Quasilinear Hyperbolic Systems And Dibipation Mechanism:

Quasilinear Hyperbolic Systems and Waves Alan Jeffrey, 1976 The solution to quasilinear first order hyperbolic systems of equations may be interpreted in terms of waves which belong to a certain function class and propagate in some suitable space the work all has a common feature the fact that it adds to the understanding of what may be called nonlinear wave propagation preface *Theory and Application of Hyperbolic Systems of Quasilinear Equations* Hyun-Ku Rhee, Rutherford Aris, Neal Russell Amundson, 1986 **Global Classical Solutions for Quasilinear Hyperbolic Systems** Daqian

Li, 1994-09-06 A systematic presentation of the global classical solution and the global classical discontinuous solution to quasilinear hyperbolic systems This book is a result of the author's research on the Cauchy problem boundary value problems free boundary problems and the generalised Riemann problem Exact Boundary Controllability of Nodal Profile for Quasilinear Hyperbolic Systems Tatsien Li, Ke Wang, Qilong Gu, 2016-11-08 This book provides a comprehensive overview of the exact boundary controllability of nodal profile a new kind of exact boundary controllability stimulated by some practical applications This kind of controllability is useful in practice as it does not require any precisely given final state to be attained at a suitable time $t \leq T$ by means of boundary controls instead it requires the state to exactly fit any given demand profile on one or more nodes after a suitable time $t \leq T$ by means of boundary controls In this book we present a general discussion of this kind of controllability for general 1 D first order quasilinear hyperbolic systems and for general 1 D quasilinear wave equations on an interval as well as on a tree like network using a modular structure constructive method suggested in Li Tatsien's monograph Controllability and Observability for Quasilinear Hyperbolic Systems 2010 and we establish a complete theory on the local exact boundary controllability of nodal profile for 1 D quasilinear hyperbolic systems

Quasilinear Hyperbolic System and Waves Alan Jeffrey, 1976 *Cauchy Problem for Quasilinear Hyperbolic Systems* De-xing Kong, 2000-12 This book is concerned with Cauchy problem for quasilinear hyperbolic systems By introducing the concepts weak linear degeneracy and matching condition we give a systematic presentation on the global existence the large time behaviour and the blow up phenomenon particularly the life span of C^1 solutions to the Cauchy problem with small and decaying initial data Some successful applications of our general theory are given to the quasilinear canonical system related to the Monge Ampère equation the system of nonlinear three wave interaction in plasma physics the nonlinear wave equation with higher order dissipation the system of one dimensional gas dynamics with nonlinear dissipation the system of motion of an elastic string the system of plane elastic waves for hyperelastic materials and so on *Quasilinear Hyperbolic Systems with Involutions* Constantine M.
