Quest For Life In Amber:

The Quest For Life In Amber George Poinar, Roberta Poinar, 1994-09-11 In passages that read more like an Indiana Jones screenplay than scientific research the Poinars describe how their hobby turned obsession ultimately led to a breakthrough scientific finding the discovery of preserved insect DNA in amber Photos *Ancient DNA* Elizabeth D Jones, 2022-02-22 The untold story of the rise of the new scientific field of ancient DNA research and how Jurassic Park and popular media influenced its development Ancient DNA research the recovery of genetic material from long dead organisms is a discipline that developed from science fiction into a reality between the 1980s and today Drawing on scientific historical and archival material as well as original interviews with more than fifty researchers worldwide Elizabeth Jones explores the field's formation and explains its relationship with the media by examining its close connection to de extinction the science and technology of resurrecting extinct species She reveals how the search for DNA from fossils flourished under the influence of intense press and public interest particularly as this new line of research coincided with the book and movie Jurassic Park Ancient DNA is the first account to trace the historical and sociological interplay between science and celebrity in the rise of this new research field In the process Jones argues that ancient DNA research is more than a public facing science it is a celebrity science **Geology Lab for Kids** Garret Romaine, 2017-07 Geology Lab for Kids is a family friendly guide to the wonders of geology like crystals and fossils the layers of the Earth's crust and the eruption of geysers and volcanoes

Controversy Catastrophism and Evolution

Trevor Palmer,2012-12-06 In Controversy Trevor Palmer fully documents how traditional gradualistic views of biological and geographic evolution are giving way to a catastrophism that credits cataclysmic events such as meteorite impacts for the rapid bursts and abrupt transitions observed in the fossil record According to the catastrophists new species do not evolve gradually they proliferate following sudden mass extinctions Placing this major change of perspective within the context of a range of ancient debates Palmer discusses such topics as the history of the solar system present day extraterrestrial threats to earth hominid evolution and the fossil record
