*An Adaptive Approach for the Improvement of Fishery Statistical Systems in Mediterranean Countries* Salvatore R. Coppola, 2007-01-01

The establishment of fishery statistics and information systems in many countries of the General Fisheries Commission for the Mediterranean GFCM continues to be considered a high priority activity and the need to monitor fishing activities and provide fishery management at all levels with accurate reliable and timely data which can interact with stock assessment and economic and socioeconomic studies for decision making is constantly increasing In accordance with FAO and the GFCM mandate the objective of MedStat is to contribute to the sustainable and responsible fisheries management of fishery resources and fish production in the Mediterranean Sea through the implementation of a long lasting statistical and information programme which will provide a sound basis for decision making The whole national statistical system developed within this activity consists of a set of databases and associated statistical data collection and implementation methodologies and procedures that primarily cover the fishing vessel census catch and effort surveys and other surveys targeting monitoring and management issues Strengthening the capability of the fisheries institutions of the Mediterranean countries in marine fishery statistics and information systems with a view to meeting the relevant national needs and requirements for participation in and complementing in its entirety the Mediterranean Fishery Statistics and Information System is also considered a priority issue of MedStat

**Selected Papers Presented at the Workshop on Biological Reference Points** Giuseppe Lembo, 2006-01-01

This workshop stressed that the concept of reference points RPs needs to be closely connected to the management objective of concerned fisheries taking into account various parameters such as maximum sustainable yield economic and social benchmark and environment concern Participants stressed the need to define different RPs for each dimension of management or to identify a single RP aimed at ensuring the sustainability of the system thereby no longer limited to biological aspects A review of possible approaches to setting RPs and indicators for Black Sea fisheries emphasized the dynamic nature of recent ecosystem changes The traffic light approach was illustrated as a means of following dynamic changes and gaining a broad perspective on events at the ecosystem level The workshop outlined the main RPs obtained by applying the bio economic optimization models of effort and effort catch as derived from the theory of population dynamics
