Queen Mary's Grammar School, Clitheroe C. W. Stokes,1934 Education and Society in Tudor England Joan
Simon,1966 This book discusses educational developments during a crucial period of English history in their social context
revising a long standing interpretation of the effect of Reformation legislation Tracing trends from the fifteenth to the
seventeenth century it is in three parts The first considers the pattern in the later middle ages and the conditions favouring
the spread of humanist ideas which were to be adapted and applied at the Reformation In Part II there is a detailed survey of
measures taken under Henry VIII and during the reign of Edward VI when state intervention to control the organisation and
curriculum of schools and universities laid the foundations of the modern system of education Finally after a review of the
relation between educational and social change the focus is on three main aspects during the conservative Elizabethan age
consolidation of the school system the pattern devised for the institution of the gentleman the extension of the popular
education fostered by the puritan ethic and the pressure of practical needs forecasting the next major move for educational
reform in the mid seventeenth century **Sir Jonas Moore** Frances Willmoth,1993 Sir Jonas Moore 1617 79 practical
mathematician teacher author surveyor cartographer Ordnance Officer courtier and patron of astronomy enjoyed a
remarkable career by the standards of any age and was one of the first to make a substantial fortune from mathematical
practice In the course of his rise as his friend John Aubrey termed it from humble origins in Lancashire to a knighthood
membership of the Royal Society and favour at the court of Charles II he participated in the two most ambitious projects of
the age the draining of the Great Level of the Fens under the Dutch engineer Sir Cornelius Vermuyden and the building of a
massive harbour wall the Mole at Tangier In later life his wealth and influence as Surveyor General of the Ordnance enabled
him to become a patron of the new Royal Observatory at Greenwich This biography the first detailed study of Moore
examines his career in the context of changing views of mathematics especially in relation to 17th century disputes about the
proper nature of the discipline and its effectiveness as means of solving practical problems It sheds light on the roles played
by patrons and teachers of the subject most notably the figurehead of English mathematicians William Oughtred It also
illuminates the confidence in practical mathematics that inspired Moore's unique activities as a patron and the uneasy
relationship between this and the natural philosophical concerns of the early Royal Society This wide ranging study
challenges the current conventionally narrow view of mathematics in the time of the 17th century scientific revolution
