**European Integration and the Nationalities Question** John McGarry, Michael Keating, 2006-09-27 A highly topical examination of the effect of European integration on relations between states and minority nations This new collection brings together the leading specialists in the field and covers a wide range of cases from Northern Ireland in the West to Estonia and Latvia in the East and Cyprus in the South East The contributors assess how European integration has affected the preparedness of states to accommodate minorities across a range of fundamental criteria including enhanced rights protection autonomy the provision of a voice for minorities in the European and international arena and the promotion of cross border cooperation among communities dissected by state frontiers The comprehensive chapters stress the importance of the nationality question and the fact that contrary to the hopes and beliefs of many on the left and right it is not going to go away Beginning with an introductory essay that summarizes the impact of European integration on the nationalities question this accessible book will be of strong interest to scholars and researchers of politics nationalism ethnic conflict and European studies

**The Arab and Jewish Questions** Bashir Bashir, Leila Farsakh, 2020-12-15 Nineteenth century Europe turned the political status of its Jewish communities into the Jewish Question as both Christianity and rising forms of nationalism viewed Jews as the ultimate other With the onset of Zionism this question migrated to Palestine and intensified under British colonial rule and in the aftermath of the Holocaust Zionism's attempt to solve the Jewish Question created what came to be known as the Arab Question which concerned the presence and rights of the Arab population in Palestine For the most part however Jewish settlers denied or dismissed the question they created to the detriment of both Arabs and Jews in Palestine and elsewhere This book brings together leading scholars to consider how these two questions are entangled historically and in the present day It offers critical analyses of Arab engagements with the question of Jewish rights alongside Zionist and non Zionist Jewish considerations of Palestinian identity and political rights Together the essays show that the Arab and Jewish questions and the Israeli Palestinian conflict in which they have become subsumed belong to the same thorny history Despite their major differences the historical Jewish and Arab questions are about the political rights of oppressed groups and their inclusion within exclusionary political communities a question that continues to foment tensions in the Middle East Europe and the United States Shedding new light on the intricate relationships among Orientalism anti-Semitism Islamophobia colonialism and the impasse in the Israeli Palestinian conflict this book reveals the inseparability of Arab and Jewish struggles for self determination and political equality Contributors include Gil Anidjar Brian Klug Amal Ghazal Ella Shohat Hakem Al Rustom Hillel Cohen Yuval Evri Derek Penslar Jacqueline Rose Moshe Behar Maram Masarwi and the editors Bashir Bashir and Leila Farsakh

**Energy Security and Natural Gas Markets in Europe** Tim Boersma, 2015-08-27 Moving beyond most conventional thinking about energy security in Europe which revolves around stability of supplies and the reliability of suppliers this book presents the history of European policy making regarding energy

resources including recent controversies about shale gas and fracking Using the United States as a benchmark the author tests the hypothesis that EU energy security is at risk primarily because of a lack of market integration and cooperation between member states This lack of integration still prohibits natural gas to flow freely throughout the continent which makes parts of Europe vulnerable in case of supply disruptions The book demonstrates that the EU gas market has been developing at different speeds leaving the Northwest of the continent reasonably well integrated with sufficient trade and liquidity and different supplies whereas other parts are less developed In these parts of Europe there is a structural lack of investments in infrastructure interconnectors reverse flow options and storage facilities Thus even though substantial progress has been made in parts of the EU single source dependency often prevails leaving the relevant member states vulnerable to market power abuse Detailed comparisons are made of the situations in the Netherlands and Poland and of energy policy in the USA The book dismantles some of the existing assumptions about the concept of energy security and touches upon the level of rhetoric that features in most energy security and policy debates in Europe

*The Age of Questions* Holly Case,2018-07-10 A groundbreaking history of the Big Questions that dominated the nineteenth century In the early nineteenth century a new age began the age of questions In the Eastern and Belgian questions as much as in the slavery worker social woman and Jewish questions contemporaries saw not interrogatives to be answered but problems to be solved Alexis de Tocqueville Victor Hugo Karl Marx Frederick Douglass Fyodor Dostoevsky Rosa Luxemburg and Adolf Hitler were among the many who put their pens to the task The Age of Questions asks how the question form arose what trajectory it followed and why it provoked such feverish excitement for over a century Was there a family resemblance between questions Have they disappeared or are they on the rise again in our time In this pioneering book Holly Case undertakes a stunningly original analysis presenting chapter by chapter seven distinct arguments and frameworks for understanding the age She considers whether it was marked by a progressive quest for emancipation of women slaves Jews laborers and others a steady inexorable march toward genocide and the Final Solution or a movement toward federation and the dissolution of boundaries Or was it simply a farce a false frenzy dreamed up by publicists eager to sell subscriptions As the arguments clash patterns emerge and sharpen until the age reveals its full and peculiar nature Turning convention on its head with meticulous and astonishingly broad scholarship The Age of Questions illuminates how patterns of thinking move history

*Europe and the Other and Europe as the Other* Bo Stråth,2010 This book contributes to the debate on

what Europe means by demonstrating the complexities and contradictions inherent in the concept They are seen most clearly when Europe is viewed from a long historical perspective During the closing decades of the twentieth century Europe emerged as one of the main points of reference in both the cultural and the political constructs of the global community An obsession with the concept of European identity is readily discernible This process of identity construction provokes critical questions which the book aims to address At the same time the book explores the opportunities offered by the concept of Europe to see how it may be used in the construction of the future The approach is one of both deconstruction and reconstruction The issue of Europe is closely related in the book to more general issues concerning the cultural construction of community The book should therefore be seen as the companion of *Myth and Memory in the Construction of Community* which is also published by PIE Peter Lang in the series *Multiple Europes* The book appears within the framework of a research project on the cultural construction of community in modernisation processes in comparison This project is a joint enterprise of the European University Institute in Florence and the Humboldt University in Berlin sponsored by the Bank of Sweden Tercentenary Fund

*Economy and Society in Europe* Luigi Burrioni, Maarten Keune, Guglielmo Meardi, 2012 Drawing on the development of economic sociology over the past 40 years this book brings together leading scholars to explore the relationship between social institutions on economic processes Inspired in particular by the innovative and creative dimensions of Colin Crouch's work they signpost directions for future research It will be an important reader for international scholars exploring the unfolding dimensions of contemporary relations in economy and society Jacqueline O'Reilly University of Brighton Business School UK Improving our understanding of how economy and society interrelate in Europe is of paramount importance The rigorous and thought provoking analyses about the interaction between markets and the institutions of society contained in this book undoubtedly represent an excellent example of how this improvement can be achieved especially in these times of crisis Andr s Rodr guez Pose London School of Economics UK This book offers a refreshing account of the deep changes occurring over recent years in the relationship between economy and society in Europe This is of course a classical theme since Max Weber's work but the social institutions which shape economic

performance have profoundly evolved as have the analytical categories used to understand them. The contributions in this volume provide a broad and interesting perspective dealing with issues as varied as industrial relations, welfare regimes, families and the labour market, universities, local governance and many others. In the wake of the financial crisis, the major theories on the role of such institutions are found partly unsatisfactory as the boundaries between economy and society are constantly shifting. Everyone interested in improving our analytical tools to understand the direction of change in Europe should welcome this book. Marino Regini, University of Milan, Italy. While an economy is always embedded in society, the relationship between the two is undergoing profound changes in Europe, resulting in widespread instability which is emphasised by the current crisis. This book analyses these changes and, in particular, pressures of intensifying international competition, globalization and financialization within Europe. Combining the perspectives of economic sociology, political economy and political science, the expert contributors offer an in-depth multidisciplinary insight to the functioning of a number of institutional arenas around which European economies and societies are organized. Areas explored include the state and public policy at European, national and regional level, the welfare state, industrial relations systems, education systems and the family. This challenging and thought-provoking book will be of great interest to a wide-ranging audience across a number of disciplines including European studies, political science, comparative political economy, economic sociology, industrial relations and social policy.

**The Atlantic Monthly**, 1898      *The Islamic Review*, 1920      **Europe, Russia and the Liberal World Order**, Timofei Bordachev, 2021-08-30. This book analyses Russia-Europe-EU relations by exploring their practical essence and conceptualizing them in terms of the main categories of international relations research. It argues that the liberal world order established in Cold War days whereby international relations are underpinned by a global balance of power and a highly institutionalized framework of international relations, thereby balancing power and morality, continued after the Cold War with high hopes in the early 1990s for a new order of security and cooperation for all Europe, including Russia. It goes on to show how the liberal world order has broken down, one manifestation of this being the new conflict between Russia and Europe in recent years, a conflict resulting from the failure of European countries, the EU, to acknowledge the actual balance of military, economic and political power, the lack of limits on the policy of European countries in terms of infringing on Russia's interests and Russia's consequent revision after 1999 of its policy of co-operation. Overall, the book provides huge insight into the nature of Europe-Russia relations. *Appleton's Annual Cyclopaedia and Register of Important Events of the Years*, 1881
