Exploring the Professional Identity of Management Consultants Anthony F. Buono, Léon de

Caluwé, Annemieke Stoppelenburg, 2013-03-01 The volume is based on the presentations and discussions from the Fifth European Conference on Management Consulting sponsored by the Management Consulting Division of the Academy of Management which took place June 2011 at Vrije Universiteit in Amsterdam the Netherlands The conference theme Exploring the Professional Identity of Management Consultants attempted to capture the highly ambiguous social status of this young and emerging profession Management consulting does not have professional standards or accreditation criteria like those found in medicine or law there are low barriers to entry and a broad range of tasks are undertaken in the name of consulting As a result a crucial aspect of what constitutes such a loosely defined profession is the identity of its members The professional identity of management consultants is continuously developing through the interplay of how consultants are seen and valued by clients as well as in the larger society and how consultancy firms and consultants identify and position themselves This theme includes a variety of topics ranging from the interaction between consultants and their clients consultant rhetoric and self presentation and the plethora of books media and public discourse on consulting to human resource policies and practices knowledge development activities of consultancy firms career and life stories of consultants and consultancies and consulting associations accreditation bodies and education programs All of these factors contribute either directly or indirectly to identity construction in the field of management consulting *A Dictionary of Slang and Unconventional English* Eric Partridge, 2006-05-02 The definitive work on the subject this Dictionary available again in its eighth edition gives a full account of slang and unconventional English over four centuries and will entertain and inform all language lovers *Academic Advising* Virginia N. cosmology economy and optimization theory are given Abstract proofs and unnecessary formalism are avoided as far as possible The focus is on modelling ordinary differential equations of the first and second orders as well as their analytical and numerical solution methods in which the theory is dealt with briefly before moving on to application examples In addition program codes show exemplarily how even more challenging questions can be tackled and represented meaningfully with the help of a computer algebra system The first chapter deals with the necessary prior knowledge of integral and differential calculus 103 motivating exercises together with their solutions round off the work I am happy to see such a book It will serve as a support for many students professors and faculty Dr Alessio Figalli Professor at the ETH Z rich and Fields medalist 2018

The Rhetorical Career of Cesar Chavez John C. Hammerback, Richard J. Jensen, 2003-04 Although born into one of the least powerful segments of American society Cesar Chavez led the farm labor movement to unprecedented heights His powerful effect on audiences is well known but award winning scholars John C Hammerback and Richard J Jensen offer the first explanation of how Chavez achieved that effect Although other studies of Chavez exist none has examined so thoroughly his rhetoric nor analyzed in depth such a large number of Chavez's own texts scores of which have previously been unstudied Chavez was an indefatigable speaker writer and non discursive communicator who developed a well thought out approach to his rhetorical discourse and placed his speaking and writing at the very center of his career By merging thought and character in his themes arguments and explanations and in his first and second personae Chavez was able to identify with the character of his listeners That identification induced many audience members to support Chavez's agenda for union activism The authors have developed a model to help explain Chavez's startling transformation of some audiences and persuasion of others Hammerback and Jensen reveal that Chavez's world view motivated him to work tirelessly and directed him to the particular rhetorical qualities and techniques that characterized his discourse The authors also demonstrate Chavez's surprising effectiveness as a rhetor despite his soft spoken style uncharacteristic of most powerful orators *The*
