and contemporary geographies of science It offers a fresh perspective on comparative approaches to scientific knowledge and practice as pursued by geographers sociologists anthropologists and historians of science The authors explore the formation and changing geographies of scientific centers from the sixteenth to the twentieth centuries and critically discuss the designing of knowledge spaces in early museums in modern laboratories at world fairs and in the periphery of contemporary science They also analyze the interactions between science and the public in Victorian Britain interwar Germany and recent environmental policy debates The book provides a genuine geographical perspective on the production and dissemination of knowledge and will thus be an important point of reference for those interested in the spatial relations of science and associated fields The Klaus Tschira Foundation supports diverse symposia the essence of which is published in this Springer series www.kts.villa-bosch.de

Landscape and History since 1500 Ian D. Whyte, 2004-03-03 Landscape and History explores a complex relationship over the past five centuries The book is international and interdisciplinary in scope drawing on material from social economic and cultural history as well as from geography archaeology cultural geography planning and landscape history In recent years as the author points out there has been increasing interest in and concern for many aspects of landscape within British European and wider contexts This has included the study of the history development and changes in our perception of landscape as well as research into the links between past landscapes and political ideologies economic and social structures cartography art and literature There is also considerable concern at present with the need to evaluate and classify historic landscapes and to develop policies for their conservation and management in relation to their scenic heritage and recreational value This is manifest not only in the designation of particularly valued areas with enhanced protection from planning developments such as national parks and world heritage sites but in the countryside more generally Further Ian D Whyte argues changes in European Union policies relating to agriculture with a greater concern for the protection and sustainable management of rural landscapes are likely to be of major importance in relation to the themes of continuity and change in the landscapes of Britain and Europe

Dead Sea Level Haim Goren, 2011-02-28 In the nineteenth century The Dead Sea and the Tigris Euphrates river system had great political significance the one as a possible gateway for a Russian invasion of Egypt the other as a potentially faster route to India This is the traditional explanation for the presence of the international powers in the region This important new book questions this view Through a study of two important projects of the time international efforts to determine the exact level of the Dead Sea and Chesney's Euphrates Expedition to find a quicker route to India Professor Goren shows how other forces than the interests of empire were involved He reveals the important role played by private individuals and establishes a wealth of new connections between the key players and he reveals for the first time an important Irish nexus The resulting work adds an important new dimension to our existing understanding of this period
