**The Anatomist** Anatomist's d Andrew Cunningham, 2016-12-05 The eighteenth century practitioners of anatomy saw their own period as the perfection of anatomy This book looks at the investigation of anatomy in the long eighteenth century in disciplinary terms This means looking in a novel way not only at the practical aspects of anatomizing but also at questions of how one became an anatomist where and how the discipline was practised what the point was of its practice what counted as sub disciplines of anatomy and the nature of arguments over anatomical facts and priority of discovery In particular pathology generation and birth and comparative anatomy are shown to have been linked together as sub disciplines of anatomy At first sight anatomy seems the most long lived and stable of medical disciplines from Galen and Vesalius to the present But Cunningham argues that anatomy was like so many other areas of knowledge changed irrevocably around the end of the eighteenth century with the creation of new disciplines new forms of knowledge and new ways of investigation The long eighteenth century therefore was not only the highpoint of anatomy but also the endpoint of old anatomy

**The Painter's Touch** Ewa Lajer-Burchard, 2018-01-08 A new interpretation of the development of artistic modernity in eighteenth century France What can be gained from considering a painting not only as an image but also a material object How does the painter's own experience of the process of making matter for our understanding of both the painting and its maker The Painter's Touch addresses these questions to offer a radical reinterpretation of three paradigmatic French

painters of the eighteenth century In this beautifully illustrated book Ewa Lajer Burcharth provides close readings of the works of François Boucher Jean Sim on Chardin and Jean Honor Fragonard entirely recasting our understanding of these painters practice Using the notion of touch she examines the implications of their strategic investment in materiality and sheds light on the distinct contribution of painting to the culture of the Enlightenment Lajer Burcharth traces how the distinct logic of these painters work the operation of surface in Boucher the deep materiality of Chardin and the dynamic morphological structure in Fragonard contributed to the formation of artistic identity Through the notion of touch she repositions these painters in the artistic culture of their time shifting attention from institutions such as the academy and the Salon to the realms of the market the medium and the body Lajer Burcharth analyzes Boucher s commercial tact Chardin s interiorized craft and Fragonard s materialization of eros Foregrounding the question of experience that of the painters and of the people they represent she shows how painting as a medium contributed to the Enlightenment s discourse on the self in both its individual and social functions By examining what paintings actually say in brushstrokes texture and paint The Painter s Touch transforms our understanding of the role of painting in the emergence of modernity and provides new readings of some of the most important and beloved works of art of the era Defining Features Ludmilla

They also explore new areas of research, including the fate of embodiment in late modernity, sex, gender, medical technology and the body, the sociology of emotions, pain, sleep and artistic representations of the body. *The Lived Body* will provide students and researchers in medical sociology, health sciences, cultural studies and philosophy with clear, accessible coverage of the major theories and debates in the sociology of the body and a challenging new way of thinking.

**Death, Modernity, and the Body** Eva Åhrén, 2009. Originally published in Swedish in 2002. *Death, Modernity and the Body* explores the impact of modernization on customs and practices surrounding the dead body in Sweden in the late nineteenth and early twentieth centuries. This period of intense social and cultural change transformed Sweden from an agricultural society to a modern industrial state. The book focuses on five arenas: medical research and education, displays of the dead body for entertainment purposes, funerary preparations of the body, memorial photography and cremation. The book takes an original approach to the history of death in modern society by focusing on the dead body in intersecting cultural domains. Medical, scientific and technological history are thereby connected to popular culture, social and political history as well as ethnography and anthropology. The scholarly literature on the history of death is disproportionately focused on the Anglophone world, France and Germany. This study contributes to the scholarship by examining the case of Sweden, where modernization was exceptionally rapid and pervasive and full of interesting particularities.

**Book Jacket** *Feminism and the Body* Londa Schiebinger, 2000-06-22. This collection of classic essays in feminist body studies investigates the history of the image of the female body from the medical discovery of the clitoris to the body politic of Queen Elizabeth I to women deprecated as Hottentot Venuses in the nineteenth century. The text looks at the way in which coverings bear cultural meaning, clothing reform during the French Revolution, Islamic veiling and the invention of the top hat as well as the embodiment of cherished cultural values in social icons such as the Statue of Liberty or the Barbie doll. By considering culture as it defines not only women but also men, this volume offers both the student and the general reader an insight into the interdisciplinary and cross-cultural study involved in feminist body studies.
