**Questioning and Teaching** J.T. Dillon, 2004-06-04 Questions and questioning play a major role in both formal and informal educative processes They are the means by which a child expresses the desire to understand the world outside and they subsequently become the means by which a teacher assesses whether or not a child has satisfactorily assimilated something The teacher can also use questions to direct and control the course of students studies The ability and desire to question might be considered in itself one of the aims of education This author has made an extensive study of the place of questioning in education and this book is the fullest record to date of that study Its scope is comprehensive It considers questions from the point of view of the one questioning and the one being questioned and considers pupil and teacher in both of these roles This work is grounded in theory research and practice and is informed by research done in other fields such as psychotherapy criminal interrogation and computer science

**The Questioning Behavior of Males and Females in an Undergraduate Language Class** Dorothy W. Thomas, 2001 The purpose of this study is to examine the questioning behavior of males and females in an undergraduate Speech class Whether one is analyzing social mental emotional or verbal behavior of students biological sex is usually a factor This study describes differences between male and female questioning and discusses the implications of these differences for classroom teaching The classroom is a small society with its own special language a language that contributes to classroom events Student questioning a behavior that provides information on how students adapt and function within the classroom is an important part of the student learning repertoire Although researchers have devoted much attention to teacher questioning they have devoted little attention to male female questioning in the college classroom This qualitative study gathers data in the form of direct observation field notes coding of students questions journals and audio taping over a period of two months thirteen observations My findings revealed no differences between males and females on the types of questions they asked Males however asked more questions overall than females This study offers suggestions for further research
