**Realist Evaluation: An Emerging Theory in Support of Practice** Gary T. Henry, George Julnes, Melvin M. Mark, 1998-06-29 Why is another theory of evaluation needed The paradigm wars have left a void in their wake A new theory firmly grounded in a credible philosophy of science is needed to guide practice The aim of this volume is to provide a new theory that captures the sensemaking contributions from post positivism and the sensitivity to values from constructivist traditions The theory presented here is not a slap dash synthesis of the competing paradigms it is a new approach Some of the contributions of the realist theory of evaluation are 1 providing a basis for principled discovery as we oscillate between explanations and data 2 using explanation as a means for extrapolating findings from one evaluation to other settings 3 viewing all methods both quantitative and qualitative as aids to sensemaking that have strengths and flaws 4 connecting evaluation practice with the ultimate goal of most program evaluation social betterment and 5 balancing the focus of the evaluation between sensemaking and value inquiry This is the 78th issue of the quarterly journal New Directions for Evaluation *Doing Realist Research* Nick Emmel, Joanne Greenhalgh, Ana Manzano, Mark Monaghan, Sonia Dalkin, 2018-06-18 Bringing together leading theorists researchers and policy makers with expertise in using realist methods

Smith, Larry E. Suter, 2016-12-15 Education has continued to grow in stature and significance as an academic discipline. In addition to world renowned research studies, the growth of education has been seen in the methodology and methods underpinning its research. The BERA SAGE Handbook of Educational Research provides a cutting edge account of the research and methodology that is creating new understandings for education research policy and practice. Over two volumes, the handbook addresses educational research in six essential components: Section 1 Understanding Research, Section 2 Planning Research, Section 3 Approaches to Research, Section 4 Acquiring Data, Section 5 Analysing Data, Section 6 Reporting, Disseminating and Evaluating Research. Each chapter is designed to offer readers insight into such issues as validity applied to meta analysis, subject selection problems in randomized experiments, time series designs and

quasi experiments and the logic of ruling out rival hypotheses Anyone engaged in social research will find this book a thought provoking and inspiring read for their work      **Evidence-Based Policy** Ray Pawson,2006-04-07 In this important new book Ray Pawson examines the recent spread of evidence based policy making across the Western world Few major public initiatives are mounted these days in the absence of a sustained attempt to evaluate them Programmes are tried and tried again and researched researched and researched again And yet it is often difficult to know which interventions and which inquiries will withstand the test of time The evident solution going by the name of evidence based policy is to take the longer view Rather than relying on one off studies it is wiser to look to the weight of evidence Accordingly it is now widely agreed the most useful data to support policy decisions will be culled from systematic reviews of all the existing research in particular policy domains This is the consensual starting point for Ray Pawson s latest foray into the world of evaluative research But this is social science after all and harmony prevails only in the first chapter Thereafter Pawson presents a devastating critique of the dominant approach to systematic review namely the meta analytic approach as sponsored by the Cochrane and Campbell collaborations In its place is commended an approach that he terms realist synthesis On this vision the real purpose of systematic review is better to understand programme theory so that policies can be properly targeted and developed to counter an ever changing landscape of social problems The book will be essential reading for all those who loved or loathed the arguments developed in *Realistic Evaluation* Sage 1997 It offers a complete blueprint for research synthesis supported by detailed illustrations and worked examples from across the policy waterfront It will be of especial interest to policy makers practitioners researchers and students working in health education employment social care criminal justice regeneration and welfare      **Handbook of Emergent Methods** Sharlene Nagy Hesse-Biber,Patricia

Morell,2011-06-10 Unexpected events during an evaluation all too often send evaluators into crisis mode This insightful book provides a systematic framework for diagnosing anticipating accommodating and reining in costs of evaluation surprises The result is evaluation that is better from a methodological point of view and more responsive to stakeholders Jonathan A Morell identifies the types of surprises that arise at different stages of a program s life cycle and that may affect different aspects of the evaluation from stakeholder relationships to data quality methodology

funding deadlines information use and program outcomes His analysis draws on 18 concise cases from well known researchers in a variety of evaluation settings Morell offers guidelines for responding effectively to surprises and for determining the risks and benefits of potential solutions
