

$$= \frac{4\pi \times 3}{9 \times 2 \times 10 \times 4}$$

$$= \frac{\pi}{60} \text{ m}$$

So, height from ground will be

$$R(1 - \cos 60^\circ) + \frac{\pi}{60} = \frac{1}{2} + \frac{x}{10}$$

$$\Rightarrow x = \frac{\pi}{6} = 0.52$$

6. A solid sphere of mass 1 kg and radius 1 m rolls without slipping on a fixed inclined plane with an angle of inclination $\theta = 30^\circ$ from the horizontal. Two forces of magnitude 1 N each, parallel to the incline, act on the sphere, both at distance $r = 0.5$ m from the center of the sphere, as shown in the figure. The acceleration of the sphere down the plane is _____ ms^{-2} . (Take $g = 10 \text{ ms}^{-2}$.)

Answer (02.86)

Taking torque about contact point.

$$\tau = mgR \sin 30^\circ + 1 \times 1 \odot$$

taking \odot is positive

$$5 - 1 = \frac{7}{5} mR^2 \alpha$$

$$\Rightarrow \alpha = \frac{20}{7} \text{ rad/s}^2$$

$$\text{So, } a_{\text{cm}} = \alpha R = \frac{20}{7} \text{ m/s}^2$$

$$\boxed{a_{\text{cm}} = 2.86 \text{ m/s}^2}$$

between them changing Everything else comes in as a means to represent the change in the distance relations in a manner that is both as simple and as informative as possible The book works this minimalist ontology out in philosophical as well as mathematical terms and shows how one can understand classical mechanics quantum field theory and relativistic physics on the basis of this ontology Along the way we seek to achieve four subsidiary aims a to make a case for a holistic individuation of the basic objects ontic structural realism b to work out a new version of Humeanism dubbed Super Humeanism that does without natural properties c to set out an ontology of quantum physics that is an alternative to quantum state realism and that avoids any ontological dualism of particles and fields d to vindicate a relationalist ontology based on point objects also in the domain of relativistic physics

William Wians,Ron Polansky,2017-07-31 Reading Aristotle Argument and Exposition argues that Aristotle s treatises must be approached as progressive unfoldings of a unified position that may extend over a single book an entire treatise or across several works Contributors demonstrate that Aristotle relies on both explanatory and expository principles Explanatory principles include familiar doctrines such as the four causes actuality s priority over potentiality and nature s doing nothing in vain Expository principles are at least as important They pertain to proper sequence pedagogical method the role of reputable views and the opinions of predecessors the equivocality of key explanatory terms and the need to scrupulously observe distinctions between the different sciences A sensitivity to expository principles is crucial to understanding both particular arguments and entire treatises

Physical Time Within Human Time Anne Giersch,Leonardo P.G. De Assis,2023-11-13 There is a gap between the concept of time in physics and that in neuroscience Human time is dynamic and involves a dynamic flow whereas physical time is said to be frozen as in Einstein s Block Universe The result has been a fierce debate as to which time is real Our recently accepted paper by Frontiers provides a compromise dualistic view The claim is that within the cranium there already exists an overlooked complete and independent physical system of time that is compatible with the essence of modern spacetime cosmology However the brain through a process of evolution developed a complementary illusory system that provides a supplementary more satisfying experience of temporal experiences that leads to better adaptive behavior The Dualistic Mind View provides evidence that both systems of time exist and are not competitive Neither need be denigrated
