

Rebuilding the Mozambique Economy

COUNTRY ASSISTANCE REVIEW

Rebuilding The Mozambique Economy

Juan Obarrio

Rebuilding The Mozambique Economy:

Rebuilding the Mozambique Economy, 1998-01-01 At the Conference on Environmentally Socially Sustainable Development sponsored by the World Bank Learning and Leadership Center and UNESCO participants discussed developing nations seeking technology transfer undertaking new partnerships with the private sector and pursuing the development of their own scientific and technical capacities As they do the quality and content of academic endeavors and research agendas become critical in organizing and investing in knowledge This volume is a compilation of the topics raised at the conference which was assembled to pursue the important task of organizing knowledge that can help address key issues facing people around the world Issues in the book concern survival of the species and the environment and the well being of the world's children

Rebuilding After War Kenneth Simler, 2003 This report part of an extensive body of work IFPRI undertook on the state of poverty in Mozambique at the end of a long period of war zeroes in on the question of what determines living standards and poverty in Mozambique It aims to identify those public policy interventions that are likely to reduce poverty the most The authors examine household and community characteristics linked to poverty and develop a microeconomic model to measure the influence of education employment demographics agricultural technology and infrastructure on consumption Although the results of this research are directed to policymakers in Mozambique those concerned with other low income countries will find the analytical methods and findings useful especially the message that investment in human development as well as physical capital is essential to reduce poverty

The Restoration Economy Storm Cunningham, 2002-11-02 A landmark work I was relieved to see that there is a good and reasonable solution to the ruinous policies of unbridled new development Mark Stewart CEO iAccess Communications The Restoration Economy reveals the previously undocumented trillion dollar global industries that are restoring our natural and manmade environments Restorative development is rapidly overtaking new development because we are running out of things to develop Most natural areas are already either farmed or degraded and cities have built all the way to their borders However there is no lack of things to redevelop and restore Storm Cunningham surveys the wide range of restoration industries and points out the connections among them He shows for example how the restoration of a river ecosystem can have a major impact on the commercial success of a redeveloped historic urban waterfront Written for a broad range of audiences The Restoration Economy is an entertaining blend of business science and economics that details exciting new business and investment opportunities in this dynamic economic sector Any companies or consultants looking for new markets must read The Restoration Economy Pamela J Gordon CMC President Technology Forecasters Inc The Restoration Economy is required reading here at Weston Solutions It has been indispensable in helping us refocus our strategy Bill Robertson Chairman Weston Solutions The Restoration Economy is without a doubt the most important and valuable business book I have read in many years Don Pross Urban Revitalization Planner This book is an original a first I profited from it greatly and I quote from

it in my speeches William H Hudnut III Former Four Term Mayor of Indianapolis The Spirit of the Laws in Mozambique
Juan Obarrio,2014-10-30 Mozambique has been hailed as a success story by the international community which has watched it evolve through a series of violent political upheavals from colonialism through socialism to its current democracy As Juan Obarrio shows however this view neglects a crucial element in Mozambique s transition to the rule of law the reestablishment of traditional chieftainship and customs entangled within a history of colonial violence and civil war Drawing on extensive historical records and ethnographic fieldwork he examines the role of customary law in Mozambique to ask a larger question what is the place of law in the neoliberal era in which the juridical and the economic are deeply intertwined in an ongoing state of structural adjustment Having made the transition from a people s republic to democratic rule in the 1990s Mozambique offers a fascinating case of postwar reconstruction economic opening and transitional justice one in which the customary has played a central role Obarrio shows how its sovereignty has met countless ambiguities within the entanglements of local community nation state and international structures The postcolonial nation state emerges as a maze of entangled jurisdictions Ultimately he looks toward local rituals and relations as producing an emergent kind of citizenship in Africa which he dubs customary citizenship forming not a vestige of the past but a yet ill defined political future

Mozambique and the Construction of the New African State Chris Alden,2001-07-19 An original study of the internationally inspired effort to rebuild this war torn African country It seeks to understand the role of the international community in constructing a new kind of African state in the aftermath of conflict and socialism At the heart of the book is the question of sustainability of the post conflict African state against the backdrop of the multiple legacies of war socialism and regional and international intervention upon an enervated Mozambican society **Peace Without Profit** Joseph Hanlon,1996 Cloth Edition Hanlon has written widely about Mozambique here he lays out the sad truths of the current situation **Explaining Post-Conflict Reconstruction** Desha Girod,2015-02-02 The international community has donated nearly one trillion dollars during the last four decades to reconstruct post conflict countries and prevent the outbreak of more civil war Yet reconstruction has eluded many of these countries and 1 9 million people have been killed in reignited conflict Where did the money go This book documents how some leaders do bring about remarkable reconstruction of their countries using foreign aid but many other post conflict leaders fail to do so Offering a global argument that is the first of its kind Desha Girod explains that post conflict leaders are more likely to invest aid in reconstruction when they are desperate for income and thus depend on aid that comes with reconstruction strings attached Leaders are desperate for income when they lack access to rents from natural resources or to aid from donors with strategic interests in the country Using data on civil wars that ended between 1970 and 2009 and evidence both from countries that succeeded and from countries that failed at post conflict reconstruction Girod carefully examines the argument from different perspectives and finds support for it The findings are important for theory and policy because they explain why only some leaders have the political will to meet donor

goals in the wake of civil war The findings also shed light on state building processes and on the political economy of postconflict countries Paradoxically donors are most likely to achieve reconstruction goals in countries where they have the least at stake *A Guide to the World Bank*, 2003 The World Bank Group works in more than 100 developing economies and is one of the world's largest sources of development assistance In 2002 the institution provided US 19.5 billion in loans to its client countries This guide reviews the organisation's history objectives and operations and looks at the five institutions that make up the World Bank Group the International Bank for Reconstruction and Development IBRD the International Development Association IDA the International Finance Corporation IFC the Multilateral Investment Guarantee Agency MIGA and the International Centre for Settlement of Investment Disputes ICSID

Transforming Mozambique M. Anne Pitcher, 2002-11-14 Many of the economic transformations in Africa have been as dramatic as those in Eastern Europe Yet much of the comparative literature on transitions has overlooked African countries This 2002 study of Mozambique's shift from a command to a market economy draws on a wealth of empirical material including archival sources interviews political posters and corporate advertisements to reveal that the state is a central actor in the reform process despite the claims of neo liberals and their critics Alongside the state social forces from World Bank officials to rural smallholders have also accelerated thwarted or shaped change in Mozambique M Anne Pitcher offers an intriguing analysis of the dynamic interaction between previous and emerging agents ideas and institutions to explain the erosion of socialism and the politics of privatization in a developing country She demonstrates that Mozambique's political economy is a heterogeneous blend of ideological and institutional continuities and ruptures

Walking the Tightrope Jaïr van der Lijn, 2006 The media generally tend to focus in particular on the failures of U N peacekeeping operations In *Walking the Tightrope* Jaïr Van Der Lijn draws a different conclusion He argues once a peace agreement has been signed the efforts of the U N peacekeeping operations do contribute to durable peace By analyzing the U N peacekeeping operations in Cambodia Mozambique Rwanda and El Salvador in a structured focused comparison this book shows how U N operations do have a contribution to make

The Political Economy of Africa Vishnu Padayachee, 2010-06-10 The Political Economy of Africa aims to fill a major gap in the existing literature by exploring the economy and economics of Africa The book has a critical approach from the perspective of political economy rather than mainstream economics This book addresses the seemingly intractable economic problems of the African continent and trace their origins but also always to bring out the instances of successful economic change and the possibilities for economic revival and renewal

Global Public Policies and Programs Christopher D. Gerrard, Marco A. Ferroni, Ashoka Mody, 2001-01-01 This book is based on a global public policies and programs workshop held in July 2000 The papers examine conceptual issues along with the practical implementation problems of global public policies and programs Some of the topics covered in this book are global financial instability the implications of intellectual property rights protection for developing countries and the promotion of international agricultural research

Reconstructing the Regional Economy Adrian Smith, 1998-06-25 The book focuses on regional and economic change in Eastern and Central Europe using Slovakia as a case study It explains the relationship between industrial change and regional development and discusses fragmentation within the context of the legacy of the state socialist industrialization model

IDA's Partnership for Poverty Reduction Catherine Gwin, 2002-01-01 During its 40 year history the International Development Association IDA has worked to improve global welfare by allocating resources to growth and poverty reduction programs In 1990 a new framework for IDA's poverty reduction efforts was created which resulted in significant structural change to its programs The focus of the programs became one of labor intensive growth and expanded access to social services and safety nets to improve incomes levels among the poor Additionally the IDA agenda was expanded to include gender the environment and governance as facets of the poverty reduction framework This report evaluates IDA's performance from 1994 through 2000 against the three specific replenishment commitments of the period While finding the performance level only partially satisfactory the review suggests ways to improve the effectiveness of IDA programs replenishment process and its ability to match corporate and country priorities

Evaluating Economic Liberalization David Greenaway, Mark McGillivray, Oliver Morrissey, 1999-07-23 Liberalization economic policy reforms to render economies more market orientated is a central issue in most countries of the world This important contribution to the literature of liberalization analyzes theoretical issues and experiences of reform Existing approaches to evaluating the effects of reform are reviewed difficulties of measuring liberalization are discussed the complex ways in which reforms can impact on individuals and groups are illustrated and the importance of political concerns are addressed The final four chapters offer detailed case studies of Pakistan Mozambique Vietnam and Sri Lanka

Issues in the Contemporary Politics of Sub-Saharan Africa G. Harrison, 2002-06-19 Graham Harrison investigates contemporary African politics by privileging the dynamics of political struggle and resistance Through the analysis of peasant politics debt and structural adjustment democratization and identity politics the author shows the importance of resistance and agency Detailed studies of Mozambique Nigeria and Burkina Faso demonstrate how political organization and resistance have been closely ingrained in particular post colonial trajectories An original and refreshing approach to the study of African politics this will be a useful textbook for upper level undergraduates and postgraduate students
