Matthew Wilhelm Kapell, 2010-03-16 In the past the examination of myth has traditionally been the study of the Primitive or the Other More recently myth has been increasingly employed in movies and in television productions Nowhere is this more apparent than in the Star Trek television and movie franchise This collection of essays on Star Trek brings together perspectives from scholars in fields including film anthropology history American studies and biblical scholarship Together the essays examine the symbolism religious implications heroic and gender archetypes and lasting effects of the Star Trek mythscape **Name-Given** David McLean, 2013-04-03 Cast into the night four young travellers must venture from the comfort of their villages to find their names Each has a staff a challenge and a history of riddling to help them on their way

But the press heavy sounds of animals approaching the limb sky of the forest and the fear of the unknown are all about How will they survive The answer may just be in the riddle What always runs but never walks often murmurs never talks has a bed but never sleeps has a mouth but never eats **The Healing Power of Community** Lusijah Marx, Graham Harriman, Robin McCoy Brooks, 2024-07-04 The Healing Power of Community offers a diverse cross section of interdisciplinary and depth psychological perspectives in support of using mutual aid approaches in all levels of group and community practice as a remedy for individualism and social and political divisions centering social justice Written by three distinct voices who collaborated at the height of the AIDS crisis the book begins with an autoethnographic study of Project Quest an HIV AIDS

clinic established in 1989 before looking at how the lessons learnt from this clinic can be applied to our current global mental health climate Filled with clinical and theoretical applications chapters include content on what mutual aid communities are rethinking professionalism and boundaries in a crisis healing collective trauma group psychotherapy psychodrama depth psychology and how mental health professionals can support radical change of key structures in nonprofit clinics public administration private practice and research Arguing for their approach of radicalizing mental health and community based practice today the book examines how this can be achieved by moving beyond individual level approaches creating new frameworks to meet the mental health needs of our era in creative ways This book is designed to engage clinical social workers and mental health care clinicians working in community based mental health as well as those involved in community psychology collective trauma and grief HIV AIDS advocacy policy making and political advocacy Memories Time Allow Yoseph T. Banks, 2006-02-15 Almost every short ditty confined within this book has arrived to me through my dreaming stages All of the people are simply figments of my dreaming imagination They are indeed fiction yet while dreaming through them they took on an almost non fiction realm Cold sweats and at times racing heart beats were my companions throughout my awakening Some left me with a sense of actually knowing who they were On all occasions I dreamt of them only once then they returned to wherever it was they emanated from What controlled my dreaming I may never understand Only a few times did the dream stop one morning only to continue the following night while I slept It was a kind of a too be continued later type scenario While I began to dream at the exact same spot I left the previous night I became a little confused It was if their story simply was not over until they thought it was I understand that probably sounds a little psychotic but that s how it came down I virtually had no control over it so I reasoned out nothing and simply dreamt Many stories have a haunting underlying sequence of death I know not why except for that all the people seemed to be coming back from somewhere A sense came to me of a graveyard of which is now their permanent residence None of them argued on my death assumption as they never really talked to me anyway They showed me what they had to say As with all dreams I was merely observing Few life forms within my dreams were angry but many seemed frustrated They would consult among themselves and at times look at me It s very difficult to say they were looking at me for I was in the dream as my own sight It s not hard to imagine seeing through a dream because we ve all done it Seeing is what we do in dreams and on rare occasions some people say that they have actually seen themselves I have never seen myself in any dream yet I exist within the dream as merely sight Kind of like life without a mirror to reflect myself upon Anyway other short pages are simply word interpretations and fragments of assumptions I simply picked then dissected words for my own personal amusement However at times other people within my dreams would offer their opinions relative to what I was writing Some of these folks in my dreams didn t stick around that long only a few seconds A hit and run deal best describes them These people would blatantly talk out loud for no apparent reason yet what they said made me discover some writing perspectives I never understood before Most times what was said

conveyed nicely onto the page I was writing Again I did not argue with the flow of what we accomplished I have to mention them for without their help I wouldn't have had much to write about A few of the pages are dedicated to soldiers Unfortunately the world still needs required army's Actually the world would do rather nicely without them for it is we who not the world in need of battle Three mentioned stories are about soldiers and unfortunately they are not stories on a female soldier The soldiers are men within the book One came from a very seemingly long dream and two came from partial dreaming I'll let you decide which is which Soldiers and death are long acquaintances that only time can control Actually timing and a soldier's death are one in the same For whatever reason the death undertones arrived on my pages it became written equally as easy I shall never understand death as I feel we never really die anyway We're just simply removed Many other pages reflect upon our human condition We all go through the same feelings or emotions so I figured I would collect some basic categories and dissect the word I feel it broke up the pages as to inflict conclusions yet keep my personal feelings at bay This is by no means a self-help book We as a species have possibly uncountable help books at our disposal Fine by me but little knowledge can be obtained if

Geospatial Challenges in the 21st Century Kostis Koutsopoulos, Rafael de Miguel González, Karl Donert, 2019-01-16 This book focuses on 21st century geospatial technologies GT It highlights their broad range of capabilities and their essential role in effectively addressing and resolving critical everyday issues such as environment sustainability climate change urban planning economy culture and geopolitics Featuring chapters written by leading international scientists it discusses the application of GT tools and demonstrates that the problems requiring such tools transcend national boundaries cultures political systems and scientific backgrounds on a global scale In addition it enhances readers spatial understanding of and geographical reasoning in connection with societal issues The book will appeal to scientists teachers and students of geography the earth sciences and related areas as well as decision makers interested in the application and capabilities of geospatial technologies and new spatial methods for addressing important issues

From Black Clouds To Black Holes (2nd Edition) Jayant V Narlikar, 1995-12-29 This book describes in nontechnical language one of the success stories of modern twentieth century astronomy It presents us with the physical picture of what constitutes a star a description of how a star evolves with time how its shape and brightness change how it manufactures the chemical elements deep in its interior what makes it explode The presentation also includes exotic objects such as supernovae pulsars neutron stars and white dwarfs and of course black holes This revised edition brings the discussion up to date with the inclusion of astronomical events like Supernova 1987A and findings from the Hubble Space Telescope as well as other observations The book is appropriate as supplementary material for an elementary course on astronomy and astrophysics
