academia and the military and represent some of the world's leading proponents on the subject. All significant eras on air power employment are examined; some are evidently turning points while others represent continuous development. Perhaps more importantly, the book highlights the areas that could be considered to be significant and invites the reader to enter the debate as to whether it constitutes a continuum, a turning point, or indeed a revolution. China's Air Power and Maritime Strategies Towards the Indian Ocean Region Joshy M. Paul, 2025-02-03. This book examines China's naval and airpower strategic direction towards the Indian Ocean region. It discusses China's military modernization program along with naval and airpower capabilities including expeditionary nature. It analyses China's attempt to gain a strategic dominance in the IOR by means of investments and trade with the littoral countries, military diplomatic relationship with friendly countries, permanent presence of naval systems in the Indian Ocean, and delivering public goods throughout the region. A comparative analysis of People's Liberation Army Air Force (PLAAF) expeditionary capabilities and Indian Air Force's (IAF) deterrence mechanisms is also included.
