From the City as a Project to the City Project Fernando Carrión Mena, Sebastián Rodríguez Alvarez, 2025-09-26 The city has historically been conceived as a project with a sense of duty to be it is the prefiguration of a reality that emerges from the negation of the pre existing city The city anticipates a desired future from an ideal perspective that tends to overcome the existing structural or particular challenges of the present It can be argued that this proposition represents the historical trajectory of urban thought on a planetary scale Therefore the prospective dimension of the city constituted a central dynamic in urban theory throughout history leading to the emergence of planning as a key approach The history of the city as a project is the core of the first volume in this two part contribution It presents an overview of diverse city projects that have been pursued throughout history providing a framework for exploring new perspectives of urban development The cities profiled and analyzed here reflect a living catalog of initiatives that can inform promising directions More than a compilation this volume compares and critically assesses these historical projects to provide a grounding for the contemporary advances presented in the second volume

Michel de Guerrero,2014 Paris Monographs in American Archaeology 38 This volume closely examines and catalogs a limited set of glyphic elements found at the archaeological site of Teotihuacan in Mexico This study serves as an initial investigation to verify whether these glyphs may be part of a writing system in use at the site The author looks at two specific sources of glyphs and glyph compounds at Teotihuacan that appear to be the largest sets of co occurring glyphs and contain the largest number of glyphs One set in particular has not yet been studied in detail and therefore will present new information within this area of research Furthermore there has not been a steady or significant amount of glyphic research carried out at Teotihuacan in recent years since Taube 2000 The investigation was structured to thoroughly analyze the data for similarities between the selected glyphic elements from Teotihuacan and the requirements for writing systems For that reason basic linguistic tests were conducted on the data to determine whether the glyphic elements had similarities with those requirements for Mesoamerican writing systems This work is not a decipherment Instead its aim is to verify whether the glyphic elements at Teotihuacan could potentially be a writing system catalog them in an orderly fashion conduct a comparative analysis between them and others found within Teotihuacan and elsewhere in Mesoamerica and conclude whether further research in the way of a complete decipherment is a possibility if future data is uncovered at the site
