

Responsibility, liability, and professional indemnity insurance—security v. design quality?

This report of the Council debate on Thursday 26 March 1987 has been prepared by Raydon Flett FRSA. It is published on being to readers' attention the thought of Council members on these important, topical issues. The President has made proposals to Council on the action to be taken as a result of the debate, a resolution report of which will be placed in the Library in due course.

The Editor welcomes readers' views on the topics debated.

Introduction

The current situation as regards professional engineers' responsibility, professional liability, and the options available for PI insurance, were discussed at a recent meeting of the Institution's Council, also attended by some invited guests. Some new factors, such as the impact of the Latest Damage Act 1986, were also considered.

The discussion was introduced by the President, Professor Hapgood, who summarised the main problems. Peter Blackburn, of Bore Hapgood, and Jim Armstrong (Vice-President), of BOP, identified some problems faced by professional practices and John Ward, of Steele & Company, gave a lecturer's view, based on his firm's long experience of PI claims.

Different alternatives for insurance cover were described. Mr Alan Kiggins, of Christian & Armour, summarised the principal points of the present system of insurance, held by most firms. Mr Brian Shaw described the options for single project insurance, and Mr Brian Glass, of London Remuneration Owners Mutual Insurance Ltd., told of the experience from other industries of mutual funds, which are becoming more prevalent also in construction.

Professor Donald Bishop, Chairman of the Building & Civil Engineering BOP's Insurance Feasibility Committee, described the findings of his survey and some of the tentative conclusions reached, which give new matter for discussion prior to being put forward formally.

David Cowen, an eminent former lawyer, summarised the discussion, accepting that his views might be coloured by the fact that the lawyers were only just going home.

The meeting generated a very lively discussion, with extremely important issues debated. Some of these are summarised below.

Professional duties and some current problems

The basic yardstick by which competence or negligence may be judged is usually the need to exercise the reasonable skill and care to be expected from a competent engineer. This is also the requirement in the ACEE Form of Agreement which are widely used by consulting engineers to define their responsibilities.

The view of the lawyers at the meeting was that, for small firms, engineers must take responsibility, but that they may be too ready to accept added responsibilities from clients through added contract clauses.

The hazards of litigation are considerable and, in the view of most engineers, they are increasing. Design teams involving more companies with a wider choice of methods, materials, and components. Greater size is necessary to keep up with such changes and also to keep abreast of the increasing number of people involved in the process, all of them generating information and papers. All these factors have added to the risk of an error and possible litigation. This extra effort required of designers is in total conflict with the aims of many clients, and particularly public clients, in seeking for low competition and therefore a reduction of design input and even redress for error. If there is a defect, someone is guilty!

Extended responsibilities

Considerable pressure is often exerted on engineers by their clients, or their clients' lawyers, to extend their responsibilities. This provision of special contractual requirements from public and private clients and their lawyers is costly to legal fees and the time required to have them expertly assessed.

Typically, clients increasingly ask for a duty of care to third parties or other third parties. Such contracts can be extremely long, following American trends, and often aim to extend the engineer's responsibilities—for example, by asking for letters of opinion. A standard shorter contract agreed by clients and engineering bodies would be of great benefit to both factors and consultants, even if not to lawyers.

The law of contribution

The law of contribution is an area of special hazard. It means that where there is a shared responsibility for a defect, one perhaps quite a small share, the service is a court case may find that he has to pay for 50% of the claim when other, perhaps more negligent, parties have agreed to trade or are unavailable. Lawyers are little chance of changing this law, so any change would probably be seen by the courts as no longer being even-handed between the client and his professional advisers or contractors. Politically lobbying on this issue may then be a waste of energy.

The Latest Damage Act

The 1986 Latest Damage Act is a new factor. It does not affect contractual claims, limiting itself to negligence and claims in tort. It contains a long-stop whereby such claims cannot be brought after 11 years. The risk may be that the long-stop will be seen as the means for anyone. Greater claims in contribution whereby a party found negligent

can not other parties, claims could actually extend to rather longer periods. Such claims would start after the initial settlement, i.e. 11 years plus 1 year, plus the time taken to reach a finding. It would therefore be necessary for consultants to keep records for perhaps 20 years. This may be thought to go against one intention of the new Act—to avoid stale claims. The Latest Damage Act also specifically includes willful misconduct from the long-stop. In the past, willful misconduct has been claimed by insurers for matters clearly not intended to be fraudulent, such as concealment of reinforcement in concrete. The first action since the new Act is due to be judged in the near future, and may give guidance how courts will in future interpret such concealment.

Limiting liability

Most consultations will work as partnerships. Limitation may be limited to law, at least slightly, by forming a limited company. There are, however, problems in this. If clients believe that they run greater risks, they will probably ask for indemnities or performance bonds as they already do from contractors. Partnerships may also offer tax benefits. Each firm must therefore explore its own situation.

There may be opportunities to limit liability through the contract between client and consultant.

For off-site supervision it may be possible for designers to obtain an indemnity from the contractor responsible for the works, but this is of value only while the contractor is operating. The client may also wish to be sure that his chances of redress are not reduced.

It is, however, essential to avoid drawing up a contract which, if not even-handed, would then be treated by the courts as null and void. It may therefore be easier to define responsibilities and prescribe them than actually to exclude them in a contract.

Discussions on the duties of designers of calculations and design were inconclusive, but evidently firms will need to ensure that personal liability by their employees is covered within a firm's insurance policy where individually signed certificates are issued.

Continuing duty to warn

The recent Ashford judgment was seen as a particular new hazard, as it seems to extend the need for consultants to warn a client for old projects about any hazard since discovered. In practice, this could mean a total review of every job ever designed, to cost new research findings or other information indicates them to be at risk.

The case highlighted some difficulties. Does a policy cover death or injury due to negligent design? Is some other policy covering risk to third parties? If not, there is a risk that the Courts, wishing to

Quest For Quality An Engineers View On Responsibility And Liability Introduction

Quest For Quality An Engineers View On Responsibility And Liability Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Quest For Quality An Engineers View On Responsibility And Liability Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Quest For Quality An Engineers View On Responsibility And Liability : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Quest For Quality An Engineers View On Responsibility And Liability : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Quest For Quality An Engineers View On Responsibility And Liability Offers a diverse range of free eBooks across various genres. Quest For Quality An Engineers View On Responsibility And Liability Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Quest For Quality An Engineers View On Responsibility And Liability Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Quest For Quality An Engineers View On Responsibility And Liability, especially related to Quest For Quality An Engineers View On Responsibility And Liability, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Quest For Quality An Engineers View On Responsibility And Liability, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Quest For Quality An Engineers View On Responsibility And Liability books or magazines might include. Look for these in online stores or libraries. Remember that while Quest For Quality An Engineers View On Responsibility And Liability, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending

services. Many libraries have digital catalogs where you can borrow Quest For Quality An Engineers View On Responsibility And Liability eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Quest For Quality An Engineers View On Responsibility And Liability full book, it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Quest For Quality An Engineers View On Responsibility And Liability eBooks, including some popular titles.

FAQs About Quest For Quality An Engineers View On Responsibility And Liability Books

What is a Quest For Quality An Engineers View On Responsibility And Liability PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Quest For Quality An Engineers View On Responsibility And Liability PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Quest For Quality An Engineers View On Responsibility And Liability PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Quest For Quality An Engineers View On Responsibility And Liability PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Quest For Quality An Engineers View On Responsibility And Liability PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. **How do I compress a PDF file?** You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share

Quest For Quality An Engineers View On Responsibility And Liability

and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
