Sociology of Australian Education Tiffany Jones,2020-01-03 This book is based on a comparative study from 2018 of four different approaches to education according to 2 500 Australians experiences of them on a range of topics It shows that whilst the critical approach has strong research based support across the board sometimes a liberal conservative or post

modern approach may have some merit for certain outcomes This is a book about challenging our biases and calling on ourselves to aim higher for education than what our own pre conceived ideas might allow What and who is valued in education and the social roles and identity messages learned differ wildly from school to school Education is most impacted by the orientation of education dominant in that context whether conservative liberal critical or post modern These terms are often used with little practical data on the real life schooling they entail Who learns what in which approach Who learns best with which approach on which topic and why This book provides this previously missing information It offers holistic detailed descriptions of conservative liberal critical and post modern approaches to education broadly It provides statistics and stories from real students on how the four approaches work practically in schools in relation to age gender sexuality social class race news media popular culture and technology Chapters offer background information to the four perspectives data from student participants tutorial questions and activities and suggestions for further reading
