Colonialism in Question Frederick Cooper,2005-06-06 In this closely integrated collection of essays on colonialism in world history Frederick Cooper raises crucial questions about concepts relevant to a wide range of issues in the social sciences and humanities including identity globalization and modernity Rather than portray the past two centuries as the inevitable movement from empire to nation state Cooper places nationalism within a much wider range of imperial and diasporic imaginations of rulers and ruled alike well into the twentieth century He addresses both the insights and the blind spots of colonial studies in an effort to get beyond the tendency in the field to focus on a generic colonialism located sometime between 1492 and the 1960s and somewhere in the West Broad ranging cogently argued and with a historical focus that moves from Africa to South Asia to Europe these essays most published here for the first time propose a fuller engagement in the give and take of history not least in the ways in which concepts usually attributed to Western universalism including citizenship and equality were defined and reconfigured by political mobilizations in colonial contexts
