Questions De Methodes En Sciences De Gestion:

Questions de méthodes en sciences de gestion Nathalie Mourgues, 2002 Confronte la preuve des faits à l'impatience du monde de l'entreprise, l'exigence des analystes ou l'imprévisibilité des événements la recherche en sciences de gestion suppose une aptitude à affronter la complexité dans l'urgence. Cependant, en toute rigueur, satisfaire cette demande sociale ne saurait s'envisager au détriment d'une réflexion sur les démarches, les moyens et les usages de la recherche. Quelles sont les significations qui s'attachent aux paradigmes épistémologiques pour les sciences de gestion aujourd'hui? Les approches méthodologiques usuellement utilisées suffisent-elles ou présentent-elles des limites insurmontables? D'autres approches peuvent-elles venir enrichir la compréhension des phénomènes étudiés? Et finalement, quelle est la pertinence sociale et scientifique des résultats obtenus par les chercheurs? Autant de questions qui concernent et animent la communauté scientifique et auxquelles cet ouvrage propose des éléments de réponse grâce aux contributions de spécialistes d'horizons géographiques et disciplinaires variés: finance, marketing, stratégie, logistique, management, etc. L'ouvrage intéressera aussi bien les chercheurs confirmés que les néophytes, les enseignants ou les consultants et plus généralement tous ceux qui partagent l'idée que la connaissance résulte de constructions fragiles car toujours exposées et est forcément incomplète.

Critical Management Studies Christopher Grey, Isabelle Huault, Véronique Perret, Laurent Taskin, 2016-02-22 Critical Management Studies (CMS) is often dated from the publication of an edited volume bearing that name Alvesson and Willmott 1992. In the two decades that have followed CMS has been remarkably successful in establishing itself not just as a term but as a recognizable tradition or approach. The emerging status of CMS as an overall approach has been both encouraged and marked by a growing range of handbooks, readers and textbooks. Yet the literature is dominated by writings from the UK and Scandinavia in particular and the tendency is to treat this literature as constituting CMS. However, the meaning, practice, constraints and context of CMS vary considerably between different countries, cultures and language communities. This volume surveys fourteen various countries and regions where CMS has acquired some following and seeks to explore the different ways in which CMS is understood and the different contexts within which it operates as well as its possible future development.

Méthodologie de la recherche doctorale en économie Mohamed Haddar (économiste), 2010 La thèse est un investissement. L'histoire comme méthode pour comprendre le management Mathieu Floquet, Pierre Labardin, Yves Levant, 2018-05-02 Le carrefour académique de Marc Nikitin auquel cet ouvrage rend hommage s'attache à montrer l'intérêt des approches historiques pour comprendre aujourd'hui les pratiques en matière de comptabilité et de contrôle et de management. L'ouvrage se divise en trois parties: la

première interroge le rôle de l'histoire en matière de management la deuxième propose plusieurs histoires d'outils de contrôle la troisième se centre sur l'histoire des outils comptables

DSCG 7 - Mémoire professionnel - Manuel Laëtitia Do Benoit, Rajaa Roybier, Carine Luangsay, 2020-08-12 L'ouvrage Mémoire professionnel a été conçu pour préparer la preuve 7 du DSCG qui vise accompagner l'insertion professionnelle des futurs diplômés en faisant le lien entre leur formation théorique et une pratique professionnelle. Il permet par ailleurs de développer la capacité du candidat à présenter oralement et soutenir les résultats d'un travail de réflexion. Il comprend 8 chapitres répartis en 2 parties correspondant à la fois la structure du programme et aux différentes étapes de la réalisation du mémoire et de la preuve d'examen. Cet ouvrage peut donc se lire de deux façons dans la continuité comme un manuel présentant les notions théoriques et pratiques requises par le programme pour préparer le candidat la maîtrise des techniques de communication professionnelle écrites et orales, celle des techniques de collecte et de traitement de l'information, celle des grandes questions philosophiques et des principales méthodologies applicables à la recherche en gestion en se reportant directement aux chapitres de la seconde partie lorsque le candidat se sera lancé dans la recherche de son stage, l'écriture de son mémoire et la préparation de sa soutenance. Il restera un élément de référence indispensable lorsque dans leur vie professionnelle les diplômés auront besoin de rédiger un document tel un rapport, une étude, une synthèse sur une question complexe ou de réaliser une présentation orale.

Experimentation in the Sciences

Catherine Allamel-Raffin, Jean-Luc Gangloff, Yves Gingras, 2024-04-29 This book takes a novel approach by highlighting comparative and long term historical perspectives on experimental practice. The juxtaposition of accounts of natural social and medical experimentation is very enlightening especially because the authors put the emphasis on the different kinds of objects of experimentation: physical matter, chemical reagents, social groups, organizations, sick individuals, archeological remains and demonstrate how much the kinds of objects matter for the practice of experimentation, its methods, tools and methodologies. Taken together the chapters raise several fascinating questions for further study: What do these different approaches have in common? Why do we call them experimentation? What are the intersections among the fields and their developments? The volume engages philosophical approaches that are not well known to Anglophone readers: Bachelard, Bergson, Bernard, Canguilhem among others and brings to attention a wealth of Francophone secondary literature on past and present scientific experimentation. The collection fills a yawning gap in science, science studies and philosophy of science teaching making it particularly valuable for philosophers and historians of science in all subfields.
