Singh, Pratap Singh, Umesh K. Haritashya, 2011-06-29 The earth's cryosphere which includes snow glaciers ice caps ice sheets ice shelves sea ice river and lake ice and permafrost contains about 75% of the earth's fresh water It exists at almost all latitudes from the tropics to the poles and plays a vital role in controlling the global climate system It also provides direct visible evidence of the effect of climate change and therefore requires proper understanding of its complex dynamics This encyclopedia mainly focuses on the various aspects of snow ice and glaciers but also covers other cryospheric branches and provides up to date information and basic concepts on relevant topics It includes alphabetically arranged and professionally written comprehensive and authoritative academic articles by well known international experts in individual fields The encyclopedia contains a broad spectrum of topics ranging from the atmospheric processes responsible for snow formation transformation of snow to ice and changes in their properties classification of ice and glaciers and their worldwide distribution glaciation and ice ages glacier dynamics glacier surface and subsurface characteristics geomorphic processes and landscape formation hydrology and sedimentary systems permafrost degradation hazards caused by cryospheric changes and trends of glacier retreat on the global scale along with the impact of climate change This book can serve as a source of reference at the undergraduate and graduate level and help to better understand snow ice and glaciers It will also be an indispensable tool containing specialized literature for geologists geographers climatologists hydrologists and water resources engineers as well as for those who are engaged in the practice of agricultural and civil engineering earth sciences environmental sciences and engineering ecosystem management and other relevant subjects      Tales of Three Worlds - Archaeology and Beyond: Asia, Italy, Africa Donatella Usai, Stefano Tuzzato, Massimo Vidale, 2020-01-31 This book presents a series of papers in honour of Sandro Salvatori divided into three main sections reflecting his long years of work in Middle Asia his time in Italy as an officer of the Archaeological Superintendency Ministry of Cultural Heritage and finally his studies on the prehistory of north eastern Africa      **Geological Survey Bulletin** ,1988      **U.S. Geological Survey Bulletin** ,1983

**Climate Changes during the Holocene and their Impact on Hydrological Systems** Arie S. Issar, 2004-08-05 It is now widely accepted that increasing concentrations of greenhouse gases in the atmosphere are causing higher global atmospheric temperatures However there is still a great deal of uncertainty about the likely effects of such a temperature rise on climate and even more about the impacts of climate change and variability on the world's hydrological regimes and socio economic systems Studying the effects of climate variability in the past can give clues as to possible future effects This volume provides a comprehensive review of the effects of climate variability on hydrological and human systems in the Holocene the last 10 000 years in various parts of the world The book concentrates on the regions bordering the

Mediterranean Sea western and central Europe China Japan West and South Africa and the southwestern USA This book will be of value to researchers and professionals in hydrology climatology geology and historical geography Human Paleontology and Prehistory Assaf Marom,Erella Hovers,2017-01-24 The aim of the book is to present original and though provoking essays in human paleontology and prehistory which are at the forefront of human evolutionary research in honor of Professor Yoel Rak a leading scholar in paleoanthropology The volume presents a collection of original papers contributed by many of Yoel s friends and colleagues from all over the globe Contributions from experts around the globe fall roughly into three broad categories Reflections on some of the broad theoretical questions of evolution and especially about human evolution the early hominins with special emphasis on Australopithecus afarensis and Paranthropus and the Neanderthals that contentious group of our closest extinct relatives Within and across these categories nearly every paper addresses combinations of methodological analytical and theoretical questions that are pertinent to the whole human evolutionary time span This book will appeal most to scholars and advanced students in paleoanthropology human paleontology and prehistoric archaeology **American Book Publishing Record** ,2001 **Stable Isotope Studies of the Water Cycle and Terrestrial Environments** A-V. Bojar,A. Pelc,C. Lécuyer,2021-11-09 This volume is devoted to Earth surface environmental reconstructions and environmental changes that may be deciphered and modelled using stable isotopes along with mineralogical chemical sedimentological palaeontological biological and climatological methodologies The book is divided into two sections both using stable isotopes see [www.geolsoc.org.uk/SP507](http://www.geolsoc.org.uk/SP507) in various samples and phases as the main research tool The first section is devoted to studies focusing on the distribution of isotopes in precipitation groundwater lakes rivers springs tap water mine water and their relationship with terrestrial environments at regional to continental scale In relation to this the second section includes case studies from a range of continental settings investigating cave deposits stalagmites bat guano animal skeletons dinosaurs alligators turtles bivalves present and past soils palaeosols and limestones The sections focus on the interaction between the surficial water cycle and underground water storage with deposits acting as archives of short to long term climatic and environmental changes Examples from the Early Cretaceous to present time come from Europe Asia Africa North and South America Sustainable Energy and Environment Sandeep Narayan Kundu,Muhammad Nawaz,2019-09-20 Here is a comprehensive introductory discussion of Earth energy and the environment in an integrated manner that will lead to an appreciation of our complex planet The book looks at Earth from the perspective of a livable planet and elaborates on the surface and subsurface processes and the various energy cycles where energy is transformed and stored in the planet s various spheres The chapters discuss the interactions between the different parts of Earth how energy is exchanged between the atmosphere hydrosphere biosphere and geosphere and how they impact the environment in which we live **U.S. Geological Survey Professional Paper** ,1984
