**The Quaternary** Kalervo Rankama, 1961      **Collected Works on China's Loess Soil**, 1967      **Computational Chemistry: Reviews Of Current Trends, Vol. 1** Nicholas Bodor, Jiri Sponer, Eric Schwegler, Jean-louis Rivail, Daniel Rinaldi, Paul G Mezey, Jerzy Leszczynski, Boggavarapu Kiran, Uzi Kaldor, Eluvathingal D Jemmis, Ming-ju Huang, Pavel Hobza, Matt Challacombe, Yasuyuki Ishikawa, 1996-02-16 This book presents an overview of recent progress in computational techniques as well as examples of the application of existing computational methods in different areas of chemistry physics and biochemistry Introductory chapters cover a broad range of fundamental topics including state of the art basis set expansion methods for computing atomic and molecular electronic structures based on the use of relativistic quantum mechanics the most recent developments in Hartree Fock methods particularly in techniques suited for very large systems the current analysis of the solute solvent free energy of interaction and the physical bases used to evaluate the electrostatic cavitation and dispersion terms an introduction to the additive fuzzy electron density fragmentation scheme within various ab initio Hartree Fock quantum chemical computational schemes which has provided the means for generating representative molecular fragment densities characteristic to their local environment within a molecule This book also features a review of recent ab initio calculations on the structure and interactions of DNA bases a chapter on computational approaches to the design of safer drugs and their molecular properties and a systematic conceptual study on a route which allows one to stuff fullerenes

**European Glacial Landscapes** David Palacios, Philip D. Hughes, Jose M. Garcia-Ruiz, Nuria de Andrés, 2021-11-19 European Glacial Landscapes Maximum Extent of Glaciations brings together relevant experts on the history of glaciers and their impact on the landscape of the main regions of Europe In some regions the largest recorded glaciations occurred before the Last Glacial Cycle in one of the major glacial cycles of the Middle Pleistocene However the best preserved evidence of glaciation in the landscape is from the Last Glacial Cycle Late Pleistocene The book also analyses these older glacial landforms that can sometimes still be seen in the landscape today This analysis provides a better understanding of the succession of Pleistocene glaciations and the intervening interglacial periods examining their possible continental synchrony or asynchrony of past glacier behaviour The result of this analysis gives important new insights and information on the origin and effects of climatic and geomorphological variability across Europe European Glacial Landscapes Maximum Extent of Glaciations examines the landscapes produced by glaciers throughout Europe the geomorphological effects of glaciations as well as the chronology and evolution of the past glaciers with the aim of understanding the interrelationship between glacial expansion and climate changes on this continent This book is a valuable tool for geographers geologist environmental scientists researchers in physics and earth sciences Provides a synthesis that highlights the main similarities or differences through both space and time during the maximum recorded expansions of Pleistocene glaciers in Europe Features research from experts in glacial geomorphology palaeo glaciology palaeo climatology

and palaeo oceanography on glacial expansion in Europe Includes detailed color figures and maps providing a comprehensive comparison of the glacial landscapes of European Pleistocene glaciers      *Proceedings-- Symposium on Whitebark Pine Ecosystems* ,1990      **New Mexico's Ice Ages** Spencer G. Lucas,Gary S. Morgan,Kate E. Zeigler,2005-01-01      *The Earth as Transformed by Human Action* B. L. Turner,William C. Clark,Robert W. Kates,John F. Richards,Jessica T. Mathews,William B. Meyer,1993-01-29 The Earth as Transformed by Human Action is the culmination of a mammoth undertaking involving the examination of the toll our continual strides forward technical and social take on our world The purpose of such a study is to document the changes in the biosphere that have taken place over the last 300 years to contrast global patterns of change to those appearing on a regional level and to explain the major human forces that have driven these changes The first section deals strictly with the major human forces of the past 300 years and the second is a detailed account of the transformations of the global environment wrought by human action The final section examines a range of perspectives and theories that purport to explain human actions with regard to the biosphere      **Publications of the Geological Survey** Geological Survey (U.S.),1990      **A Concise Geologic Time Scale** J.G. Ogg,Gabi M. Ogg,Felix Gradstein,2016-05-13 A Concise Geologic Time Scale 2016 presents a summary of Earth s history over the past 4 5 billion years as well as a brief overview of contemporaneous events on the Moon Mars and Venus The authors have been at the forefront of chronostratigraphic research and initiatives to create an international geologic time scale for many years and the charts in this book present the most up to date international standard as ratified by the International Commission on Stratigraphy and the International Union of Geological Sciences This book is an essential reference for all geoscientists including researchers students and petroleum and mining professionals The presentation is non technical and illustrated with numerous colour charts maps and photographs Presents a summary of Earth s history over the past 4 5 billion years Includes a brief overview of contemporaneous events on the Moon Mars and Venus Includes full color figures including charts stratigraphic profiles and photographs to enhance understanding of each geologic period Correlates regional geologic stages to the standard definitions approved by the International Commission on Stratigraphy Offers an explanation of the methods used to create the time scale 2017 PROSE Award Finalist in Earth Science      **The Last Interglacial-Glacial Transition in North America** Peter U. Clark,Peter D. Lea,1992-01-01 Focuses on the last time glaciers spread across the continent using the records of former ice sheets glaciers and pluvial lakes to understand the response of North American ice sheets and glaciers to the climate change that ended the last before ours interglacial period The 21 papers most fro      **Ecology and Management of Larix Forests** ,1995      **Studies of Geology and Hydrology in the Basin and Range Province, Southwestern United States, for Isolation of High-level Radioactive Waste--basis of Characterization and Evaluation** M. S. Bedinger,1989      *Late Cretaceous and Cenozoic History of North American Vegetation* Alan Graham,1999-03-25 This book is a unique and integrated account of the history of North American vegetation and

paleoenvironments over the past 70 million years It includes discussions of the modern plant communities causal factors for environmental change biotic response and methodologies The history reveals a North American vegetation that is vast immensely complex and dynamic

**General Technical Report INT. ,1995      Mobility and Ancient Society in Asia and the Americas** Michael David Frachetti,Robert N. Spengler III,2015-07-20 Mobility and Ancient Society in Asia and the Americas contains contributions by leading international scholars concerning the character timing and geography of regional migrations that led to the dispersal of human societies from Inner and northeast Asia to the New World in the Upper Pleistocene ca 20 000 15 000 years ago This volume bridges scholarly traditions from Europe Central Asia and North and South America bringing different perspectives into a common view The book presents an international overview of an ongoing discussion that is relevant to the ancient history of both Eurasia and the Americas The content of the chapters provides both geographic and conceptual coverage of main currents in contemporary scholarly research including case studies from Inner Asia Kazakhstan southwest Siberia northeast Siberia and North and South America The chapters consider the trajectories ecology and social dynamics of ancient mobility communication and adaptation in both Eurasia and the Americas using diverse methodologies of data recovery ranging from archaeology historical linguistics ancient DNA human osteology and palaeoenvironmental reconstruction Although methodologically diverse the chapters are each broadly synthetic in nature and present current scholarly views of when and in which ways societies from northeast Asia ultimately spread eastward and southward into North and South America and how we might reconstruct the cultures and adaptations related to Paleolithic groups Ultimately this book provides a unique synthetic perspective that bridges Asia and the Americas and brings the ancient evidence from both sides of the Bering Strait into common focus

**The Physical Geography and Geology of the Driftless Area** Eric C. Carson,J. Elmo Rawling III,J. Michael Daniels,John W. Attig,2019-11-04 Over the course of his 43 year career James C Knox conducted seminal research on the geomorphology of the Driftless Area of southwestern Wisconsin His research covered wide ranging topics such as long term land scape evolution in the Driftless Area responses of floods to climate change since the last glaciation processes and timing of floodplain sediment deposition on both small streams and on the Mississippi River impacts of European settlement on the landscape and responses of stream systems to land use changes This volume presents the state of knowledge of the physical geography and geology of this unglaciated region in the otherwise glaciated Midwest with contributions written by Knox prior to his passing in 2012 and by a number of his former colleagues and graduate students

**Encyclopedia of Snow, Ice and Glaciers** Vijay P. Singh,Pratap Singh,Umesh K. Haritashya,2011-06-29 The earth s cryosphere which includes snow glaciers ice caps ice sheets ice shelves sea ice river and lake ice and permafrost contains about 75% of the earth s fresh water It exists at almost all latitudes from the tropics to the poles and plays a vital role in controlling the global climate system It also provides direct visible evidence of the effect of climate change and therefore requires proper understanding of its complex dynamics This

encyclopedia mainly focuses on the various aspects of snow ice and glaciers but also covers other cryospheric branches and provides up to date information and basic concepts on relevant topics It includes alphabetically arranged and professionally written comprehensive and authoritative academic articles by well known international experts in individual fields The encyclopedia contains a broad spectrum of topics ranging from the atmospheric processes responsible for snow formation transformation of snow to ice and changes in their properties classification of ice and glaciers and their worldwide distribution glaciation and ice ages glacier dynamics glacier surface and subsurface characteristics geomorphic processes and landscape formation hydrology and sedimentary systems permafrost degradation hazards caused by cryospheric changes and trends of glacier retreat on the global scale along with the impact of climate change This book can serve as a source of reference at the undergraduate and graduate level and help to better understand snow ice and glaciers It will also be an indispensable tool containing specialized literature for geologists geographers climatologists hydrologists and water resources engineers as well as for those who are engaged in the practice of agricultural and civil engineering earth sciences environmental sciences and engineering ecosystem management and other relevant subjects

*Engineering Geology of the Salt Lake City Metropolitan Area, Utah* William R. Lund, 1990 Geologic exposures in the Salt Lake City region record a long history of sedimentation and tectonic activity extending back to the Precambrian Era Today the city lies above a deep sediment filled basin flanked by two uplifted range blocks the Wasatch Range and the Oquirrh Mountains The Wasatch Range is the easternmost expression of major Basin and Range extension in north central Utah and is bounded on the west by the Wasatch fault zone WFZ a major zone of active normal faulting During the late Pleistocene Epoch the Salt Lake City region was dominated by a succession of inter basin lakes Lake Bonneville was the last and probably the largest of these lakes By 11 000 yr BP Lake Bonneville had receded to approximately the size of the present Great Salt Lake

*Theory and models in vegetation science* I.C. Prentice, E. van der Maarel, 2012-12-06 July 8 13 1985 an international group of scientists met in Uppsala for a symposium on the subject Theory and models in Vegetation science A volume of over 70 extended abstracts had already been published in time for the symposium Leemans et al 1985 That volume included contributions from nearly all of those who gave talks or presented posters at the symposium The present volume represents the fully refereed proceedings of the symposium and features articles by a majority of speakers plus a handful by poster authors and two that were sent independently to Vegetatio and seemed timely and relevant to the symposium's theme As organizers we tried to bring together for the symposium people whose interests covered several key aspects of modern vegetation science vegetation dynamics on shorter or longer time scales the analysis of community data and of vegetation environment relationships in both time and space and the functional basis of vegetation in terms of the individual plants and plant populations that it comprises We encouraged contributors to focus on theory and models not necessarily mathematical models but also conceptual models that might contribute to the development of theory and mathematical models
