the role government policy has played in institutionalizing these biases He examines the implications for government policy of consumers and workers risk beliefs and behavioral responses to risk In addition to a critique of current risk analysis practices he suggests strategies for rational risk management including hazard warnings efforts direct regulation and liability as alternative modes of intervention **Analyzing Rational Crime — Models and Methods** Olof

Dahlbäck, 2013-04-17 Olof Dahlbäck's book breaks new ground for the analysis of crime from a rationality perspective by presenting models and methods that go far beyond those with which researchers have hitherto been equipped The book examines single crimes individual criminality and societal crime and it discusses thoroughly the general decision theoretical presuppositions necessary for analyzing these various types of crime An expected utility maximization model for a single discrete choice regarding the commission of a crime is the foundation of most of the analyses presented A version of this model is developed that permits interpersonal comparisons and this basic model is used when deriving more complex models of crime as well as when analyzing the potential for such derivations The rigorous powerful methods suggested provide considerable opportunities for improving research and for seeing old problems in a new light The Handbook of

Experimental Economics John H. Kagel, Alvin E. Roth, 2020-05-05 This book which comprises eight chapters presents a comprehensive critical survey of the results and methods of laboratory experiments in economics The first chapter provides an introduction to experimental economics as a whole with the remaining chapters providing surveys by leading practitioners in areas of economics that have seen a concentration of experiments public goods coordination problems bargaining industrial organization asset markets auctions and individual decision making The work aims both to help specialists set an agenda for future research and to provide nonspecialists with a critical review of work completed to date Its focus is on elucidating the role of experimental studies as a progressive research tool so that wherever possible emphasis is on series of experiments that build on one another The contributors to the volume Colin Camerer Charles A Holt John H Kagel John O Ledyard Jack Ochs Alvin E Roth and Shyam Sunder adopt a particular methodological point of view the way to learn how to design and conduct experiments is to consider how good experiments grow organically out of the issues and hypotheses they are designed to investigate *Preference Modeling* Denis Bouyssou, 1998 **The Varieties of Economic Rationality**

Michel Zouboulakis, 2014-01-21 The concept of economic rationality is important for the historical evolution of Economics as a scientific discipline The common idea about this concept even between economists is that it has a unique meaning which is universally accepted This new volume argues that economic rationality is not not a universal concept with one single meaning and that it in fact has different if not conflicting interpretations in the evolution of discourse on economics In order

to achieve this the book traces the historical evolution of the concept of economic rationality from Adam Smith to the present taking in thinkers from Mill to Friedman and encompassing approaches from neoclassical to behavioural economics The book charts this history in order to reveal important instances of conceptual transformation of the meaning of economic rationality In doing so it presents a uniquely detailed study of the historical change of the many faces of the homo oeconomicus The Ten Commandments of Risk Leadership Annette Hofmann,2022-02-19 We as humans are prone to a variety of wired in cognitive mistakes in the way we interpret and react to risk related information This is highly consequential since the cognitive biases managers are exposed to in their day to day business erode the objectivity of their risk related decisions which ultimately hurts the financial well being of their firms This book seeks to develop risk literacy as a leadership skill It helps managers develop the skills to improve managerial decision making in regards to managing risk The last decades have offered various insights into how human nature often gets in the way of rational decision making This book is a valuable resource for insurance executives chief risk officers company leaders and graduate students of risk management and risk psychology It is the first behavioral risk management guide for managers and other interested readers using examples from economic theory behavioral finance and game theory it studies the hidden forces that drive our decision making processes under risk **The Limits of Rationality** Karen Schweers Cook,Margaret Levi,2008-10-03 Prevailing economic theory presumes that agents act rationally when they make decisions striving to maximize the efficient use of their resources Psychology has repeatedly challenged the rational choice paradigm with persuasive evidence that people do not always make the optimal choice Yet the paradigm has proven so successful a predictor that its use continues to flourish fueled by debate across the social sciences over why it works so well Intended to introduce novices to rational choice theory this accessible interdisciplinary book collects writings by leading researchers The Limits of Rationality illuminates the rational choice paradigm of social and political behavior itself identifies its limitations clarifies the nature of current controversies and offers suggestions for improving current models In the first section of the book contributors consider the theoretical foundations of rational choice Models of rational choice play an important role in providing a standard of human action and the bases for constitutional design but do they also succeed as explanatory models of behavior Do empirical failures of these explanatory models constitute a telling condemnation of rational choice theory or do they open new avenues of investigation and theorizing Emphasizing analyses of norms and institutions the second and third sections of the book investigate areas in which rational choice theory might be extended in order to provide better models The contributors evaluate the adequacy of analyses based on neoclassical economics the potential contributions of game theory and cognitive science and the consequences for the basic framework when unequal bargaining power and hierarchy are introduced *A Behavioral Economics Approach to Interactive Information Retrieval* Jiqun Liu,2023-02-17 This book brings together the insights from three different areas Information Seeking and Retrieval Cognitive Psychology and Behavioral Economics and shows how this

new interdisciplinary approach can advance our knowledge about users interacting with diverse search systems especially their seemingly irrational decisions and anomalies that could not be predicted by most normative models The first part Foundation of this book introduces the general notions and fundamentals of this new approach as well as the main concepts terminology and theories The second part Beyond Rational Agents describes the systematic biases and cognitive limits confirmed by behavioral experiments of varying types and explains in detail how they contradict the assumptions and predictions of formal models in information retrieval IR The third part Toward A Behavioral Economics Approach first synthesizes the findings from existing preliminary research on bounded rationality and behavioral economics modeling in information seeking retrieval and recommender system communities Then it discusses the implications open questions and methodological challenges of applying the behavioral economics framework to different sub areas of IR research and practices such as modeling users and search sessions developing unbiased learning to rank and adaptive recommendations algorithms implementing bias aware intelligent task support as well as extending the conceptualization and evaluation on IR fairness accountability transparency and ethics FATE with the knowledge regarding both human biases and algorithmic biases This book introduces a behavioral economics framework to IR scientists seeking a new perspective on both fundamental and new emerging problems of IR as well as the development and evaluation of bias aware intelligent information systems It is especially intended for researchers working on IR and human information interaction who want to learn about the potential offered by behavioral economics in their own research areas

Neuronal and Psychological Underpinnings of Pathological Gambling Bryan F Singer, Patrick Anselme, Mike James Ferrar Robinson, Paul Vezina, 2014-11-04 Like in the case of drugs gambling hijacks reward circuits in a brain which is not prepared to receive such intense stimulation Dopamine is normally released in response to reward and uncertainty in order to allow animals to stay alive in their environment where rewards are relatively unpredictable In this case behavior is regulated by environmental feedbacks leading animals to persevere or to give up In contrast drugs provide a direct intense pharmacological stimulation of the dopamine system that operates independently of environmental feedbacks and hence causes motivational runaways With respect to gambling the confined environment experienced by gamblers favors the emergence of excitatory conditioned cues so that positive feedbacks take over negative feedbacks Although drugs and gambling may act differently their abnormal activation of reward circuitry generates an underestimation of negative consequences and promotes the development of addictive compulsive behavior In Parkinson s and Huntington s disease dopamine related therapies may disrupt these feedbacks on dopamine signalling potentially leading to various addictions including pathological gambling The goal of this Research Topic is to further our understanding of the neurobiological mechanisms underlying the development of pathological gambling This eBook contains a cross disciplinary collection of research and review articles ranging in scope from animal behavioral models to human imaging studies

Readings in Risk Theodore S. Glickman, Michael Gough, 1990

First Published in 1990 Routledge is an imprint of Taylor Francis an informa company Risk Analysis and Portfolio Modelling Elisa Luciano,David Allen,2019-10-16 Financial Risk Measurement is a challenging task because both the types of risk and the techniques evolve very quickly This book collects a number of novel contributions to the measurement of financial risk which address either non fully explored risks or risk takers and does so in a wide variety of empirical contexts

Behavioral Economics and Smart Decision-Making Ankal Ahluwalia,2025-01-03 The illustrations in this book are created by Team Educocohack Behavioral Economics and Smart Decision Making explores the modern approach to economics emphasizing the impact of psychology and human behavior We delve into various theories within this field including Prospect Theory measurement principles and heuristics and biases Our book also discusses how behavioral management modernizes traditional management practices Designed to enhance understanding this book is an essential resource for anyone interested in the intersection of economics and psychology Elgar Encyclopedia of Behavioural and Experimental Economics

Swee-Hoon Chuah,Robert Hoffmann,Ananta Neelim,2025-02-12 This Encyclopedia presents a comprehensive account of the complementary forces of behavioural economics a novel field combining psychological insights with analytical economic thinking and experimental economics **A Comprehensive Assessment of the Role of Risk in U.S.**

Agriculture Richard E. Just,Rulon D. Pope,2013-11-11 After all the research on agricultural risk to date the treatment of risk in agricultural research is far from harmonious Many competing risk models have been proposed Some new methodologies are largely untested Some of the leading empirical methodologies in agricultural economic research are poorly suited for problems with aggregate data where risk averse behavior is less likely to be important This book is intended to i define the current state of the literature on agricultural risk research ii provide a critical evaluation of economic risk research on agriculture to date and iii set a research agenda that will meet future needs and prospects This type of research promises to become of increasing importance because agricultural policy in the United States and elsewhere has decidedly shifted from explicit income support objectives to risk related motivations of helping farmers deal with risk Beginning with the 1996 Farm Bill the primary set of policy instruments from U S agriculture has shifted from target prices and set aside acreage to agricultural crop insurance Because this book is intended to have specific implications for U S agricultural policy it has a decidedly domestic scope but clearly many of the issues have application abroad For each of the papers and topics included in this volume individuals have been selected to give the strongest and broadest possible treatment of each facet of the problem The result is this comprehensive reference book on the economics of agricultural risk *The Handbook of Rational and Social Choice*

Paul Anand,Prasanta Pattanaik,Clemens Puppe,2009-01-15 This volume provides an overview of issues arising in work on the foundations of decision theory and social choice The collection will be of particular value to researchers in economics with interests in utility or welfare but also to any social scientist or philosopher interested in theories of rationality or group decision making Methods in Experimental Economics Joachim Weimann,Jeannette

Brosig-Koch,2019-07-12 This textbook provides a hands on and intuitive overview of the methodological foundations of experimental economics Experimental economic research has been an integral part of economic science for quite some time and is gaining more and more attention in related disciplines The book addresses the design and execution of experiments the evaluation of experimental data and the equipment of an experimental laboratory It illustrates the challenges involved in designing and conducting experiments and helps the reader to address them in practice
