*New Directions in Social Theory, Education and Embodiment* John Evans,Brian Davies,2014-10-29 This book exemplifies the nurturing spirit of inter discursive debate with a view to opening up new theoretical and empirical insights understanding and engagement with debates on issues relating to pedagogy policy equity and embodiment From a variety of social science perspectives an international force of contributors apply a multitude of concepts to research agendas which illustrate the multiple ways in which the body both impacts culture and is simultaneously and seamlessly positioned and shaped by it maintaining social reproduction of class and cultural hierarchies and social regulation and control They attest that once we begin to trace the flow of knowledge and discourses across continents countries regions and communities by registering their re contextualisation both within various popular pedagogies e g newspapers film TV web pages IT and the formal and informal practices of schools families and peers we are compelled to appreciate the bewildering complexity of subjectivity and the ways in which it is embodied Indeed the chapters suggest that no matter how hegemonic or ubiquitous discursive practices may be they inevitably tend to generate both intended and unexpected affects and effects people and populations cannot easily be determined suppressed or controlled This book was originally published as a special issue of Sport Education and Society

Barker Bausell, 2010-11-01 Too Simple to Fail presents a startling dissection of what is wrong with our educational system and a set of simple common sense steps for improving it This simplicity Bausell argues characterizes both the schooling process and the science of education as witnessed by legions of researchers who have discovered precious little that their grandmothers didn't already know Yet surprisingly based upon the author's own studies and a review of the past 30 years of educational research these discoveries boil down to a simple but powerful theory The only way schools can increase learning is to increase the amount of relevant instructional time for all students Here Bausell demonstrates that classroom instruction is hopelessly obsolete as are our current testing practices both contributing to the widening opportunity gap between socioeconomic and racial groups But with an understanding of what is wrong with education today comes the revelation that the answer to these deficiencies has been available to us all along in the form of the tutorial model the most effective instructional paradigm ever developed Only in recent years has it become feasible to simulate this extremely effective instructional medium as a universal option that in effect would allow schools to provide relevant instruction as a rule and not

an exception If implemented a new world of opportunity and potential will finally be available to children whose learning is so crucial for our future The new model presented in this book has implications for identifying not only what is wrong with the way we educate our young but also why it is wrong and how the educational process can be made more efficient effective and fair **The Power of Habit** Charles Duhigg,2012-02-28 NEW YORK TIMES BESTSELLER MORE THAN 3 MILLION
